The Seat of Melancholia. The opinion-line been expressed by some physicians that this disease, in certain changes which are often found in the nervous system are merely secondary, and are not really the pathology of the ailment. Some interesting investigations have been made of this subject by Richardson, of London, and to these experiments is probably due the attention which has been given to the liver as the seat of melancholia. Noticing that all diseases occur ring below the disphragm are attended by depression of spirits, and that diseases the thoracle cavity are not thus attended the result of his observations is expressed of this trouble is the solar plexus-that is,
