card to the magistrate by a policeman.

cal American police justice. There must b

As American Given a Seat on the Bench - It Was Interesting to Witness the Way the Prisoners Were Handled-A Huge Dock-Julian Ralph's Descrip-

Even the few Americans who have seen an English police court will not all confess was anti-sympathetic to the dog. Indeed, human conditions are so peculiar that I hasten to explain how I came to see one, for police court, are not in the guidebooks, and even "slauming" stops at their doors. It was in Birmingham, and I was in ware's of one of England's most noted spe-

Reasoning it out, as would Professor Romanes, it could not have been primarily distasteful to the unimal, as associations of the man with kicks and cudgellings freely bestowed in checking certain kleptomaniac impulses natural to the dog. A chicken's breast and milk and sponge-cake fed lapdog would Everything will be sold regardless of cost or value. This will b have turned up its nose at honest beef and the shambles, but a normal dog would not have been indifferent to the blandishments of the There are some very original and pathetic

stories due to Pierquin. He insisted that the dog held in holy horror certain individuals whose terrible calling it was to truffle in dogskins. I have sometimes thought that the lugubrious ballad of the dog-skin dealer has yet to be written. Say he is coming into some media val town with his pack of dog skins on his back. Then the first lounging street dog eyes the stranger over, and sniffing assures himself of the horrid load the peddler carries. Then scampering off he imparts his conviction to a dog friend. Then the two track the man, verify the facts, more dogs come up, they act in consort; bay and yels and hound the panie stricken man out of the It is so easy to construct your modern facts

in accordance with ancient legends. It really does not make so much matter as to the veri fication of the data of to-day, and so there is that story of Actsson torn to pieces by his own hounds which fable might be so dove tailed as to make the hunter the first dealer in dog-skins, and that would unset the legend that it was the vengeful Artemis who so made away with her presumptuous lover, Sweet Una, how prettily a nail-paring incident might have been assorted to her sfory! A rat, a beaver, a squirrel, as rodents, be come exceedingly uncomfortable when they have nothing to gnaw on. If they cannot use their gougelike teeth, these grow to abnormal lengths. Your canary-bird, with no chance to wear out his claws, would be very much obliged to you if you would occasionally pare off a mite of his horny toes. Una's particular lion, with elongated claws, ought to have been grateful if the young woman had clipped them. Feeling, as I do, kindly disposed toward Una, and wishing by no means to diminish the originality of the charming story, it might be well to remember that many of the larger animals are in debted to the weaker creatures for bodils

The African buffalo would lead an unhappy life if it were not for a kind of crow, who frees the huge animal of ticks, and more than that, stands guard over his four-footed friend and announces the coming of an enemy. It is not so long ago that a story of Father Herodotus was revived and credited, which tells of tray birds perching on the head and jaws of Nilotic crocodiles, relieving the huge saurians of leeches and parasites,

Suppose Una had clipped the lion's claws, how would she have managed it? What is a lion but a colossal cat, and if catnip delights a cat, might not something else pacify or mollify a lion? I do not mean to say that the late Rev. J. G. Wood, the naturalist, solved the Una mystery. I do not believe he did, but he told his son, the Rev. Theodore Wood, how he managed so as to get on a social footing with lions and tigers, or to be at least le bien venu, in menageries, where carnivores are at home. The naturalist was in the habit of making a ball of paper, sprinkling it with lavender-water, and throwing it to the animals. They "used to grow wild in their exuberant delight. They would grasp the ball with both forepaws, nold it close to their nostrils," and he concludes by saying that the animals always afterward remembered him, and seemed to expect more perfumed paper balls.

There is a very useful French book called The method of Verifying Dates. One which, alas! can never be written, ought to be entitled The Act of Verifying Facts. The veri-Scation, however, of the printed or rpoken amertion is simplicity itself. Try it. - Barnet Phillips, in Harper's Weekly. Life Savers Rewarded.

Jesse Howland and James McMahon received unusual honors at the hands of the United States government the other day. They were met at a New York hotel by a representa A F tive of the treas mry department, and in the presence of a number gold medal and a etter of honor

who but for them would have drowned in the surf at Normandie-by-the-Sea, N. J. one afternoon last summer. The rescue was effected with immense difficulty, and cilla Field, two aristocratic looking wom- case was made to the Washington authorities, who were so impressed by the gal lantry of Howland and McMahon that they ordered struck two gold medals instead of the customary silver testimonials

She Ran Away In a Dragoon's Dress. A young woman created a sensation in the Rue de la Galete, Paris, the other night by appearing in the uniform of an officer or dragoons. She went into a restaurant and ordered a dish of erayfish, but a wary policeman, who watched her movements, followed her as she was leaving the refreshment establishment and arrested her. In the meantime, the officer whose uniform the gay girl had donned dressed himself in muftl and went out to look for his missing female friend who had been helping him to keep his birthday. He found her in the police station, who ces she was only released this morning after having relinquished previously bee military habiliments and resumed her own

Do dogs hate butchers? This question was debated in an extended meaner a number of years ago in Nature, and the general consecsus of opinion was, to put it mildly, that there was want of confidence exhibited on the part of dogs in their intimacy with butchers in general. The sight of beef displayed on the seuter-hooks could, however, not have been distasteful to the dog. It must have been the man in charge of the ribs and briskets who

TRAITS OF ANIMALS-

In Harper's.

that way. It seemed as if his honor never would turn his head, but at last, after a delay of full ten minutes, reluctant fortune favored me, and I was bidden to go up and take a seat upon the beach. The trip-hammer effect of the blows tha caste has dealt English numanity always im. pressed me, and almost constantly confronted me. It was not many days after this that I met an able journalist, an editor, who said that for many years he had made it a rule to drop all other work in order to report Mr. Gladstone whenever he made a speech. congratulated him upon being so intimate as he must be with so great a man. "Intimate!" said be. "Why, I do not know him at all met him accidentally in a railway car last year, and was presented to him. He shook hand, but he does not remember me. At the time of that conversation the Hon. Chauncey M. Depew and a reporter were riding up town in New York together in a horse-car, and as it fell out that Mr. Depew (who had just arrived from England) had no

change, the reporter paid his fare. . But I really did go to the police court, and found it more interesting than the above intergressions gave reason to suspect, It was so interesting that after I had whispered my business, I asked if I might not stay up there until the last prisoner got his share of The two magistrates sat side by side at a desk high above everything else in the court-

room. The desk was enclosed on either side by glazed partitions containing doors, and behind it and the judges was the end wall of the room. The high platform on which their throne-like box was built had its own doors, for egress and ingress, in the side walls of the room. Immediately in front of the judges' bench sat "the clark"-as we would say, the clerk of the court—on a high stool behind a high desk like a pulpit. The clerk is as important in the law there as he is in politics here. He knows the criminal law, and is the only one except the criminals and their councellors who does. He gives the magistrates advice when they seek it, and often, when they fail to seek it, corrects them. In this court his curly black poll came a trifle above the edge of the magistrates' desk, just where a pen-wiper would be useful, and for all the world like one, because the rest of him could not be seen. On either side of the clerk's desk a tier of short

benches arose—one tier for reporters and one

The dock took up nearly all the middle o the room. It looked like a huge bird-cage with the door broken off. Its wires were of half-inch iron. They rose straight from the floor to the ceiling, and were boarded up in the back so that the people on the beaches for the public in the rear could not see the prisoner or be seen by him. Something like an old-fashioned cellar door, slanting from the cage toward the floor, projected from one end of the cage. It was the covered way by which the prisoner was brought up into the dock from the tunnel of masoury under the court, which led from the cells in another building. When the prisoner came up out of this covered way he found himself facing the magistrates, whom he saw through a square break in the cage wires, an aperture that just left him expo el from his head to his waist. A court official in police blue stood in the cage all the while, holding a sheet of paper on which were the names of all the prisoners, notes of the offences of which each was accused, and a record, or "pedigree," of the number of times each had been arrested before. -Julian Ralph, in Harper's Weekly.
