Her plea is that although I he policies were in the priest's name, all he is entitled to is the amount he idvanced for payment of the policies. In the other hand, he claims that this imount, some \$20,000, was a bonafide investment, and that the policy was I taken on Cromar's life at Cromar's own suggestion, and because he got the com-

BIRDS.

Professor Forbes, the state entomologist of Illinois, has estimated that with out the assistance of birds the state of Illinois would be carpeted with insects, one to each square inch of ground, at the nd of 12 years.

Many birds form their sounds without pening their bills. The pigeon is a well snown instance of this. Its cooing can e distinctly heard, although it does not pen its bill. The call is formed internally in the throat and chest and is only

endered audible by resonance. A French naturalist quoted by Popular Science News asserts that "if the world should become birdless man could not inhabit it after nine years' time, in pite of all the sprays and poisons that could be manufactured for the destruction of insects. The bugs and slugs would simply est up all the orchards | and crops in that time."
