### FRANCE.

The elections in France of the Councils General proved even more adverse to the Government than that of the Deputies on the 14th ultimo. The bold Marshal's bark has proved to be worse than his bite. Since France has twice over declared against him he is much more inclined to be accommodating. On only is the retention of the Presidency for the former of \$80,000 and the latter of the full septennial term for which he was \$9,000. elected, or up to 1880. The admirably trothed to Miss Jennie Quigley, a diminucalm but firm attitude the triumphant tive lady, who travels in the same troupe Reputlicans have maintained has done them infinite credit, M. Grevy well representing their moderation by declaring his willingness to accept any terms consistent with the integrity of the Republic and the will of the nation, as lately expressed in the elections. Already several attempts have 'been made to remodel the Ministry to enable MacMahon to face the adverse majority in the new Chambers, but as yet no permanently successful settlement has been reached. Rumors of the President's resignation are current, but the likelihood is that he will be permitted to remain figure head, for the present, on condition that he will permit the nation to govern itself. Meanwhile Grevy is elected President of for the present. Senate, Gambetta is not imprisoned for foretelling what has actually come to strated with him. STATE ELECTIONS-The State elections over the way have resulted in no very startling reversals for either party, such as overtook the Presi dential party in Ohio lately. Of course New York State was carried by the Democrats, though by a reduced majo rity, the House being Republican by a small majority. The falling off in the Democratic vote for Governor occurred in New York city, and was owing to the serious split in the party there on the Tammany question.
