THE GREAT STEAMSHIP LINES. teresting phenomenon, says the At- German Lines Are Largest And Japanese

Ninth In Tonnage. An official German return shows how the German steamship companies have been growing in recent years. The fact that government subsidies have contributed toward this result does not lessen the significance of the figures. The Hamburg-American line has a greater tonnage than any other company in the world, the total measurement of its sixty-nine vessels being 286,-945 tons gross. The English Peninsular-Oriental company has second place with sixty vessels of 283,140 tons, so that the average size of each vessel! is larger. Sixty-seven vessels, representing a gross tonnage of 256,613 tons, place the North German Lloyd line third on the list, but this total, notwithstanding the big subsidies received. is only 4,200 tons over the aggregate credited to the British India company of Glasgow, with ninety-seven vessels vitality is greatly increased; her of 2521,429 tons. Coming next is the French Messageries Maritime, another line strongly nurtured with government rotes, the number of its ships being sixty-three, and the gross tonnage 229,837 tons. These five are the only companies whose total exceeds 200,000

The next is the Italian general navigation company with ninety-six vessels of 171,041 tons, followed by the French trans-Atlantic line with sixty-four vessels of 166,701 fons, and then the Jap-anese Nippon Yusen, which is repre-sented as having sixty-eight vessels of 161,698 tons, built or under construction. The Wilson line, of Hull, Engthird on the British list, with eightytwo vessels of 159,793 tons, the Austrian Lloyd-coming next in order with moventy-two vessels of 146,560 tons, and the Spanish trans-Atlantic company thirty-six vessels of 121,161 tons. Then Mollow the Pacific company, the Cunard and the White Star, all of Liverpool, England.
