A WRECKED SCHOONER.

Askere on Wolfe Island -/ A Blinding Storm Accounts For the Accident. Capt. McGuire and crew of the schooner

William I. Preston reached the city yesterday evening after having had a most exciting adventure on Lake Ontario. The vessel had 17,000 bushels of wheat, en route from Detroit to Ogdenaburg. During the gale on Saturday night entrance was had to Charlotte harbour. On Sunday morning, with a fresh south east breeze blowing a start was made for Ogdensburg. The wind increased, and the sails were reefed, but at 8 o'clock on Sunday night a gale from the south came up and was immediately succeeded by a blinding snow storm. Nothing could be seen and the crew lost entire control of the vessel. The lake was in a boiling state, the sold icy water sweeping over the deck by the ton. Tossing and tumbling about the cruft dashed ahead and with a crash went apon the rocky coast of Wolfe Island on the with west side, known as "The Sow and Figs," one of the most treacherous points on the whole of Lake Ontario. She speedily filled with water, the crew (totalling seven) took to the boats, and at midnight were landed on Wolfe Island. Shelter was secured. The vessel is now lying easy, but her cargo is destroyed. It is insured and owned by Lapham & Co., Detroit. The vessel is owned by George Goble, Oswego, and is uninsured. Capt. McGuire is here to await orders from the owners as to her rescue. The vessel was struck by the gale when off the Galloup islands.

The steamer Chieftain left this morning to rescue she schooner. She is lying on a rocky bottom, and pounded so hard during Sunday night that it is feared that all her bottom planks are stove in.

POLICE COURT-TUESDAY.

She Said They Smashed Her Windows-Two Little Lads in the Dock.

Two women before the court this morning for breaking two panes of glass in a window in her Bagot street mansion. One, weak it holy."-Yours respectfully, and excited in body, but vigorous and voluble in tongue, told the tale of the warlike attack, produced the rock that caused the damage, and declared that she was an eyewitness to the siege, as she was peeping from behind the curtain. The defence was so very conclusive that the case was dis-

OUR LITERARY COLUMN.

The next Century is to contain Henry | the dollar ?" Ward's Beecher's last manuscript-an uncompleted paper on his trip to England in 1863, which he was writing the last week of his life. The article is supplemented by a paper by Rev. Dr. Buckley, hearer of the famous speech which Mr. Beecher delivered in Liverpool, in 1863, in the presence of a

The conductors of Harper's magazine issue a Christmas number, not only complete in itself but somewhat different from the lines followed during the rest of the year; and the Christmas number for 1888 is an issue strong and novel. The originality of its pages is most striking in the short stories (the serial stories all ended in the November number), as in "The Christmas Story of a Little Church," by Grace King, "Sourus Dismal," by W. W. Archer, and "The Front Yard," by Miss Woolson, this last being a daring comparison of Italian and New England natures and ways. In poetry, too, the number is exceptionally good. Ar tistically it has never been surpassed.

In the October Forum Archdeacon Farrar made a narrative of Tolstoi's remarkable career, explained the religious meaning and the literary value of his great novels, and criticized his religious teachings. Both American and English readers desired a more specific explanation by so high an authority of the difference between Tolstoi's rigid interpretation of the teachings of Jesus and the interpretation made by the mass of Protestant believers. This second article will appear in December number. Z. R. Brockway, superintendent of the Elmira, (N. Y.) reformatory, will write about prisonconvict systems to show the necessity of giving convicts self-sustaining work.

LETTERS TO THE EDITOR.

Sabbath Desecration.

KINGSTON, Nov. 18 .- (To the Editor) : Some short time ago I noticed a paragraph in a Belleville paper stating that a barber was fined for keeping his place of business open on Sunday, and I wondered how it was that some can and do keep their places of business open on Sunday, every Sunday, with impunity (men at work). Whose business is it to look after the law breakers, if it is a law in this city? Is it the police? Or are they confined to a certain class of law breakers. and if spoken to about the class in question would say, "None of our business?" Or is there a Sabbath reformation society, and if there is would they, too, say, "None of my business ?" I will say no more this time, but if one passes along Ontario street he will hear sounds in the locomotive works that will convince him that there are people who choose to forget that old fashioned command. ment, "Remember the Sabbath day to keep

CITY HALL LAST NIGHT.

Bailway By-inwa-The Opposition Offered-Mr. Rathban's & ppearance Heralded With Tuncaltubus Appluuse-A

The city hall was well filled with electors last evening. The meeting to consider the sleeve, Sullivan, Gaskin; Alds. Muckleston, Shannon, Polson, Redden, Minnes, Fenwick, McCammon, Dunlop; Messrs. Hobart McKay, Walkem, Macdonnell, James Richardson, E. Chown, Dupuis, Kitto and Mc-Kelvey.

The mayor first announced those who had a right to vote, including widows and spins ters owning property. He alluded to the water works, the dry dock, drains, school elections on the same day as the municipal elections, school of science, King street esplanade, street electric lighting, and railway by laws. The decision on Nov. 29th would be that either Kingston would ad vance and take the place she is entitled to or remain where she is. He urged the electors to do the right and give Kingston an unward "boost " to make her occupy and have the read appear his opinions design commanding position. The progress she has made in years past should be wonderfully increased. He thought it was the city's destiny to become a great railway centre. To carry out the schemes now before the people meant increases in population and wealth.

Ald. J. McIntyre then proposed the following resolution :

"That this meeting approves of the by-law submitted by the city council granting a bonus to the Napanee, Tamworth & Quebec railway company, and recommends its passage by the ratepayers,

He began by pointing out that the time to make Kingston a depot for the country After the Rev. Father McGrath concluded on both sides of it. Toronto had been boomconnection with Harrowsmith, the same advantages could be obtained. He touched on the taxation question, showing that to the man who paid taxes on \$400 the rate would be 20c, the price of four plugs of tobacco. "Am I right, as I am not a smoker?"

A voice -"Do you mean twenty cents on

the prosperity and growth of Kingston."

The Scheme Eudorsed.

The mayor read the following telegram from E. W. Benjamin, Warker :

"A deputation from Yarker and vicinity, for the purpose of expressing our earnest desire for a railway connection with your city, unfur-tunately missed the Kingston and Pembroke train at Harrowsmith. We hereby express our hearty endorsation of the proposed Yarker and Harrowsmith connection, feeling assured that such a connection will affect the desired results and that the advantages arising therefrom will be inestimable to the city's interest as well as to the rural districts."

Mr. John McKay favoured the building of the connection. It would connect with the city a rich and cultivated country. the N. T. railway by-law passed he was sure it would result in great benefit to the city.

All in Fayor of This.

Ald. C. F. Cildersleeve said that if the result of the meeting was the passage of the by laws he would call it the best and most important meeting ever held in Kingston. He looked on it as a second act in the drama which has for its object the benefit and prosperity of Kingston. As to the Smith's Falls railway scheme he briefly reviewed its history, and gave substantial reasons why the line should be built. He gave reasons why it was desirable not to spend too much money in getting into Kingston. It would be better to use the existing lines from here to Kingston Mills than to see the company fall. Then he spoke of the N. T. & Q. RR. and declared that the road would come to Kingston over the K. & P. RR. line as independently as if the people owned it (cheers). He read the clauses in the by-law and agreement to prove this contention. No two rates would have to be paid on freight from Tweed to Kingston. The man who. said so was not talking the truth. The K. & P. RR. had no right to interfere in the matter of charges on freight carried by the N. T. & Q. RR. over the K. & P. RR. from Harrowsmith to Kingston. He combatted the idea that the new road would take trade from Kingston. No such thing had ever occurred in any city where railways converge. It was a most absurd contention. If the citizens believed such a thing by all means they should have nothing to de with outside places. He believed that by making Kingston a railway centre it would attract not only trade but manufactures. He declared that if Kingston did not aid the road the line would not be pushed to Iweed, so that it was for the city's benefit to have the road sent on to Tweed and secure connection with the C. P. R. there. There was no other place that could aid the road but Kingston. He then moved :

submitted by the city council granting a bonus to the Kingston, Smith's Falls and Ottawa railway company and recommends its passage by

the ratepayers." Hon. Michael Sullivan seconded the re- connection was also desirable in the interests solution, and in a happy speech showed of Deseronto. The line would skirt along always taken an active part in promoting what advantages railways had been to the valuable water limits and where the drives and advancing the interests of the city. We United States. He then took a retrospec. of logs from the far north could be interceptunderstand that it is the intention of Mesars. | tive glance at the railway enterprises in | ed. It was desired to reach the logs that Gardiners to engage exclusively in the Kingston. The Grand Trunk hurt the sink easy and draw them to the mills, for wholesale trade, as the want of another city's commerce and Kingston, depressed 16 per cent. of various kinds of wood sank house in that line of business in this city has and despondent, cried "Lord save, or we been a long felt one. We hope the firm will perish!" A boom came, and the K. & P. The connection made Kingston also accessee their way to remain in Kingston. We | RR. was built, and caused great progress to | sible to these water privileges and he was the city. He saw no reason why, in view | satisfied that there was enterprise and capiof the success of the past, the city should not | tal enough to take hold of these privileges and try a second dose. (Cheera.) He strongly | along the road establish lines of industry favored the Smith's Falls line. It would | that must cause trade with the city. But | = the Midianul system of railways would be old. In this way the three busy B's are | the city, but he was satisfied that with faith | all the product of that back country. Kingand hope in the future they would, at least, ston was the natural outport for all that experiment and try what good bonusing could do to make it, a stirring, bustling city trade. There was much money made by Kingstonians by the trade with the lumber-He was sure the bonus would be grante !, men of the north on the K. & P. R.R., and

cheerfully for the by-law and

granted." the citizens for the

He reiterated his tormer objections, chief of which was that the lumber and ties of the back country, now handled in Kingston, would go to Deseronto. Then Mr. Rathbun might get smelting works in Deseronto and the iron ore of the back country would go there to.

Mayor Thompson-"I telephoned Mr. Rathbun to attend this meeting, and he said he would. He has just come in and I would be glad to have him come upon the plat-

ir. Rathbun arose and was tendered an ovation. He acknowledged the applause

Mr. Gaskin was glad to see Mr. Rathbun,

cheers and counter cheers, and finally Ald. Gaskin exclaimed, "I never knew before, but I know now on which side the black.

shipbuilding. He added that if the present scheme were defeated Mr. Rathbun would come back and ask aid for a direct line as he wanted to get to Kingston. The attitude of the Rathbun company to its labourers was mentioned and the concern accused of unfairly treating the workingmen. If the road were built there would be no more strikes here as the business would be transferred to Deseronto. If the by-law passed the people should jump Kingston and buy lots in Deseronto. He was sure the electors would put the double cross on the scheme and save the city from danger.

Dr. Dupuis, as a taxpayer, gave reasons why a direct line would be advantageous to Kingston. A point made was that cordwood would be taken from the north on the Kingston & Pembroke RR. to Napanee and Deseronto and thus increase the price of it in Kingston. It was claimed that lumber and grain would go to Napanee and Deseronto by the Harrowsmith-Yarker connec- fit by the connection with the country is tion while passenger traffic would be divert ed tewards Ottawa and Montreal instead of Kingston. In short it would not pay to bonus the connection.

An Admirable Address.

Mr. E. W. Rathbun was received with

great applause. He was not aware he

would have to meet so many charges, but

as all had a bearing on the subject he would be excused if he discussed matters more Ald. McIntyre-"No! No! Two ten cent | personal than public. He admitted that there had been discord between the com-A voice -"What will you get for that?" pany and its labourers in Kingston, and ously adopted. The amendment of All. Ald. McIntyre-"I don't think it's a poor | what firm had not met with it? Yet in | Gaskin, to the resolution touching the N.I. man that's speaking. A poor man wouldn't this age, when the spirit of compromise and & Q. RR., was presented and approved by ask such a question. (Cheers.) But I will conciliation is so generally accepted, the about a dozen electors. The motion was put tell the gentleman that by giving that matter had been arranged, and the em- and was overwhelmingly endorsed, smil amount he will be doing something to aid in ployers and employed had worked together | cheers and applause. The audience dis most satisfactorily. None knew better than his company the likes and dislikes of men, nor the many things the labouring classes have to contend with, and none had more earnest sympathy with them than those your company could not build a direct list who had to do with them in connection with | to Kangston," asked a Whie reporter. the Rathbun company. He wanted to be fair and honest, and bring to the surface everything in connection with the proposed railway. There were interests to served the N. T. & Q. RR. company, Kingston, the K. & P. RR. company and the Rathbun company had interests to be served, yet if these could all be aided with advantage to each what injury followed? It was his intention to make a big éffort to establish smelting works at Deseronto. Charcoal was made there from the waste products of the mills. If the people of Kingston wanted cordwood reduced to charcoal the Rathbun company would run the works here and make it free of cost if given the smoke. But in connection with the smelting works he reminded the audience that the mine depended upon was now said to be only a pocket, and therefore their hopes were somewhat blasted. As to cordwood the city, in its by law, had amply protected itself, and instead of the commodity going to Napanee and Deseronto it would come to Kingston. But if the protection was not sufficient he would willingly give a guarantee that the rate charged would not be greater than that charged in the Smith's Falls by-law, (introduced at the request of Ald. Gaskin,) \$9 per car load of six cords, for any distance up to sixty miles. The 15,000 cords of wood used by the paper mills along the N. T. & Q. RR. was now carried at about that rate. He pext alluded to the defeat of the Hungerford by-law some years ago. Much of the township was served by railroads so that, through the influence of the owners of these lines, as well as of those in adjacent cities and towns, the by law was defeated. To build the line now the company could only look to Kingstop for assistance and it would be to its advantage to do so. He dwelt on the possibilities of the country, of its resources, and showed most conclusively that Kingston would reap great advantage by the connection. Why does the company want connection with Kingston? Because it is a city and it would attract trade that otherwise could not be developed. There is trade and produce that the farmers would never think of taking to Napanee or Deseronto and which Kingston would tempt them to handle and sell, and the company covetted the handling of that business. In hingston there were the advantages of banking, ready sales, easy access to the American markets, and altogether it would draw trade that could not be got in any other way. It was for these reasons that the the company offered to accept \$75,000, a sum so insignificant that it was no wonder some people thought a scheme was hidden beneath the whole matter. But the Tamworth-Tweed this was not all, for by a little further work

tapped and ready exit had at Kingston for

Deseronto, Kingston would be the supplies and the greater the Ratio the consumption. The influence Dr. dux influence upon Kingston's trade.

Mr. Rathbun next attacked the

statements that Kingston would p

the connection. Kingston, was the diit would be foolish to take ties to Des when Kingston was nearer the American would be short-sighted to send their st to Deseronto and have them so ferried across a river by coming to Kingstit would be simple for grain dealers to a to Deseronto when boats are sent from King ston to get the grain there and at Napace to carry it to Oswego, and when Kingstpays higher prices for it than either ph go own hands, he exclaimed. He said the the papers were incorrect when they mai out that the Tamworth-Tweed cooper was almost built. The fact was that of one and a half miles of road was laid, for miles of right of way bought, and agreemen made for several miles more; and this to done to save the government book Kingsten did not aid the line-well, would have to cease until money could secured. "We can get the money." subservient to the stockholders of othe roads. But if Kingston does not aid m m will not throw up the sponge. We do do business that way. But we will have b defer its completion." The connect Cries of "oh! oh!" He expressed fear The one mile already built cost \$16,000 that when the N. T. & Q. RR. was built | The Harrowsmith-Yarker connection well not be built if Kingston did not aid it h would cost \$50,000. Ald, Gaskin--"Did you not offer to belle

a direct line to Kingston for \$100,000" Mr. Rathbun-"Informally. When when by the city to consider the matter-and here I might say I did not run after the ch of Kingston, All the advances were me by you, and you are to decide what are reinterests—an engineer told me that it would coet \$200,000 to come directly to Kington so without further examination I said is formally, \$100,000 would be needed from Kingston. But when a survey was made ! found that \$200,000 was a mere bagatelle d the cost, and the company had to drop it a once. We could not build the connection to the Dean's barn for the sum offered, and therefore, had to fall back on the Yarke Harrowsmith connection." He admitted that the K. & P. RR. had treated the N. I. & Q. RR. most liberally, and it was he Kingston to state whether it could see bene the north west, a country unlimited in in possibilities. He concluded by reiterating that the company wanted to reach Kingston for Kingston's good, and said he did not be lieve that the laboring classes of Kingston considered that the Rathbun company dealt unfairly with the workingmen. (Cheers).

Winding Up Matters. Mayor Thompson thanked Mr. Rathbun in the name of the electors, for his attend ance and able address. The Smith's Falls resolution was unanin-

persed at 11:30 o'clock.

Put It Very Plain,

"Mr. Rathbun, am I to understand that "We could build a line," said Mr. Ratibun, "nothing is impossible. But Kingston, i am satisfied, could not offer us sufficient inducement to build a line that way. would take an enormous amount to build the road that way."
