The Probabilities

Rheumatism and Cout.

Eminent physicians, who have given special study to these diseases, state that rheumatism and gout are really a toxemia or poisoning resulting from the decomposition of food stuffs in a dilated or prolapsed stomach. This condition induces the formation of uric acid, which is absorbed into the blood. This decomposition is caused by impaired digestion. Until normal digestion is restored, quantities of this acid continue to be produced until the system becomes satura. ted with it.

Abbey's Effervescent Salt corrects the tendency to acid formation in the alimentary canal, stimulates the natural activity of the digestive organs, restores normal nutrition. and thus rids the system of rheumatism and gout, and prevents its return.

The dose for Rheumatism and Gout is a teaspoonful of the Salt in half a tumbler of water night and morning until a free action of the bowels is produced.

FOR SALE BY ALL DRUGGISTS. Price, 60 cts. per large bottle. Trial size, 25 cts.
