UNDER YOUR FOOT.

WOLE leather, or apology-which? -Can you tell from appearances? well,-smart,-stylish!

But how about vitality—flexibility—shape retention-continued satisfaction? Is the sole of tough, close textured, long

fibred leather, which holds the stitches like wax, repels water, bends like buckskin, and wears to the thinness of a wafer without breaking?

Or-is it short grained as linoleum, brittle and stiff like cardboard, without cling to the stitches, and with a chronic thirst for water, like blotting paper?

How do you know which kind of sole leather is in the shoe,

How can you hold the Manufacturer responsible for it—or for value, -- if the Dealer, not he, regulates the price?

There are shoes made to sell merely, and shoes made to wear. The Slater Shoe Makers dare not rob the covered up sole of The Slater Shoe, to give an extra selling effect to the visible shoe upper, because their brand, and price, pledges certain fixed values, from which there is no hedging.

The limit of the Makers' direct responsibility is clearly stated --viz:--their own prices, \$3.50 and \$5.00-stamped on the soles by themselves.

Every pair Goodycar Welted, and the trade mark is a slate frame.
