ducts to Great Britain, the list having been furnished him through the board. Some time ago the Electrical Construction company, of London, (limited), wrote asking what inducements Kingston would offer for the establishment of an electrical works in the city. The board answered asking the company to advance proposttions, and last evening a reply was read stating that the company was not prepared to make any proposition, so the matter drops. The communications from the minister of railways and canals, and from secretary Jones of the same department

in regard to the government's refueal to grant the request for the closing the canals on Sundays, only between the hours of 5 a.m. and 9p m., were read. The secretary was instructed to write the boards of trade in Montreal and Toronto and seek augmentation to a deputation, which will wait on the government and press for the granting of the request.

In pursuance of a resolution passed at the annual meeting of the board, the following committees were appointed : Wholesale trade-R. J. Carson, chair-

man; J. Minnes, W. G. Craig, W. B. Dalton, J. M. Shaw, M. S. Sutherland, B. W. Robertson, G. Richardson, W. J. Cro-

> A petition from the grain buyers and merchants of the city to be presented to the governor-in-council was laid before the council. The petition eeeks for the extension of the Ottawa grain inspecting districh, which now has a western limit in the K. & P. railway track, westward to include the counties of Lennox, Addington, Prince Edward, with the islands and ports on the bay of Quinte; and that W.J. McNeil, of this city, now inspector for the Ottawa district, be appointed inspector over the larger territory. An inspector has been appointed at Port Hope and, it is learned, Kingston and this district is to come under his juriediction. As the importance of the trade ships. here calls for a resident inspector, the petitioners are seeking a re-arrangement of the districts. The petition was endorsed by the council.

Clubs In Boston.

He who invades the social or club life of Boston will find much to surprise. Clubs rule with an ever increasing power. No city in the United States possesses sr many clubs of all shades, from the exclusively society to the exclusively crank. would be difficult to mention a cult that is not represented. Hundreds of Boston people make going to the club the sele occupation of their lives. Their days are of three stages-morning clubs, afternoon clubs and evening clubs, with occasional all night clubs. At these club meets enormous quantities of tea are drunk. Tea and Browning are Boston beverages. is said the tea habit is becoming alarmingly productive of various physical and mental ills. Many physicians have scores of women patients who are suffering from some form of nervous disease as a result of excessive tea drinking. At these club organizations the topics that engage twothirds of the time are occultism and Browning. Boston is determined to solve Browning if it takes 100 years.-New York Sun.
