"Gpifer per Orbem Dicor." CLEVELAND TO QUIT.

A Washington correspondent of the New York "Herald" says that Pre sident Cleveland has declared his intention - to retire absolutely from politics at the end of his term The cruel gossip about President Cleveland's habits and his child's infirmities is absolutely baseless. There is not a healthier or happier family in America. Now, however, Mr. Cleveland feels, and his wife agrees with him, that he has had all the public life he needs or should desire, and the time has come for him to care for himself, which means not alone his own personality, but his wife, his babies, and his fortune. It is perfectly well known by his intimates, and they desire that the public should thoroughly understand, also, that with the close of his present term Mr. Cleveland's official

The investigation closed with bits of excursions into the relations of the police with all departments of New York life. It showed that not only was crime protected and taxed, but that hardly a sessment to the ward man. The slightest technical violation of ordinances was seized upon as an opportunity to harass until the business man was willing to pay rather than be constantly annoyed. CAPT. ANDREWS' APPEAL. The people of Kingston are familiar with the facts attending Capt. Andrews' loss of sight. He was for many years in the service of the government at the life-saving station, but left it to enter the post office. Soon after the change his sight began to fail him and later it left him altogether, forcing his retirement from office.

Undoubtedly Capt. Andrews' blindness is the result of some affection contracted while engaged in life saving, and hence the effort he has made, with the endorsement of several councils, including Kingston, to secure a pension from travelling and hotel arrangements for shadowy waters sweeping in softly, and his appeals is thus given in a letter he eral information. has addressed to Sir Hibbert Tupper:

"Through the kindness of James H. Metcalfe, the popular member for my native city, I am in receipt of your reply, in which you say that I have no claim upon the government. What additional claim can you possibly require beyond the all-important fact that I became blind through an injury to the optic nerve, caused mainly from exposure in the humane work to which I man suddenly changed his mind and have devoted the greater portion of my married another girl.

Gananoque Man Who Lived Completely Alone. The death of John Willoughby, Ganasoque, took place on Friday evening last. Mr. Willoughby came to this country from England years ago. At one time he was engaged in mercantile pursuits in Montreal, but for over twenty years past he resided in Gananoque. He was eccentric in his habits, living alone and not caring for society. He was quite old but able to take care of himself up to within two weeks of his death. A few days before he died he sent for Philip Heaslip and gave directions as to the drawing of his will. His property, amounting to over \$60,000, was all left to his wife's relatives in the old country Mr. Heaslip was made sole executor and leaves immediately for England to look after the affairs of the estate.

The public school children had a merry time at exhibition park, it being the occasion of their annual games. The park swarmed with children, who entered eagerly into the sports, and bappy were the successful winners of prizes. The band of the 48th Highlanders, dressed in their picturesque costumes, played bright, catchy music, which delighted the little ones. The many parents and friends present enjoyed the pleasure of the children, and watched with much interest the well-contested events. At the Rosedale lacrosse grounds a

championship match was played between the Capitals, of Ottawa, and the Toronto team. There also was a very large crowd of people, ladies being in the majority on the grand stand. ARTISTICALLY UTILIZED,

Trimming Should be Done-A Romemade Corner Sideboard.

It is frequently the case that there is not proper wall space near the centre of the walls of one's dining room for a sideboard, and in such an event one of these most serviceable articles may be fitted into a corner of the room. The accompanying

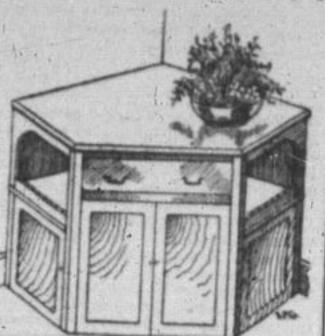

illustration shows a homemade structure that any one at all handy with tools ought to be able to make very readily. The wood used should be such as will harmonize with the other furniture of the room, or, if that is of a variety of woods, as is frequently the case, more latitude may be taken in selecting a handsome wood for this purpose. Oak, ash, cherry or whitewood may be used with good effect. Let the top and front be treated with simplicity, says the American Agriculturist, placing the work of naishing in the direction of securing a handsome service, rather than an ornamentation of "filigree" work, that is neither effective nor in good taste.

Possibilities of an Old Bureau. The utilization of old furniture in furrishing the home has not received that at tention to which as a measure of economy

it is entitled. The possibilities of an old chest of drawers that has outlasted its usefulness as such have seemingly remained undiscovered to many persons. While the new uses to which it can be put are manifold, according to Decorator and Furnisher, space will only permit the reproduction of one of the most useful. A very good hall seat may be fashioned from any ordinary burean. One recently made was from one of those swell front affairs so familiar in homes at the beginning of the century, but of course any similar shape or pattern would be equally fitting.

To make the change it is necessary to remove the upper drawers, upholstering the space left thereby-seats, sides and back. The flat top of the bureau of course will not be required as such and can be utilized as a seat by cutting to the proper size and nailing in place. The cushion may be removable and can be covered with denim, jute, velour or cordurey to suit one's purse. The back and sides should be padded, covering with the same material as cushion. Finish the edges neatly with gimp of suitable color or small brass headed nails.

Should the wood be dark mahogany any of the shades of denim now offered will answer admirably, and the pillows and bolsters, if used, may be deccrated to advantage with outline designs. The suggestion of using so humble a material as denim is with a view to economy. More

ITCHING PILES

More

ITCHING PILES is an exceedingly painful and annoying affiletion, found alike in the rich and poor, male, and female. The principal symptoms are a severe liching, which is worst at night when the suf-ferer becomes warm in bed. So terrible is the liching that frequently it is impossible to procure sleep. Often the sufferer unconsciously during sleep scratches the parts until they are sore—ulcers and tumor form, excessive moisture is exusted. Females are peculiarly affected from this disease, causing unbearable trritation and trouble. These and every other symptom of Itching Piles or irritation in any part of the body are immediately allayed and quickly cured by Chase's Ointment. It will instantly step itching, heat the sores and nicers, dry
