**EWELLERY** 

ROMAINE GOLD, so extensively worn in Paris, was first discovered in 1870, by the celebrated French chemist, Mons. D. Be Lauge, who manufactured it into jewellery and for five years sold it to the leading jewellers of Paris for solid gold. In 1875, when his secret became known, ten of the manufacturing jewellers established a stock company, with a capital of \$10,000,000 for the purpose of manu facturing ROMAINE GOLD JEWELLERY AND WATCHES. With this immense capital, and the aid of improved machinery, they are enabled to produce all the latest patterns of jewellery at less than one tenth the cost of solid gold, and of a quality and color which makes it impossible even for experts to detect it from the genuine.

We have secured the exclusive agency of the United States and Canada, for the sale of of all goods manufactured from this metal and in order to introduce them in the most speedy manner, have put up assorted sample lots as given below, which we will send at one tenth the retail value until January 1st. 1878.
