Walkem's Opinion on the Educational System.

In speaking of the educational paper read by Prof. Watson, Dr. R. T. Walkem, K.C., said: "The present system of education is confessedly a feriture. The results are distinctly seen in the shortcomings of the pupils who ! come even from the most advanced Chicago, March 28. "There were sev- schools. Whatever knowledge they

> dated. The only sound foundation on ough knowledge of elementary sub jects, and amongst these I would include particularly Latin; if Greek. No person can pretend to be a good English scholar unless he has a good knowledge of Latin, which misdescribed as a dead language. being, in fact, one of the most live languages we have. The nice distinction between English words depends so much upon their origin, that we must refer to that origin for their full meaning.

"The old system of education, when a person was thoroughly taught his Latin and English grammar, and when grammars were simply and comparatively easy to be understood, has produced far better results than the modern system. I took up a modern English grammar the other day, and was unable to understand it. It was written in such a manner, and con
