At What Hour Do You Dine?

If a person will tell you the hour he means to dine, you can tell him the hour he intends to get up that morning. First ask a person to think of the hour he intends rising on the following morning; when he has done so bid him place his finger on any hour he pleases on the dial of your watch, and to remember the hour he first thought of. To the hour his finger is on you now mentally add 12, and request him to retrograde, counting the number of hours you mention, whatever that may be, but that he is to commence counting with the hour he thought of from the hour he points at. For example, suppose he thought of rising at 8, and places his finger on 12 as the hour of dinner, you desire him to count backwards 24 hours; 12 he calls 8 (that being the hour he thought of rising), 11 he calls 9, 10 he calls 10, and so on (mentally, but not aloud), until he has counted 24, at which point he will stop, which will be at 8, and he will express his surprise to find that it is the hour he thought of rising.
