ters to mourn his loss.

"Opifer per Orbens Dicor."

If Montreal is to be a modern port it must be well equipped with elevators, cold storage depots, etc. Buffalo has fifty two elevators; Montreal has a few of old type on Lachine canal. To handle grain, for instance, quick dispatch is needed. As it is now the barges going from Kingston are detained so that shipments can be made from them to ocean vessels. This should not be. Expeditious handling at Montreal would make the St. Lawrence route a favorite. Get a hustle on Montreal !

WHY THEY FEAR ALLIANCE. Harper's Weekly, in a thoughtful article upon the proposed Anglo-American alliance, points out why the autocratic rulers of the European continental nations are so violently opposed to a united Anglo-Saxon race. Says our contemporary :

"The governments of the czar and of the kaiser, of the emperor of Austria and of the king of Italy, are against England and the English and American theory of govern. ment, and are endeavoring to destroy some of its richest fruitages, or at least to prevent the establishment of other governments based on it, by the laws of and institutions of an old world, an old time, and of old theories of government that ought not to live, if England and America have not made a mistake in the establishment of democracy. The enemies of the rights of the individual are contemplating war on democracy, and while the animating spirit of this united hostility to England and this country is jealousy of the commercial prosperity of both, that cannot be checked or destroyed without assailing the political principle on which the Amerian and English people have thrived. Moreover, the hostility of the young leaders of the union, who are survivals of a past, overgrown and weakened products of a day that has gone by, are mov. ed by hatred and fear of free government by free people. Their enmity is directed in reality against the danger to them and their thrones foreseen in the expansion of English and American influences. But they will not attack our united race. They will not risk a conflict with all the forces at the command of the highest civilization of the century. On our part we do not desire expansion. If we are wise, we will decline to enter into a movement every part of the globe. But if we make preventive alliance with Great Britain, we join her in saying that Anglo-American institutions shall be defended by all who live under them wherever they are attacked; such an alliance will do a thousand times more for the peace of the world than all the guns and navies that the kaiser and the czar can heap upon one another. Certainly the drawing together of the kindred peoples is the happiest incident amid the present almost universal ominous growlings of war, and it is clearly time to consider seriously and sympathetically the proposal to take advantage of the opportunity, with the object of still more closely knitting to gether all the peoples whose tongue is

"Bystander" gives his opinion that the majority deemed sufficient to warrant prohibitory legislation must be "a majority both of the whole electorate of the dominion and of the whole electorate of each province. Nothing less, apparently, will suffice to secure the practical execution of a law against which not only the tastes and interests, but the moral conviction, be zens, and their sense of justice will cer. beside his bier. tainly continue to rebel."

GIVING SOUND ADVICE.

A prominent Scotch cheese importer, Andrew Clement, of Glasgow, Scotland, has been visiting Quebec. At Cowansville he addressed the dairymen and gave them some very valuable advice.

He had been asked, he said, why the price in Scotland as Scotch cheese or as cheese from ether countries. It was because the quality was not the same. "The people of the old country," he remarked, "don't care where a thing comes from if it suits them and is what they want." The need of the hour was more uniformity in cheese. How was it to be obtained The factories were larger in Scotland and the product large and presumably of the same divour and quality. It would be hard to secure uniformity with the product of small factories, but it should be aimed at. Here is a question for manufacturers of a district to consider. They should confer, should experiment, should cooperate to the end that the whole output of their factories would be, as nearly as possible, of equal color, weight and flavor. | Brockville Times. In this way, by a perfect, harmonious and equitable arrangement, the cheesemen other. They are injuring each other by cross purposes, by unfriendly rivalry, and no lesson Mr. Clement teaches is more em-

phatic than this. But another point noticed in this address of Mr. Clement's. He said the milk of Canada was far richer than the milk of Scotland, and, properly handled, by greater cleanliness and care, (to which he several times referred) it ought to give the very best butter and cheese. Canadian cheese had surpassed the American cheese and was in great demand, but it can be made better, can be given a stand and

Canadian butter, said Mr. Clement, had almost loss its place on the English market three years ago and had been driven out partly by Australian butter, although Canada had an advantage over Australia in being four or five weeks nearer to the TORONTO, June 3. - Hon. Thomas English market. Canada should supply Greenway, premier of Manitoba, who is in | England with twenty-five per cent. of her butter instead of with two or three per cent. as at present. The Danes take only the hard cash in payment for their butter and the English people would prefer to bay from the Canadians who bought in return English manufactures if they could get the quality they require. There was great room for development in our butter industry—greater than in cheese.

The secret of success lies not only in a superior article, but in an article handsomely done up. The butter going into

England now from other countries is put THE DAILY WHIG. up in neat and attractive packages. There is taste and cost in this service, but it pays. That is the testimony of everyone who has gave the subject his study.

> In dwelling on the work of the commission to settle rife questions between Canada and the United States the Chicago Inter-Ocean remarks :

"It is fortunate that this commission will begin its work at a time when there is more than ever before a sympathy between the people of the two countries. Canada has openly espoused the cause of the United States in a war with Spain. The Canadian government has shown its good feeling by acting against Spanish agents eeking to use Canadian territory as a base for their operations. The present conditions are favorable to concession on both sides, and there never has been a time when the controversies could be settled more equitably."

EDITORIAL PARAGRAPHS. The "wah" has cost the United States only \$312,000,000 so far. But who counts money in a battle on behalf of humanity. Not the "yellow fellows" of the states,

The Mail and Empire says "the country can well afford \$1,000 to assist Dr. Kingsford in historial researches," that "the dominion should be willing to pay something for the great history of it he has written." The volumes are in the public echool library.

Admiral Cervera, commanding the Spanish floet at Santiago de Cuba, was a naval attache of the Spanish legation in Washington about fifteen years ago, where he was a close student of naval affairs and recognized as a capable man. He has a personal acquaintance with some of the men of the fleet which is now trying to capture

The marchioness of Dufferin and Ava has just issued her report for last year of the united kingdom branch of the work done by the great fund bearing her own name for supplying medical aid to women in India. It states that in the twelve menths under review no less than 1,327,000 wo men received attention either in hospitale or their own homes from female doctors. There are now 103 hospitals and dispen-

The Brantford Expositor says that Si Charles Tupper is a man of exceptional physical energy and intellectual power but his weakness as a political leader "lies in his utter want of tact, and still more in his utter want of high political ideals. He has nothing to work for in the way of political realization, and all his energies are devoted to gaining mere vulgar successes while his methods are of the rough shod, vituperative order."

If the Laurier government should introduce and the house of commons should pass an insolvency law satisfactory to the masses and the Canadian people the senate would probably throw out the measure at

right sort of a battle cry for a war upon the senate.

an insolvency law is the desire of the chartered banks to get two or three chances at the creditors of state for every one chance that the ordinary creditor gets. It is unfair to the other creditors that the banks should get these advantages as a matter of practice, but the condition of these creditors would not be improved by the passage of an act which would give the banks such advantages as a matter of law.

If the Laurier government has the ability and courage to frame an incolvency law which will really meet the needs of the country, the senate would probably rally its forces to defend the privileges of the banks. The government could then go to the country demanding the condemnation of the house which had interfered with a beneficent plan for the relief of the great multitude of distressed
