THEODORE ALLEN.

(J. Carlin in Utica Olserver.) In the broad channel of the St. Lawrence, as its waters leave Lake Ontario and run between Kingston on the Canadian and Cape Vincent on the American shores, are several islands. One of the most noted of these is Carleton Island. which is situated in the American Chanmel, four or five miles northerly of Cape Vincent. Carleton Island was known to the old French explorers as Isle aux Chevreuils, or Isle of Roe Bucks. It lay in the line of the old Indian trail, which ran from the Canadian shore of Lake Ontario to the Iroquois cantons on its souther border, which trail avoided by its

and camping ground in all the Colonial But what renders this little island of more historical interest than the many other islands of the group, are the remains of a strong military work, which was constructed upon it in the latter part of the last century, crowning the brink of the bluff at the head of the island, overlooking the "pretty port," and command-

court, in an account of his journey along the St. Lawrence, in the year 1795, says of this island: "During the American war the British troops were constantly in motion, and in later times they were quartered on an island which the French called Isle sux Chevreuils, and which the English have named Carleton, after Lord Dorchester. Then again, in a full and complete Canadien Gazet eer, published by David W. Smyth, the able and careful Surveyor

Carleton," but was merely considered by them as an advance work connected with the defence of Kingston. The work on Uarleton Island is a bastioned half front of a hexagonal fort of a fort of some eight hundred feet diameter, open at the rear toward the brink of the bluff overlooking the cove. The i ditch, twenty-two feet wide and four feet deep, is excavated in the solid rock. The covered way was twenty-four feet wide and the parapet four feet high. The front of the fort commands the approach from the Island, while a heavy sea wall, forty feet in height, is built along the bluff that borders the cove. Several chimneys are still standing within the fort and near it, built of stone in a permanent and massive manner, while the remains of the guard houses, rifle pits and wells are still plainly visible. Not far from the fort is an old burying ground, in which many graves were found, and on the south side of the Island was a large clearing of some thirty acres, called the King's garden. Along the western shore of the little cove are still to be seen the remains of a sunk-

rised was surprised and taken by the Americans, by whom it has ever since A Good Horse. - There is much pleasure and profit in the service of a good horse, and but very little of either in a bad one; no person from choice will retain a bad borse; many however are in possession of such who need not be. We think there are tew horses so bad but that their condition can be improved and rendered more valuable and useful for their owners, to effect which, there is nothing equal to Darley's Condition Powders and Arabian Heave Remedy, it has effected astonishing results in thousands of cases. Remember the name and see that the signature of Hurd & Co. is

and four long twelve and two six-pound

Carleton Island.

coast line the rough and dangerous waves of the open lake, and it lay also in the line of the great western trail. There being at the head of this island what Father Charlesvoix, who visited it in 1720 calls "a pretty port that can receive large barques," it was a favorite stopping place

ing the American channel of the great river. This fortification is now know as Fort Carleton, but in regard to its origin and the date of its construction there has been a great deal of conjecture and not a little controversy among historical enquirers. It has been supposed by some that this fort was begun by the French during the last years of the French and Indian wars, before the English conquest of Canada, but Pouchot, in his Memoirs. while minutely describing every other fort and station along the northern frontier, says nothing of this work, and we must believe that had so important a station as this then been fortified, it would not have been overlooked by so careful and accurate observer as Pouchot. Again, it has been alleged that these works were begun by Sir Guy Carleton, Governor General of Canada during the war of the Revolution, and the island and fort at that time named in his honor. But histories of those times are silent on this subject, and the celebrated French traveler, the Duc de Rochefoucauld Lian-

General of the upper province, in 1799, no mention is made of any Fort Carleton.

but it is said therein of Carleton Island:

"Kingston garrison furnishes a detach-

ment to this place." It is, therefore,

more than probable that this fortification

was never known to the British as "Fort

en dock. Many relica have from time to time been found near the fort, and bear-
