Can forestry be profitably practised?

the first science which must be known A large picture of the queen, adorning by the forester is botany. The forester therefore a knowledge of soil and temthat was a question which could hardly Adirondacks on which they were trying to demonstrate whether or not forestry was profitable.

Dr. Fletcher pointed out the difference

Fletcher hoped that the knowledge on forestry in Canada would first emanate from Queen's. What made Canada was its lumber, and yet an awful waste was going on. Forestry to Canada is a busito deal with. In his opinion there should be a school established.

Principal Grant held that what was now wanted was a definite and contin uous action towards professional forestry. What we want is a man imbued ernment can be expected to take action regarding the establishment of a school until the people have been interested in the matter. Forestry would be fully

of the Rathbun company, and Prof. Dyd. The latter advocated a series of lectures on forestry at Queen's next session. In these, superintendent Stewart, of Canadian forests, might assist.
