#### RUDYARD KIPLING.

138 King St. W., Toronto, Out.

From the Mail and Express, Aug. 9th, 1890, Rudyard Kipling, the author of a number of stories of Anglo-Indian life, has suddenly made his mark in literature. His success has been achieved at the same age as that which Byren had reached when the first two cantos of "Childe Harold" were published and their author's fame sermed to spring up, like the pa-lace in a fairy tale, in a single night—the are of M. As Byron afterwards described it. awoke one morning and found myself famous."
Radyard Kipling has had a similar experience. A year ago his name was unknown in Eng-land and the United States. To day he is besleged by publishers in both of these countries and in India, who are eager for what comes from his pen. His care r in literature has been a sh wt one, but it has been long enough to illustrate the versatility of his talent and to give him an enviable reputation as a writer. is works are read with delight, not only it England and this country, but by the Engli-b-speaking people throughout India, in which country the scenes of his stories and poems a c

LONG POINT, Nov. 2.—Government Detec tive Murray spent a couple of days here last week, having been instructed by the Attorney-General's Department to make injuiries regarding the alleged outrage comnitted by poachers on the grounds of the Long Point Shooting Club. Poachers steal n and shoot the deer, and only lately killed five, placing their heads on planacles as a sufficient notice to the club that they would shoot the deer whenever they wanted to Conchers have been arrested from time to time, but us the law at present stands all the company can do is to sue the poschers for the value of the deer slais. The poachers have built a house on a scow and anchor close to the company's preserves, and when any of the gamekeepers come in visw they put on heavy masks so that they cannot be recognized, and if they are followed they retreat to their scow. A few days ago the head gamekeeper, W. J. Ferris, pursued a number of the poschers and when he got close to them one of them struck him a heavy blow in the face with a paddle, knocking him out of his boat. On Monday last two officers the president o the club had brought from Toronto to assist the gamekeepers followed some of the peach ers and they, as usual, retreated to their scow. The Opinion of People on the Subject-It should Go Down it. Much discussion having been created over the subject of the Brook atreet drain now in progress, the Willia decided to find out. the pros and cors of the case, and a representative sought opinions of residents interested in the matter. The statements dif fered widely. Some householders did not care to express an opinion at all while others, in a careious way declared their atter disinterestedness in the matter. In fact so that only one man aboard that vessel was one citizen stated that "they might build

three is a row for all of him. Dr. Dupine much preferred a good stone train such as the old one, to a tile drain like they were building now. ' A stone drain was handler to make connections into. He considered the whole job a very foolish and extravagant outlay of money.

Mr. Deeks did not care to make any state ment. However the former drain did its work fairly satisfactorily. Once last spring a break had caused the water to back up in the cellar, but outside of that he had never had any trouble.

M. W. Sine, veterinary surgeon, thought the crain would be a good thing. There was no question as to its need at the lower part of the grade, which ends near Bagot street, but further up the street it might not be so necessary : as for himself there was water in his cellar all the year round caused by the old drain and cellar being on the same level. This defect would be remedied by the new drain. At the corner of Montreal street the smell, through the grating, was much complained of by passers by. On the whole the new drain would fill a long feit want.

Mr. Chance, barber, stated that he conidered the drain was decidedly necessary some people would like to have it very well objected to pay for it. He thought that it would do good and the action of the council should be commended.

Various men thought the drain should be run down Brock street to the water edge. A drain is greatly needed through the busi-

Slowly Rose and Strangled Him. On Wednesday, says the Cannington In dependent, Jershom Bull, pump maker, Manille, went down into the well at the old Skinner house, kept by Mr. John Moore, to make some repairs to the cribbing, when, by some means or other, part of the support gave way, letting in a quantity of quicksand, which rapidly encased the unfortunate man's logs. This, with the bucket, which also became filled with the material, evialarm was immediately raised, and one hundred willing hands were at once at work to assist in delivering the unfortunate man from his terrible position, but all efforts proved unavailing. After some hours the water began to rise, and at three o'clock death by drowning ended the scene. The Rev. Mr. Lloyd spoke cheering words to the imprisoned man, but his replies thereto were barely audible, he being about forty feet below the surface. This sad event has cast a gloom over the village and vicinity.

#### VANKOUGHNET ESTA'E.

Catharine McDonald's Heavy Claim For Acting as Nurse Allowed. CORNWALL, Oct. 31 .- The court of chan-

cery closed this evening. The only case of public interest was that of McDonald vs. Van Koughnet, in which the plaintiff, Catharine McDonald, sued to recover wages from the estate of the late Kate VanKoughnet, daughter of the late Ron. P. VanKoughnet, for services as nurse and servant to the lady and her deceased sister, Mrs. Allen, wife or Dr. Allen, of that town. The plaintiff claimed that the services rendered as nurse were particularly arduous, and in consideration thereof the deceased Kate VanKough net, who committed suicide by hanging a year ago to night, had agreed that she should be paid \$100 per day and \$200 per night for sitting up during the severe illness of her sister, and his lordship held there was sufficient corroboration of the plaintiff's contention to justify him in giving her judgment against the estate for \$25,250 and costs of action.

Lord Hartington Urges the Party to Define

an Irish Policy. EDINBURGH, Nov. 2.—A meeting of Liberal Unionists was held here yesterday, Lord Hartington delivered an address, in which he said that the results of the recent bye wisctions had shown the necessity for increased activity on the part of the Liberal Unionist associations, although it was a mistake to predict the issue of the next general election from the bye elections. He feared that unless the Liberal Unionists

presented their policy more clearly and showed greater activity and vigor the cause of union would be much endangered. The Trish policy of the Liberal Unionists had never been developed as a whole. Hitherto they had been compelled to present the case too much as a restoration of order in Ireland. The remedial side of the policy must clearly be placed before parliament and the country, thus giving the country a chance for its approval, accompanied by vigorous condemnation of the unscrupulous tactics of its opponents.

Lord Hartington devoted his evening speech to a general detence of the Government against Mr. Gladstone's criticisms. He said that coercion was freeing the Irish people | society. from league tyranny and had been more valuable than the widest local government. He would not accuse Dillon and O'Brien cowardice, but their action had thrown a strong light on the condition of affairs in Ireland. The league had nearly ruined once prosperous Tipperary. Only the Crime act had prevented such things from being repeated throughout the length and breadth of Ireland. The present government had perhaps made mistakes, but their work on the whole had been creditable. He was proud that they had the courage to face unpopularity. He would far rather bear reproaches for administering needfully severe laws than the responsibility which Mr. Gladstone incurred in excusing breaches and hatred of the law Mr. Courtney (Liberal-Unionist), Deputy Speaker of the House of Commons, had a mixed reception at a meeting of his electors this evening. He contended that a universal

scheme of land purchase for Ireland was unnecessary. A resolution expressing confidence in Mr. Courtney was rejected by a large majority. LONDON, Nov. 2 .- Mr. Gladstone's McKinley tariff speech at Dundee has had one re markable effect. It has reconverted The Times into an sulogist of Mr. Gladstone and a friend to America. It is not long since that journal said that after the passage of the McKinley tariff talk about kinship and friendship with America was out of date. Now the same authority says We are greatly mistaken if the American people as a whole are not pleasantly impressed by the perfect tone and temper of Mr. Gladstone's observations and by the

sincere and even enthusiastic nature of the feelings he entertains and which our entire nation shares with him for the great English-speaking republic across the Ats lantic." No doubt Mr. Gladsto e has friendly moods toward America; but the expression of them in his Dundee speech is sometimes peculiar. The Mo Kinley tariff is, whatever, its merits or defects, an American tariff, an act of American policy, adopted and approved by the majority of the American people. "I am not," says Mr. Gladstone, "about to bring railing accusations against the American people." Before he has finished the sentence he describes the policy of the American people as a policy of plunder and fraud. Later on he describes it as a monstrous injustice. Later still, he says: "The word pro-tection is a miserable misnomer. Call it oppression. Call it delusion. Call it fraud.

The main object, however, of this ingeni ous address is to convince England that the McKinley tariff will do her no harm. His argument is summed up in this fine sentence: Gentlemen: we do not deal with this country or with that country; we deal with mankind." The effect, he says, of this Act must be to raise prices in America, hence to diminish her power of exportation and hence to reduce her competition with England in the other markets of the world. If England is damnified in one of her twenty markets she gains in the other nineteen. "So," conround the world, it remains true that each country which gives greater stringency to protection within its own borders is thereby, though damaging us in its own market, giving us more command in every one of the other nineteen markets of the world." It would be a beautiful argument if the other nineteen' markets were not each one them, British colonies included

case, is true to his Free Trade faith. He denounces retaliation as suicidal, and clings with touching fidelity to his hope of a Free Trade millennium. Evidence averse to his own view, overwhelming though it may be, has not more effect on his mind in fiscal than in political matters. Yet all he now ventures on by way of prediction with reference to America is that a signal triumph may 'possibly" be reserved for his free-trading friends in the United States. His free-trading friends here think that but cold encouragement. Some English Free Traders go so far as to doubt the wisdom of all this ecturing of Americans. One remarks: "If an American were to call Mr. Glac tope's

comments /impertinent we could hardir ob-Mr. Balfour's visit to Ireland had a practical object. He went to see for himself what things looked liked in those districts where the danger of famine has been supposed to be greatest. It is a remarkable tour; remarkable for nothing more than for the friendliness of his reception by the very poorest classes of the Irish people in the most congested districts. Mr. Balfour takes, it is now seen, a practical view of those responsibilities with reference to the famine which he publicly accepted some weeks since. He had then every information from others.

He adds to it what can be seen with his own eyes. He went with practically no escort, or none capable of protecting him against any organised vioance. The result is yet to be seen; but Mr. Balfour said at Galway that he meant to push large railway schemes in Mayo, Done-gal, Cork, Kerry, and elsewhere. He will spend a million and a half in Galway. A line along western Ireland will be opened up by these railways. He returned to Dublin ways have a celebrity of his own as the

The O'Shen Divorce Case. Lonnon, Nov. 2-A straw that shows which way the wind is blowing is the reported resignation of Sir Henry James, Q.C. who held Captain O'Shea's brief in the pending divorce suit; on the ground of ill-bealth. This is generally considered as only an excuse on the part of the learned counsel, as it is known that he is quite able to prosecute the case should he so wish. The natural inference is that Sir Henry, on looking through the papers, has discovered facts that disincline him to have anything further to do with the matter. Mrs. O'Shea, her friends say, has become strongly determined to conduct her part of the approaching great divorce case

Death of Father Vincent-Killed by a Circular Saw. TORONTO, Nov. 3 .- Father Vincent, Vicar General of the archdiocese of Toronto, exprovincial of the Order of the Basilians, exsuperior of St. Michael's College, and for many years professor of theology and French within its walls, succumbed to his long struggle with death at 15 minutes to 5 on Saturday afternoon.

Father Vincent was in his 63d year and was a native of France. He studied theology and the classics in the Basilian colleges at Anonay and Aubinas in the land of his birth. He came to Toronto 38 years ago with Rev. Father Soulerin, the founder of St. Michael's College, being ordained priest of the order of St. Basil three years later. He first filled the office of treasurer, and 21 years ago was advanced to the more important one superior. He was made provincial of the order in 1805, holding it until the spring of the present year, when his feeble health com-

pelled his retirement. His only known sur-

viving relative is a sister, who is a nun in William Tobin, a recent arrival from Bracebridge, working in Shannon's shingle mill. Dufferin-street, met with a fearful fate on Saturday afternoon. He slipped in passing a circular saw, falling on it, almost cutting him in two. The unfortunate man

Throwing Two Children From a High Bridge One of the Victims Killed. BUFFALO, Nov. 2.—One of the most ter ible murders ever known in the history irie county was committed at Akron, 24 niles cast of this city last night. Sarah fcMuilen, aged 19, formerly of Buffalo, but who recently lived with Mrs. Patrick Brown, n Akron, enticed Delia Brown, aged 6, and Nellie May Connors, aged 10, on the Akron ement Works Narrow Gauge Railroad sidge, which spans Murder creek at a height of 65 feet. Suddenly she pushed the Brown child over the side of the bridge and then grabbed Neilie May Connors and hurled her ver into the abysa. Nellie was instantly tilled, but, fortunately, little Delia Brown lived to tell the tale. Her arms and legs are broken and she is terribly bruised, but will, it is believed, recover. Last night the people of Akron searched for the missing girls, and at about 2 o'clock this morning succeeded finding them. For several hours little Delia had lain on the stones at the side of the creek, unable to move. The murderess

afterwards attempted suicide but was rea-

DEATH HAS NO TERRORS FOR MUR-DERER BIRCHALL

low He Spends His Time in Jail.-A Fondness for Canned Peaches No Further Communication with Newspapers to be

TORONTO, Nov. 2 .- The latest theory in consection with the Benwell murder comes from Dr. Richardson, the well-known Professor of Anatomy in the University of Toronto and one of the witnesses for the defence in the Benwell murder trial. The Doctor said he find been going over all the evidence in the case very thoroughly and had come to the conclusion that Benwell had been stunned before he was shot. It will be remembered that the doctors who made the post-mortem testified at the inquest that they found the external gun shot wound but no other external bruise; however, when they opened the the wife of Mr. Haughwaut Howe, was to- skull at the top of the head they found on day at 12 o'clock made a widow. The cir- the inner side of the skull bones signs of a bruise and all the tissues below it torn. Such an internal wound without external appeaances could only have been made by a heavy tributed much of his weakness to worry blow with a stick or, still more likely, a sandbag, which gives such a wound. The Doctor is now convinced that Birchall first stunned Benwell and then shot him after he had fallen down. This theory, says Dr. Richardson, is the only one to account for the fact that the two bullets were put into the one hole. This would have been impossible if the victim had not been lying on his face on the ground, for if he had been walking and shot from behind ously. Toward evening, however, he grew he would certainly have immediately fallen forward and the second bullet would have ait in some other quarter. If this theory is correct it completely upsets the Colonel's story that he shot him as he was walking along, for no marksman

however expert could achieve the feat of putting two bullets into the same wound in walking or failing body. The wound on the inside of the skull, Dr. Richardson says, could not have been caused by the man's falling. It was the result of a tirect blow and must have had the effect of stunning Benwell,

HOW BIRCHALL SPENDS HIS TIME Jail Life of the Man Who Has But Two Weeks to Live.

WOODSTOCK, Nov. 2 - Birchail has now but 11 clear days to live unless the Government interferes, of which there is little probability. Until the order from the Attorney General that no further manuscript from the prisoner to a newspaper would be allowed his laily routine was as follows: He retires about 5 o'clock every mogn-

ing and sleeps until noon. Then he rises, dresses himself with great care, takes a turn circulation, drinks a glass of water and about o'clock eats his breakfast. The meal consists of oatmeal porridge, followed by sausages, canned salmon or chicken, potatoes and a cup of coffee. He then takes a few turns up and down the corridor, and reads the morning papers. Then his correspond ence is handed to him by Jailer Cameron, who first examines it to see that everything is all right. Birchall spends an hour or so over the correspondence, which is very voluminous, and has many a hearty laugh over the ravings of some cranks who are onstantly writing to him. At 6 o'clock he ines on beefsteak or pork-chop, omelet or poached eggs, with vegetables, tea and dessert d canned fruit, principally peaches, of which he is very fond. He then smokes another cigar hats with the guard and Turnkey Forbes until about 10 o'clock. Then he puts himself together and starts to work on his autobiography. He writes and sketches stead ly through the night until between 4 and 5 in the morning. He turns out from 10 to 13 pages of closely-written foolscap during this winter. ime. He writes slowly and with great care. He then retires and sleeps until the noon-day bells arouse him. Such is the manner in which be spends his time. He is in the best of health, sleeps well, and has a first-class appetite. He has no hope that his sentence will be commuted.

The Colonel Fake Again. Jackson, Mich., Nov. 2.—Several people here claim to recognize one James Graham as the "Colonel" who wrote the letter to Birchall, the Woodstock murderer. The "Colonel." or Graham, registered at the Hurd House Oct. 2 with his wife from To ronto, Ont. He only remained one night there and then went to a boarding house; where the couple remained some days They departed as quietly as they came. The Colonel" spoke in a decided English accent and was over-dressed. He was quite thick set and about 50 years old. New Yoak, Nov. 2.-The mystery of who was "The Colonel" in the Birchall case and what was his connection with the murder of Benwell was yesterday cleared up by your correspondent, who had a long talk with Col. J. E. Lewis of No. 11 Wall-street. He

knows Birchall, but has hitherto kept his name out of the affair. Col. Lewis has an office at No. 11 Wallstreet. He is engaged in building waterworks and similar undertakings. He employs British capital, and his business takes him to England from time to time. It was upon one of these trips that he met Birchall. But from a desire to avoid publicity he would have exploded the latter's theory long ago. When a reporter met "the Colonel" yesterday he said: "I want to put a stop to all this mystery once for all. I went to Europe with my family in the Lahn and arrived in London on the 1st of January of this year, and went Moriev's Hotel in Trafalgar square, where stopped until the 27th of January. Birchall where we had a conversation. He impressed me as a devil-may-care sort of a man about town. He told me casually that he had been in Canada. I found that he was a son-inlaw of Traffic Manager Stephenson of the London & Northwestern Railway, and met his wife. Stephenson's daughter. She impressed me as a refined and cultivated Engishwoman, but seemed to be worried and anxious about something.

"How about the baggage Birchall left with 'It was hardly deserving the name of baggage," said Col. Lewis, "as it was only a small hand satchel which he had left in my room, saving he would send for it. I turned it over to the proprietor of the hotel. know nothing about him further than any casual acquaintance of a week might know. never saw him before or since, and am very much annoyed by the way he has been using my name. That letter from Jackson, Mich. signed 'the Colonel,' is evidently intended to mystify the case. Birchall probably wrote it and smuggled it out of the jail. There was never any talk between Birchall and myself about mutual business interests in any

The Allegheny Plum. Many years ago, during a visit to the late I.
