GARDEN PLOT SCHEME. In Ottawa work has already been begun upon the garden plots, which are being cultivated for the benefit of the poor. Applications are being received from those who are willing to work the land, and, according to the information given to the Fress Press, "there is not near enough land at the disposal of the Associated Charities, (another name for a combination of all the benevolent societies) on account All this is suggestive to the committee here, to which the garden plot scheme has been referred. It is important that action should be taken at once. In Toronto last year the selecting of suitable land and apportioning of it was delayed until the success of the venture was seriously affected, and from the very start. This experience should warn Kingston's committee to be up and doing at once:

tles towards the west until he reached the territories of the mighty sultan of Khuarezm. Here he halted, having no immediate desire to go beyond these limits. He sent envoys with presents and a peaceful message to Muhammad, the Shah, and but for an unfortunate occurrence, the Mongol armies would probably never have entered Europe. Soon after the interchange of civilities between the two sovereigns, some of the sultan's subjects plundered a cara van of Tartar merchants, and Genghis demanded satisfaction for the outrage. Instead of giving up the chief offender, as Genghis required, the Shah beheaded the Mongol envoy and sent back the attendants without their beards. This was an insult that must be avenged and soon the two empires began great

preparations for war. The sultan was master of many countries, among which were Persia and much of india. He collected an enormous army, but in case of failure he had no other recruits to fall back on. Genghis, with his overpowering troops rushed on all parts of Khuarezm leaving nothing behind them but ashes and ruins. The sultan's armies were almost always defeated. Muhammad, driven from one extremity to another. escaped to an island in the Caspian sea, where he died in sickness and despair, leaving what remained of his empire to his son Jalaluddin. Jalaluddin was brave and courageous, and did all that man could do to avenge his father's death and to prop up his tottering throne. Hemmed in by the loss of city after city, he was at last driven to the banks of the Indus. Here was led by Genghis Khan in person (whom little Casan always followed), far outnumbered the Turks. The mighty army of the sultan had been reduced to a few l hundred men, who fought with undaunted courage till forced to flee. Jalaluddin, knowing that all was lost. stripped himself of his armor, threw away all his arms save his bow, quiver, and sword, and, mounting a fresh horse, plunged into the river twenty feet below. With admiring gaze Genghis and Casan stood watching the fearless

horseman. In the middle of the stream he turned and emptied his quiver in defiance of his enemy, and soon after was seen to mount the opposite bank. He passed of the wild beasts. Genghis sent men to pursue him, but he escaped to Delhi. He managed to recruit a few soldiers from the beaten Turks, but his spirit was broken. He could not endure exile, and after many misfortunes he returned to his own country and died in obscurity. More than six centuries have passed away, and still the ravages of the great Khuarezm war have not been entirely repaired.
