army with a means of receiving and conveying intelligence and orders under varying circumstances as it fulfils the most important conditions, and for that reason I lay particular stress on it. Never has greater use been made of this system than during the war in South Africa, and quote some remarks of our brigadiergeneral Smith-Dorrien, whose opinion all military men are bound to respect, in order to impress on you the value of the art of signalling. My first experience with the brigadier was on the march from Graspan to Paardeberg. I was attached to his staff on one particular day in charge of signallers, when two of our company under Lieut.-Col. Buchan were ordered to search some kopjes on the left bank where the enemy were reported to be. The general at once asked me, 'Are there signallers with those companies?' I replied, 'Yes sir.' Heart trouble, at least among the Ameri- Poo', digestion also poisons the black umn, either on the move or on the digestion halt, signallers should always accompany them in order that instant com- one case in a hundred of heart trouble is munication may be established.
