Thus Don Emmanuel, prince of Ruspoli, deputy in the Italian parliament and mayor of the city of Rome, is married to Miss Josephine Mary Curtis, daughter of Joseph B. Curtis of Boston, while Prince Alexander Ruspoll has as his wife a daughter of Thomas Capel Broadwood of New York. The branch of the house to which Prince Alexander belongs holds the hereditary dignity of grand chamberlain to his holiness the pope.

Besides the two Princesses Ruspoli above mentioned and who reside at Rome there are two others who may likewise be described as Americans-namely, the wife of Prince Paolo Ruspoli, who was the widow of Joseph K. Riggs of Washington, and Princess Marie Ruspell, wife of the former secretary of the Italian embassy at Washington and daughter of the divorced We will mail on application, free in-information how to grow hair upon a baid head, stop falling hair and re-move scalp diseases. Address, Altenheim Hedical Dispensary, Boom 85 Selves Building, Cincinnati, O. Marquiso de Talleyrand, nee Bessie Curtis of Boston.

To Miss Consuleo Vanderbilt belongs the double distinction of being an English duchess and a princess of the holy Roman empire, the latter title having been conferred upon the first Duke of Marlborough by the Austrian emperor of the day as a recognition of his victories over the French. The title is that of Princess Mindelheim, and the coat of arms of the Marlborough family will be found surmounted not only by the strawberry leaved ducal coronet of Great Britain, but also

by the princely crown of Austria. Miss Winneretta Singer may be describ ed as twice a princess. Her first husband was the Prince de Scey-Montbellard, from whom she managed to secure a divorce, and she is now the wife of Prince Edmund de Polignac, so widely known in France for his musical compositions. The wealth of the princess comes to her by inheritance from her father, the great sewing machine manufacturer.

Two American girls boar the title o Princess Poniatowski, not altogether justly so, since their husbands, although they bear the historic name of Poniatowski, are not Polish Princes Poniatowski, but mere Italian Princes of Monte Rotundo. One of the Princesses Poniatowski is Catharine, daughter of Ell Goddard of New York, and the other was a Miss Bertha Sperry, likewise of this city.

Nor should the name of Princess Hats feldt be omitted from the list. She is the daughter of Mr. Collis P. Huntington, the California railroad magnate, and married Prince Francis Hatzfeldt, head of the senfor branch of the very illustrious house of that name. The Hatzfeldts hold high rank at the German court, the chief of the house being grand cupbearer of the realm, and they are connected by marriage with nearly all the great houses of the German,

French and Austrian aristocracy. The daughter of Thomas Davis of New York bears the title of princess and duchass of Lante Monfeltrio della Rovere and of duchess of San Croce. Her husband is likewise a Spanish grandee of the first class and owns a beautiful place near VI terbe, in Italy. The princess was a great heiress and owns large pieces of property

on Nassau, Pine, Broad and other down town streets of New York. The list may be completed with th name of the Duchess de Dino, princess de Talleyrand-Perigord, who is the divorced wife of Frederick Livingston of New York. She was married in 1887 to Maurice de Talleyrand-Perigord, due de Dino, like herself a divorcee, his first wife having been Miss Bessie Curtis of Boston: by that of Princess Yturbide, daughter of J. NEW YORK'S FIRE FIGHTERS. Ine Particular In Which They Differ From

Ine

All Other Firemen. "New York firemen," said Battalion Chief Burns of the fire department, "fight fires in a different way from the firemen of any other city in the country, and don't know but the world. They fight almost exclusively on the inside. The method in all other cities is to fight from the outside, except when the fires are insignificant. You will notice here that the first thing the firemen do when they reach the scene of a fire is to take the end of their hose and dash into the burning building. They don't lose an instant's time, and they do this no matter how great the fire is or what the danger may appear to be. If the fire is in the basement, they get there if they can. If it is on the top floor, they get there. Wherever it is they get the nearest to it they can, so that they can be sure that the water strikes the spot that is burning and is not wasted. They stay inside just as long as human endurance can stand it. One of their number falling from exhaustion or overcome by smoke does not drive the rest away. He is dragged out to the air, and the others stay until it is impossible to stay an instant, longer. Then they retire, and the fight goes on from the fire escapes, the roofs of adjoining houses and the street. The street is the last stand. When the firemen are driven there, there is little hope of saving the burning building, and attention is devoted almost exclusively to the adjoining property.

"New York firemen are quicker on the scene of a fire than are the firemen of most other cities," went on the chief. "The engine and truck houses are so located, no matter from what box the alarm is sounded, either a truck or an engine can reach that box within two minutes after the alarm. When you consider that the horses have to be hitched, that at night the men have to dress themselves and get down to the first floor from their eleeping rooms, and all the little details that are incident to getting out of the houses, you can realize just what quick work that is."

"Are the modern buildings safer for the

firemen to work in than the old style "Decidedly safer, I think. The men will take a good deal bigger chances in them, and there are fewer accidents. The danger in them is from the warping or the cracking of the iron framework. Wrought iron warps, and cast iron cracks, but it takes intense heat to do either, and usually the heat will drive the men out before there is any danger. There is even less danger in the new buildings than in the buildings put up a few years ago. The iron frames are now surrounded by fireproof brick."-New York Sun.

"No, sir-nothing," was the reply. "Then what's the matter with you? You passed me several times yesterday and didn't speak, and last night you seemed to avoid me in the car. If I have said or done anything to hurt you, I'm ready to talk it over. "I haven't heard of your saying any-

entirely." "And in May you borrowed \$8 more." "Is it possible?" "And in July \$4 more." "Well, I never!"

"And in September \$5 again." "I can hardly believe it!" "And four weeks ago you borrowed \$7 which you were to hand in next day, but have seemingly forgotten all about. If you want to know what alls me, it's that you don't pay up." "And you say I owe you \$94?"

"Yes, sir; here are the various dates and sums. I always keep track of such things." "You do!" "Always, sir."

Indian Origin.

Canon J. D. Good of British Columbia tells a San Francisco Call reporter that his long residence among the Columbian Indians warrants him in saying that the latter are of Syrian origin, and are, in fact, Syrians now, having the customs and language. "I found many pure Syrian words in it, as, for instance, Eneas and Solomon-Chute, among proper names. The words of the language are historical and traditional, and observe the same laws as those of the Syrian language. I think the language of the Thompson river Indians is one of the Toranian tongues. There are direct Syrian words in it.

"Then there are other evidences that these Indians are the Syrian descendants. Their medicine man is the same as the Syrian seer. The burial customs are to this day the same. Besides this there is the character of the people, who are Syrians in thought, habits of life and general

"When I first went among the Indians, they had their war chiefs as well as their civil chiefs-the same as the Greeks. All I saw in every way convinced me, and I have during the ensuing years been very fully confirmed in my conviction that these Indians are Syrians."

Dr. Johnson's Kiss,

On the eve of leaving London for Canada Mrs. Brooke, who wrote "The History of Emily Montague," the first novel writ ten in Canada, gave a farewell party, Hannah More, Johnson and Boswell being of the company. Dr. Johnson was obliged to leave early and apparently departed after wishing his hostess health and lanpiness. Shortly after a servant whispered to Mrs. Brooke that a gentleman was waiting below to speak to her. Running down stairs, the fair novelist found the venerable lexicographer. "Madam," said he ponderously, "I sent for you down stairs that I might kiss you, which I did not choose to do before so much company."-San Francisco Argonaut.

A Treatment For Dyspepsia Much will depend upon the care exer cised in the selection of food, so important to the dyspeptic. Hamilton's Pills may be used with the greatest benefit in cases where liver and bowel complications are produced by, or are a result of dyspepsia. Commence with one pill every second day, immediately after dinner, and reduce the dose gradually until one-quarter of a pill only is taken, which will be found sufficient to stimulate the liver and assist the assimilation of food in the stomach. The Bichest Man. Chicago Inter Ocean.

There seems to be little doubt that John B. Robinson, of South Africa, is the richest man in the world. His fortune is estimated at \$350,000,000. In 1878 Robinson was in debt. He had kept a grocery store in the Orange Free State, but he could not make both ends meet. He and his wife begged their way for 300 miles to Kimberley. Here Robinson laid the foundation of his enormous fortune by picking up a rough diamond worth \$1,200. His ambition now is to be worth \$1,000,000,000.

It was so early that no one was stirring. The newly risen sun smiled unheeded up on this bit of stolen revelry; upon the dresses brushing dew from the grass in the graceful dance; upon Dorothy Penlaughter, her sparkling eyes, her delightful color and quick, airy movements, the grim Puritans forgotten as she joined in the gay pastime.

Suddenly came the sound of voices and of approaching footsteps. Peace was the first to hear them. The girls ceased their dance in consternation. Then Salome Endicott remembered that this was the day for the monthly muster of soldiers un-

#### BRIARSMERE.

Esme Barton, as she rode along on her trusty little oob, paid as heed to the weather, so absorbed was she in her own thoughts. Ralph Underwood was coming that

night to ask her to be his wife, she felt sure, for his manner at the Fletchers' dance the other evening had been unmis-

But that was before his father died, and Briarsmere was found to be mortgaged and all the affairs terribly involved. So now Jack was a poor man, and had even

undertaken work as Underwood's agent to pay off the mortgage, which Ralph held. Esme was rich, and could do as she liked with the fortune she had inherited from her mother, but was powerless to help Johnston street, Kingston.

"And pray why am I to lose your valu able services?" said Underwood "You know that during my manage ment your profits have nearly doubled, but when it comes to distilling liquors in underground distilleries and expecting me to be a party to the fraud, I draw the line.' "How dare you speak like this to me!

said Underwood, choking with rage. "You pauper, if I had not employed you, you would have starved!" "You are exaggerating my poverty." said Jack, in a calm tone. "It is true, by honest work I hoped to regain my property, but when you expect dishonest work, you have come to the wrong man.

Esme could hardly catch his words, for he was already in the road, "I have ordered back the pipes and stills." "The dickens you have!" roared Underwood, as he paced the miserable room. A quarter of an hour later Esme was in the cozy office of her friend and adviser,
