They may, at the option of the holder, be exchanged for Common shares. They are subject to be called in by the Company at \$115 per share and accrued dividends.

> THE CANADIAN BANK OF COMMERCE. THE BANK OF MONTREAL

AND THE ROYAL BANK OF CANADA. Are authorized to receive subscriptions for 30,000 shares of \$100 each, of the 7 p.c. Preferred Stock of THE DOMINION IRON AND STEEL CO., LTD., at \$85 and accrued dividend for each \$100 share, payable as follows:-

The total issue of Preferred Stock will be \$5,000,000 or 50,000 shares, of which 30,000 shares are now offered.

\$20 per share on allotment, 15th April, 1901,

and the balance, with the amount due for accrued dividends on 15th June, 1901.

The whole of the instalments remaining unpaid at any time may be prepaid in full. Applications will be received by the Branches and Agencies of the above Banks in the Maritime Provinces, and the Provinces of Quebec, Ontario and Manitoba, from any of which Forms of Application and copies of the Prospectus may be obtained.

Notice of allotment will be sent through the office of the Bank at which the application is received, and payment may be made there. It is intended to apply to the Stock Exchanges in Montreal and Toronto for the listing of the Stock and Bonds of the

Company. Montreal, 4th March, 1901.

GOVERNMENT BOUNTY.

If the production from the Company's works be as estimated, 300,000 tons of Pig Metal and 60,000 tons of Steel Blooms in 1891, and therea 400,000 tons of Iron and Steel per annum, made from foreign (Newfoundland) ore, the bountles to be received from the Canadian Government be as follows:-

1904..... 1905 1,000,00

CAPITALIZATION. The Bonds, as well as the Common Stock, have been issued and paid for; with the money thus obtained, and the proceeds of the Preferred the cost of organization, construction of the works, and the purchase of mining properties will be entirely defrayed, and about one million remain for working capital.

The Bond issue, \$8,000,000, is secured by a mortgage to the National Trust Company, Limited, covering all the property of the Company. The General Manager, Mr. A. J. Moxham, has written as follows:-

Sydney, C.B., let March, 1901. Mr. H. M. WHIPNEY, Dear Sir, I am glad to advise you that No. 1 furnace is in successful operation, and we have been able to measure results by accomplished in

Whatever doubt may have existed as to the manufacturing possibilities at Sydney are now removed. Speaking in detail: 1st. Iron Ore—The developments at Bell Island, both by the drilling done and by headings put in, have demonstrated the certainty of the The ore under cover is of better quality than we had counted on as standard. It exists in a bed of full depth—lew in silica and high in iron. Notwin the fact that we mined last year only about 120,000 tons, and that we unloaded this by hand instead of by machinery, and that we charged of tonnage the expense of a long strike at Bell Island, the cost of the ore delivered at our dock, f.o.b. steamer, was only \$1.62 a ton. Our estimate is h the figure of \$1.25. This result shows our estimate to be a safe one. The ore, as anticipated, works kindly in the furnisce, and guarantees to us a large

2nd. Lime Stone-We have two supplies-Georges River and Marble Mountain. We are operating at present with the Georges River stone cost of 60 cents a ton, which is within our estimate. The unusual purity of our flux has enabled us to control both the silics and the sulphur in our pig me to an unusua! degree, and with the use of a minimum amount of flux. We have in our very pure flux an asset of great value. Coal-We are operating our bi product ovens with unwashed coal, nevertheless the coke manufactured wash it—our pure flux, as stated, renders this no disadvantage to us. We have demonstrated that the question of washing is not a necessity, but purely as economic question. The coke from washed coal will be fully equal to the celebrated Connelisville standard—the sulphur will be no higher, the ash lower and carbon higher.

Labor The plant is constructed with every modern labor-saving device, and, after that interval of time necessary to get every new plant well organized in its labor department, our cost sheet will challenge comparison with that of any steel plant elsewhere. 5th. Cost of Production-I am confirmed in my opinion, hitherto expressed, that after crediting the value of the bi-products from the coke over the cost of our pig iron should not exceed \$5.50 per ton after everything has been raduced to steady practice. The quality is all that could be desired. In conclusion, we are safe in counting upon a reasonable profit from the start and a mandsome increase in the same as the product reaches maximum.
