YELLOW FEVER MICROBE.

A Celebrated French Physician Coming to America to Study It.

NEW YORK, Sept. 17.—The Herald's Paris says: Dr. Paul Gabier, the young physician whose investigations of the anti-cholera system of Dr. Ferran were described at the time of the 1885 epidemic in Valencia, will leave France next Saturday for Florida, where he intends studying yellow fever. He goes on an official mission from the French government. Last year he made an exhaus. tive inquiry into the subject of the fever in Cuba, and in his report, read the other day before the Paris academy of medicine, he expressed his conviction that the microbe of yellow fever differed little from the cholera bacillus, and, like it, was almost invariably found in the intestines.

GETTING READY FOR THE HUSTINGS.

Leadership-The Parnell Enquiry Be-

gun-No Clue to the Recent Murders. LONDON, Sept. 16. - London after being emptier than usual during the past three weeks, begins to fill again. Political gossip is again rife, the autumn campaign on both sides being organized. Nobody has made speeches on the Unionist side since Parliament rose, save the Duke of Rutland. Mr. Gladstone has been almost alone on the Home Rule side. This week all this will be changed. Lord Hartington's party have organized a great agitation and everybody in the party who can speak has been pressed into service, the leaders for great political demonstrations, the minor men for clubs and The floods in Austria are substance. Skings rules incertage.

The Gladstonian agitation begins after the meeting of the Birmingham Liberal Federation, a few weeks later. The arrangements respecting it have been somewhat disturbed by Mr. Davitt's unexpected appeal. It was originally intended, with Mr. Parnell's con Ireland should be conducted on separate lines, incidents of coercion being used in Ireland as well as evictions. Mr. Davitt and Mr. O'Brien, joined, I am told, by the Sullivans, agreed that the movement must show greater solidity, and that resistance to evictions must be approved and aided by English oratory. The temporary reluctance on the Gladstonian side is likely to be overcome, and, in consequence, the case of the Irish tenants will again be taken up by the Gladstonians. Much personal feeling has been caused by the incident, the Gladstonian land-owners being still reluctant to accept the Plan of Campaign. But the irritation will wear off, and Mr. Davitt will practically have his own way. Mr. Davitt teared that the Gladstonian line would discourage resistance to evictions. His protest will, using his own language, "remove the handouffs and substitute the shield for

Mr. Smith, returning to town, was not found very eager for Parliamentary duty, but ready to go on, no successor to him being discoverable, unless Lord Hartington agrees to resign his independence. The Tories will not have Mr. Goschen and at present prefer Mr. Balfour, who swears he will not leave Ireland until his task is accomplished or his failure clear. Lord Hartington is sagely silent and is likely to remain so until the crisis actually occurs. There is no truth in the rumors that Mr. Smith is to go to the Upper House and that Mr. Goschen is to take his place, nor is there any ground for saying that Sir Michael Hicks Beach is to become a peer. He is too poor

for a peerage. It will be an odd result of all this talk and trouble, if Lord Randolph Churchill comes back. He and Lord Hartington have had some communings together lately. Lord Hartington once did not trust him politically, but is now said to be almost an admirer of Lord Randolph's audacity and and may even recommend him to Salisbury for re-entrance into the

The preliminary meeting of the Parnell Commission was held on Monday in a most inconvenient court, too small even for the press. A decision is to be taken as to the order of proceedings. Sir Henry James is, not, I hear, to appear actively in the case, being the Attorney-General at the time of the Kilmainham Treaty and the Phœnix Park murder. He knows officially too much, and is responsible for advice as to many things denounced by The Times as improper. The inquiry will take at least months. Mr. Parnell himself demands a Commission of Inquiry to to America, and taking evidence

abroad will greatly delay the result. There is not the slightest clue to the Whitechapel murders, and the new Chief of Detectives is attacked as unfit for his post. Dr. Anderson is full of apocalyptic sentiments, a very good, tender hearted mystic, but not the man to discover or inspire Lecocq. Sir Charles Warren is also attacked, but he says he means to hold on, even if a colonial appointment is offered to him. Mr. Matthews' resignation is demanded very vigorously, but there is not the slightesidea of getting it. The town meanwhile is settling down to regard Whitechapel as too distant greatly to disturb it. In the East End, however, the panic is producing a crop of extraordinary stories-men with repulsive aspects who peer at children and show the gleam of knives from their pockets. There is great relief at the discovery to-day that no new crime has been committed. was half expected the murderer would choose last night for a new piece of fiendish

. O RESCUE STANLEY.

Various Pinns Discussed in London-Zews of Disaster Expected Bally.

LONDON, Sept. 16 .- The Ministers within his elder brother or his father. But Sir Walter is known to everybody, and the fate of his gallant son moved society to the core. There is a great unofficial discussion as to the amount of assistance England lends to the expedition. The initiative is with King Leopold in the Congo business; it is his experiment. There is no news of measures likely to be taken by him. The English endowment for Mr. Stanley comes from private association of wealthy people, known as the Emin Bey Relief Committee, the largest subscriber to which is Lady Burdett Coutts. It is probable that a new expedition will be organized, in part by this committee, with the assistance but without the formal responsibility of the War Office in Lyndon Me Stanley's fate is regarded outside a very small circle or optimistic ex perts, as certain. The news of a disaster is expected daily. Few African experts stil hold the belief that he is the white man i Bahr-el-Gazelle.

Ltalked to an experienced African traveler this week. He assured me that no single man of an expedition like Mr. Stanley would have failed to attempt to get round Khartoum by the back door, if he was in possession of Mr. Stanley's opportunities. Nevertheless, the public believes Mr. Stan ley to be lost. Ways and means of reaching him are greatly discussed. The Spectator proposes a balloon, laughs at the danger, and declares that if a balloonist fell amid savages he would be regarded as a god, and would receive information and aid on all hands. This rather wild suggestion is not generally accepted. Mr. Baldwin has not yet been communicated with, but the fact that such a scheme is discussed shows how greatly the public mind is moved by the assassination of Major Barttelot.

More Explorers For The Congo State. BRUSSELS, Sept. 16 .- Capt. Becker starts to-day for the Congo. He proposes with 200 men, to explore the northern and east ern regions of the Congo State. It is hope ... that he will hear something of Stanley.

dinus Becoming More Self-Reliant, NEW YORK, Sept. 16.-The Sun to-day prints a column and a half special from Blakeley Hall, dated Ottawa, purporting to be an interview with Sir John Macdonald touching sented as talking in the line of his Kingston speech already published in The World, saying that the Dominion authorities will do m but await developments, and that Canadians are becoming more self-reliant, also states that Sir John said the Canadians desired Cleveland's election and feared Blaine.

A Breach of Treaty Stipulation. OTTAWA, Sept. 16. - At the request of Six John Macdonald a number of Ottawa gentlemen who are in the forwarding business have submitted to the Dominion Government for transmission to the Imperial authorities in been treated in their business with the New York State canals. It is stated that forwarders in other parts of the Domisson have been requested to state their experience also. One Ottawa forwarder, in his letter to the Government, says that the Erie canal has been closed against his vessels, despite the stipulation in the Treaty of Washington, by which the United States Government undertook to urge upon the State acthorities the advisability of making the State canals free to canal vessels.

It is True.

ALBANY, Sept. 16.—Regarding the dispatch that the State canals have been closed against Canadian vessels despite the Treaty of Washington, Deputy-State-Engineer Wurtelle says that it is true that no Canadian bottom can come through the State canals. The reason of this is because the State of New York has never been urged to comply with the Treaty of Washington. The canals have always been closed against Canadian vessels.

Beginning to Use our Own Ports.

OTTAWA, Sept. 16.-The possible enforcement of the -retaliation bill by the United States Government is having the effect of inducing all local importers here to boycott Boston and New York ports in shipment of goods from England. Until this sessor nearly all winter shipments for nerchants here came via Portland and a large percentage of summer shipments via Boston and New York. With one or two exceptions, the wholesale houses here have instructed their shippers in England to ship all orders in future vis Halifax and Montreal.

THE FASTER'S FAD.

Dr. Tanner Fromulgates a Startling Theory

-Can Man Hibernate ? CHICAGO, Sept. 15,-Dr. H. S. Tanner, who became famous eight years ago by fasting for 40 days, arrived here yesterday from New Mexico. He is apparently in perfect health at present, he cats two meals a day in summer interview he said he had been in New Mexico for four years, pursuing investigaanimation or counterfest death. vinced that large numbers of people are annually buried alive all over the world, and from his study of various cases and the records of societies on the subject in Holland and elsewhere he is convinced that so subtle is the principle of life that no one can undertake to say that it is exstinct until set in. He declares in this ocuntry are buried with indecent, with criminal haste, and that burials of persons who are not absolutely dead are murders.

The doctor is also pursuing another branch of semi-suspended animation, viz.: hibernation. He declares that bears sud other hibernating animals do not use their lungs during the hibernating season, and he is convinced that man can hibernate. Herefers to the long trances of the Hinduo adepts, accomplished through long seasons of wasting, and declares it to be his belief that these trances are merely seasons of hibernation. The doctor says he is studying with a view to making some experiments in this line, and that the time may come when he may permit himself to be sealed up in an air-tight coffin and laid away until such time as he shall designate for it to be opened.

Sandbagged and Robbed. DETROIT, Sept. 16. -An extensive robbery was committed in this city between 1 and 2 a.m. yesterday by two burglars, W. H. Traves, builder and contractor, being the victim. Mr. Traves had drawn money from the bank and made collections the day previous and when he retired for the night he had over \$2000 in cash in his pocket book. The coat containing the pocket book hung over a chair and at the hour named Mr. Traves was awak. ened by his daughter talking in her sleep and looking up saw a man walking off with his coat. Mr. Traves grappled with the burglar and together they rolled down stairs, where the a cond burglar, who was engaged in ramsacking the drawer of a secretary, sandbagged Mr. Traves and thus secured the safe retreat of the burglars with their booty. Although he received serious injury the victum of the assault and robbery is now pronounced out of

Gers Barothy's Suicide. OMARA, Neb., Sept. 16.-From a letter written on the day of his death by Oers Barothy, who committed suicide at Chicago last week, it appears that his crime was not caused by unrequited love, but was in recognition of a pledge given to kill himself.
