## PROSPECTUS

The Canadian Portland Cemeat Company has been formed for the purpose of acquiring the cement business carried on by the Rathbun Company at Napance Mills and at Marlbank in the Province of Ontario; the business of the Beaver Portland Cement Company at Marlbank and the business of Slack and children spent Sunday with the St. Lawrence Portland Cement Company at Montreal, in the Province of Quebec.

The assets are to be turned over to the new Company free of all encumbrance and comprise the following :

Factories-The Factory of the Rathbun Company at Napanee Mills, with ample factory site and clay lands, and with all buildings, plantetc., in full running order, HAVING A CAPACITY OF 825 BARRELS OF COMPLETED CEMENT PER DAY.

The factory of the Beaver Portland Cement Company at Marlbank, controlled by Messrs. James Dobson and Chas. J. Webb, of Philadelphia, with all lands, buildings and plant used in connection therewith, HAVING A CAPACITY OF AT LEAST 500 BARRELS OF COMPLETED CEMENT

The leasehold factory and premises of the St. Lawrence Portland Cement Company of Montreal used in the Manufacture of Silica Coment.

Mari Properties-The Marl deposits at Marlbank with dredges, plant and appurtenances connected therewith, and owned and used by the Beaver Portland Cement Company and the Rathbun Company in connection with their cement business, containing altogether about 820

The Report of Mr. M. J. Butler. C.E., shows that the supply of Marl upon these properties is practically inexhaustible, the survey showing 19,-835,773 oubic yards of Marl, sufficient to produce at least 69,425,000 barrels of Portland cement. Supplies, cement manufederate memorial day and it has been factured or in process of manufacture, or cash, to the amount of \$50,000.

> Stock - Trade Marks - Patent Rights - The "Star" brand and other brands and trade marks of the Rathbur Company and the Beaver Company, the Silica Cement Patent Rights for the Dominion of Canada owned by the Rathbun Company and the good will and business, including all the trade marks and rights of all the Companies above named. Silica Cement is manufactured from Portland Cement and sand, by a patented process exclusively controlled by this Company for the Dominion of Canada, under the patent rights above referred to. This product has been most favorably received by consumers, and forms a growing and profitabe trade. The above mentioned trade marks and brands have taken a long time and great expense to establish, and are an asset of great value.

> THE WHOLE OUT-PUT OF THE NEW COMPANY WILL BE MANUFACTURED FROM THE SAME MATERIAL AND UNDER THE SAME MANAGEMENT AND STAFF AND SOLD UNDER THESE BRANDS.

## MARKET.

The Cement business of the Rathbun Company has been established for a number of years, and the "Star" brand of Portland Cement and the "Citadel" and other brands of Silica Cement have been thoroughly established as first class, being accepted by the GOVERNMENT OF THE DOMINION OF CANADA, BY THE GRAND TRUNK RAILWAY COMPANY, THE CANADIAN PACIFIC RAILWAY COMPANY, THE INTERCOLONIAL RAILWAY COMPANY BY THE CITIES OF MONTREAL AND TORONTO, and by other steam and electric railway and municipalities throughout the

Prior to the incorporation of this Company the Rathbun Company HAD CONTRACTED FOR THE SALE OF THEIR WHOLE OUTPUT FOR THE YEAR 1900, and no difficulty is anticipated in disposing of the entire product of the new Company in view of the extent and character of the demand for the brands of cement of which that product will consist. The confidence of the railways, municipalities and the principal purchasers of cement throughout the country in the brands of this company having been gained, not only as a result of scientific tests, but by years of actual use, such coment has become a staple article of commerce, the demand for which has increased each year and is certain to increase in even greater proportion in the future. No imporgoat, wandering around the streets tant engineering or architectural work can be undertaken without the use of cement. Every steam and electric railway annually uses large quantities in the in the eastern portion of the city, is an | construction and maintenance of its works. It is used to an increasing extent in replacing masonry, being much more easily moulded to the required form. annovance to some residents who have The foundation of every permament pavement laid upon the streets of our cities is constructed with it, and not only in the larger cities, but also in the nice boulevards. Nanny and Billy may smaller towns and villages throughout the country it is gradually displacing wood in the construction of sidewalks.

## RAILWAY FACILITIES.

The marl beds, clay banks and works of this Company are situate directly on the line of the Bay of Quinte Railway, midway between junctions with the Canadian Pacific Railway at Tweed and with the Grand Trunk Railway at Napanee. This affords to the output of this Company competing lines for railway freight, while access to water communication is obtained at Deseronto and Kingston over the Bay of Quinte Railway. The location of their works will enable the Company to manufacture the larger portion of their output without railway transport of either clay or marl and to load the finished cement direct from the works upon the railway cars.

## PROFITS.

The Toronto General Trusts Corporation have made a special audit of the cement business of the Rathbun Company at Napanee Mills for the year ending 31st December, 1899, and their certificate shows a NET PROFIT OF \$84.682 90.

THIS RESULT WAS ATTAINED WITH A PLANT PRODUCING AN AVERAGE of 325 BARRELS of COMPLETED CEMENT PER DAY. The plant and equipment of the Beaver Company are only now being completed, but that Company undertakes to deliver to the new Company by 1st June their plant and equipment, completed in every respect, and of the most modern design, capable of preducing 500 barrels of completed cement per day. It will be seen by the above that the profits from the business of the Rathbun Company alone were largely in excess of the amount required for payment of the dividend on the Preference Stock of the new Company, and it may reasonably be expected that the earnings of the combined Companies will

be such as to enable the new Company to pay the additional 1 per cent, dividend on this stock. It is also anticipated that by the consolidation of interests the cost of production and sale will be considerably reduced. As has been already pointed out, the Company do not anticipate any difficulty in disposing of their entire output, and in this connection it may be

mentioned that last year the Rathbun Company, found it necessary to buy a considerable amount of imported cement which was used in the manufacture of Silica Cement, their own factory not being able to supply the demand in sufficient quantity. Dividends-The Preference Stock is entitled to a first cumulative dividend of 7, per cent. per annum, payable half-yearly, and after the

Common stock has received a like dividend shall be entitled to share with the Common Stock in any surplus profits up to, but not exceeding a further 1 per cent. upon the Preference Stock.

Reserve Fund... The By laws of the Company provide that after payment of the 7 per cent. dividend upon the Preference Stock. and before any dividend shall be declared and paid upon the Common Stock, the Company shall set apart out of any profits earned, as undivided profits, If you are run down, feel without an annual sum of not less than \$15,000, and not more than \$25,000, until a Reserve Fund of \$150,000 has been accomulated, which fand is to be used by scores and hundreds of prominent busi- J. J. Edgar left on Saturday for energy, lifeless, useless, fretful and de the Company also provide for the election of two Directors by the Preferences ness and professional men. One box will Rochester, N. Y. W. A. Daly, now of spondent, one or two bottles of Paine's Stockholders, to represent them on the Board.

Faudit ... The Toronto General Trusts Corporation have undertaken the yearly audit of the Company's affairs, and will certify that the proper amount has been set aside for the Reserve Fund, as provided by the By-laws, before dividends are declared on the Common Stock. They will also act as Transfer Agents of the Company and will countersign all certificates of stock.

Disposal of Preference Stock... Of the total amonut of \$450,000 Preference Stock, \$200,000 has already been taken at par by Directors and others interested in the Company, \$50,000 remain in the Tressury, and the balance of \$200,000 is now offered for sale AT PAR BY MESSRS. OSLER & HAMMOND, 18 KING ST. WEST, TORONTO, the right being reserved by them to necept the off rs of applicants for the whole A deposit of 10 per cent, is payable on application, and the balance on allotment, which will be made not later than the 5th of or any proportion of the amounts applied for.

June, prox. It no allotment is made, deposit will be returned, and if a partial allotment is made the surplus deposit will be applied towards the amount payable on allotment. In making allotments regard will be had to the order in which applications for stock are received. Application will be made in due course to have the Preference Stock listed on the Toronto Stock Exchange. Report of the Auditor of the Toronto General Trusts Corporation on the cement business of the Rathbun Company, and report of

physician's prescription that gives new Mr. M. J. Butler, C.E., on the Marl properties, may be seen at the office of the undersigned, where forms of application, together with ation the piles, It is the only prepar. A splendid portrait of the Wellington life, vigor and strength when all other copies of Prospectus, may also be obtained. OSLER & HAMMOND.
