JACOB A. GUARDS' GOOSE.

A REGIMENTAL PET PICKED UP IN CANADA YEARS AGO.

An Interesting Relic in the Orderly Room of the Coldstream Guards—Saved by a Sentinel and in Turn the Sentinel Saved by the Goose.

An interesting relic is preserved in a glass case in the Coldstream Guards' orderly-room at Whitehall, London. It consists of the head and neck of a goose, around which is a golden collar with the inscription, "Jacob, 2nd Battalion Coldstream Guards", beneath it are the words, "Died on Duty." In 1838, as related by the Million, when two of the battalions were in Canada helping to quell the rebellion, some of the soldiers were posted as sentries round a farm yard near Quebec. One day the sentry whose duty it was to watch the entrance to the farm beheld a fine goose fleeing toward him, closely pursued by a fox. His first impulse was to have a shot at the latter, but this would have alarmed the guard. He was compelled, therefore, to remain silent, while every step brought Reynard near to his prey. In the height of its despair the poor bird ran its head and neck between the legs of the soldier, and at the same moment the wily fox made a desperate grab at the goose; but too late, for ere he could get a feather between his teeth the ready bayonet of the sentinel had passed through his body. The poor goose, by way of showing its gratitude to its preserver, rubbed its head against his legs and made other equally curious demonstrations of joy. Nor could it ever be prevailed upon to quit the post, but walked up and down, day after day, with each successive sentry that was placed there.

The most remarkable thing in connection with the story is that the goose in turn actually saved his preserver's life. It so happened that the same sentry was on that particular post about two months afterward, when a desperate attempt was made to surprise and kill him. It was winter time, and several men stole up in the darkness to the sentry's post, their footsteps inaudible on the soft snow. The soldier, meanwhile, marched up and down his lonely beat, followed by the devoted goose, until he again "stood at ease" before the sentry box. This was the enemy's opportunity. But just as two of their number were preparing with uplifted knives to spring upon the unsuspecting man, the bird rose suddenly on its wings right in the face of the would-be assassins. They were astonished and rushed blindly forward; but the sentry, fully aroused to his danger, bayoneted one and shot at the other as he was running away. Meanwhile the other conspirators approached, but the bird repeated its tactics and enabled the sentry to keep them at bay until the guard came upon the scene and made them fly for their lives.

On arrival of the regiment in London the bird resumed its old duties with the sentinel posted at the barrack gates. Jacob was eventually run over by a van and died at the post of duty after a "sentry go" of twelve years.

HOW TO PRONOUNCE "HAWAII."

Peculiarities of the Sandwich Islands Language Sounds.

"How do you pronounce the name of the island kingdom which wants to be annexed to the United States?" is a question frequently propounded and variously answered nowadays. The most commonly acized by Lippincott's Worchester's, Webster's, and the Century's dictionaries, is, for the name of the principal island of the group, "Hah-wi-e," the second syllable accented, and the "i" pronounced as in "pine. The same question was once asked of a high-cast Hawaiian lady, well educated in her own and the English language. She answered:

"The proper pronunciation is Hah-vah-e-e. There is no "w" in our alphabet, and no letter nor combination of letters which take the sound of 'w,' as in English. The missionaries who first translated our language found it difficult to pronounce or express the sound which is, to my ear, correctly conveyed by the letter 'v,' softened and made full. Our 'a' is pronounced broad, as you pronounce it in 'fall,' and our 'i' is like the English 'e.' The rule is to pronounce every vowel, and as the exception to the rule does not affect the double 'i' in Hawaii, you see that the word is 'Hah-vah-e-e.'"

These are the twelve letters in the Hawaiian language, with their pronunciation: A (ah), e (a), i (e), o (oh), o (oo), h (hay), k (kay), l (lah), m (moo), n (noo), p (pay), v (vay). There is no sound of "i" as in the English language, except where "ai" follows "w," or as the Hawaiian lady would insist, "v." There is a great difference in the language as spoken by the high and low caste Hawaiians. The low caste speak with a succession of explosive, staccato gutturals; the high caste with a liquid flow that makes it a beautiful language. The insistance upon the "v" instead of the "w" sound is considered, even by some of the well educated and all of the uneducated, as something of an affectation, and one hears "Hah-vah-e-e" on the islands, instead of "Hah-wah-e-e," about as often as "vahse" instead of "vase" in American society.—New York Sun.

The Potent Hawaiian Pick-Me-Up.

Poi is made from the root of the taro plant. The taro grows in the water and its broad leaves float upon the surface. It has a root very similar to the turnip, but of more elongated form. It is prepared by grating it upon a slightly hallowed volcanic stone upon which water is poured from time to time. The whole eventually forms a paste, which undergoes a slight fermentation, and is pleasant to the taste. There is a drink on the islands known as a "poi cocktail." It is made by stirring the paste into a glass of milk. Its virtues were discerned many years ago by Europeans. For the "head" which follows a night's debauch there is nothing like it. When the stomach absolutely refuses anything known to civilization, when the throat is dry and burning, the voice husky, the temple throbbing and the hands shaking, the poi cocktail is swallowed. It is almost instantly assimilated. A delicious feeling of calm and rest steals over the patient. The paste covers the inflamed walls of the stomach and protects them. The throat becomes once more of flesh, not fire, and the head ceases to ache. In fifteen minutes he is ready for another spree.

A Heavy-Set Man.

A Curious Trick.

A glass of whisky and a glass of water are placed side by side, both glasses brimming full, and a wager made that the liquids can be made to change glasses without pouring either of them out. If the wager is accepted a thin card is placed over the glass of water, and held tightly on it while it is turned upside down and placed on the top of the pony of whisky. The card is then carefully shoved aside until one side of it is a hair's breadth beyond the rims of the glasses, and the whisky will then work itself into slowly the upper glass, the water descending to the lower. Care should be taken that both glasses are full to running over, and the card should be thin and moved aside very slightly, or the opportunity for capillary attraction, on which the perfect completion of the trick depends, will be lost.—London Million.

For Sprains And Bruises.

No other remedy cures sprains, bruises, cuts, wounds, chilblains, sore throat, rheumatism, etc., as promptly as Hagyard's Yellow Oil. It is an old standard remedy that has given perfect satisfaction for thirty years.

TO EUROPE THROUGH A TUBE.

A Texan's Scheme for Conveying Passengers Via a Rubber Conduit Route.

General F. M. Clarke is secretary of the Chamber of Commerce of Fort Worth, Texas. He is an accomplished scholar and finds time in the midst of his business duties to post himself in all the latest advances in electrical appliances. A reporter dropped into the general's office the other night and found him seated at his table before a lot of mechanical drawings.

"It can be done," said the general.

"What can be done?" asked the reporter.

"Some years ago I accidentally made the discovery that the india rubber of commerce could be made to assume a new and distinct property. By incorporating in the rubber at the time of its manufacture certain very plentiful and cheap ingredients the rubber will retain all its natural plasticity and flexibility so long as it is kept in the air, but when it is exposed to the action of the sea water it gradually changes in its character, and in from thirty to forty days becomes hard as adamant. Now, we propose to construct a long tube of this prepared rubber long enough to reach across the ocean. The first tube will have an eternal diameter of twelve inches, with walls four inches thick and in the walls will be woven a number of copper wires. This will form a flexible tube that will be easy of handling and can be coiled away in the holds of the vessels to be engaged in laying it, or perhaps some special form of large barge may be built for the purpose of laying. Eminent engineers have assured me that there will be no difficulty in laying the tube. The first end will be laid below the surface, so that the water can run into the tube and fill it as the process of laying goes on; thus by the water on the inside of the tube the hardening process will be hastened. After the tube is laid it will be allowed to remain full of water for ninety days before the water is taken out."

"But," asked the reporter, "how are you going to get the water out?"

"That is where the wires in the tube walls come in," said the general. "The water will be dissipated by means of a powerful electric current. There will be two air pumps, one at each end of the tube; one of the pumps will force the air in and the other will exhaust, creating a current of air that will pass through the tube at a speed of 1,000 miles per hour. It is the intention to use the first tube made for the transmission of mail matter. It can be used to transmit grain of all kinds and also petroleum. When used for oil no air pump will be required. The tube for passenger service will be twelve times greater than the one just described, so that it will have an internal diameter of twelve feet. It will also be slightly different in shape, being made of an elliptical form, instead of being perfectly cylindrical. This shape will be for the purpose of preventing rotation of the carriages or cars, which will be about sixty feet in length. No inconvenience whatever will be experienced by passengers. The air will be abundant and pure. Light will be supplied by storage batteries carried by the cars, and in case of any derangement occurring to the air pumps which furnish the motor current of air, attachment of the wires carried in the walls of the tube to a reserve dynamo on shore will at once establish an electric current in them, which can be used to operate the motor-dynamo, which will be carried by each car for emergencies. Telephonic communication will be maintained at all times with every car and both ends of the tube."

"Well," said the reporter, "you have not told me what are the materials you put into the rubber to make it harden when under the water."

"That information is the property of the stockholders of the company that will construct and operate the affair."

RAPID POSTAL DELIVERY.

London Authorities Experimenting With a Novel Automatic Device.

Rapid postal delivery of letters and parcels is a subject attracting much attention just now in this country and abroad, and many inventors are devising plans to accomplish the purpose.

Postoffice authorities in London are experimenting with an automatic contrivance which was recently placed in front of the Royal Exchange. It consists of a box with an electric signal attachment.

By dropping a penny in a slot the purchaser obtains an envelope enclosing a smaller envelope and card, upon which the communication may be written. A small shelf falls in front of the box, at the same time, to serve as a desk, and an electric bell sounds in the nearest postoffice, calling a messenger to the box.

If it be desired to forward a parcel by express delivery the arrival of the messenger must be awaited, but a letter may be deposited in the message receptable for immediate despatch. The necessary fee has in each case to be enclosed in the envelope bearing the name of the addressee, and should the payment be insufficient he will be required to pay simply the difference.

If the sender requires a cab to be used the fare must be enclosed in the outer envelope, which has to be marked, "By cab."

If this arrangement proves as convenient as it promises the postal authorities have signified their willingness to introduce it in various active centers of the city. If adopted in London it is said that the plan will soon be laid before the postal authorities here with a view of introducing it into this city.—N.Y. Herald.

Complete Failure of Negro Suffrage.

There has elapsed more than a quarter of a century during which efforts have been made to solve the negro problem by legislation along the line of enforced political equality between the races, and all these efforts, without exception, stand forth confessed failures. The problem yet remains unsolved. To the question, "Why?" I would answer that in attempting its solution the legislators seem to have lost sight of the great fact, shining forth from every page of modern history, that "where the Anglo-Saxon set his foot he rules." Into the reason for this there is no necessity to enquire. It is enough that the fact exists. Nor does the relative numerical strength of the races in any locality seem to have aught to do with it. Cast away upon an island inhabited by savages a rude, unlettered American or British sailor, and, if the natives do not eat him within twenty-four hours, in five years he will be king of the country. Whether it be upon the icy surface of Plymouth Rock, or on the burning sands of India, from the moment the Saxon's foot pressed the soil, his domination begins. It is only with due regard to this fact that the negro problem is capable of solution. While the Federal power has been engaged for more than twenty-five years in an effort to overturn this immutable truth with the "be it enacted" of the National Legislature, the people most directly affected have been steadily engaged in nullifying that effort and in trying to solve the problem along the line of white supremacy.—Forum.

We Should Live One Hundred Years.

We are century animals and have a perfect right to live out that period if we can. Many do so. Consumption has been killing off the flower of our youth through the centuries, but it will do so no more. Why? Because "Miller's Emulsion of Cod Liver Oil," wherever used, cures consumption and the coughs and lung troubles which give rise to it. It will be like suicide to die of consumption in future if "Miller's Emulsion of Cod Liver Oil" is within reach. In big bottles, 50c and $1.00, at Wade's drug store.

Firewood In Plenty.

Come down and see our stock of best maple, cut or uncut, arriving weekly by Kingston & Pembroke. Best dry slabs in the city. Pine and cedar blocks and Gilmour's dry edgings for kindling wood. All cheap for cash. James Campbell, opposite barrack gate, Ontario street. Telephone No. 116.

A Valuable Hint.

When you are attacked by cough or cold do not delay but commence at once to use Hagyard's Pectoral Balsam. This old standard remedy removes all irritation, loosens the phlegm, and heals the mucous surfaces, curing coughs and colds of all kinds.

Robert Kilpatrick, South Sherbrooke, is in confinement for insanity.

WHAT GRANDMA USED.

Infallible Remedies That Helped to Make Her Beautiful.

The belles of the 17th century slept with their hands in chicken-skin gloves to give the skin delicacy and whiteness. To keep the complexion peachy and pink the old-time beauties believed there was nothing equal to the juice of strawberries, either fresh or preserved, says the New York World.

Mme. Recamier is said to have bathed her face, neck and arms in fresh buttermilk once a day.

April snow water, bottled and well corked, was and is used by many a soft-skinned woman for the preservation of her loveliness.

To make the waist slender it was the custom of early English ladies to sleep in stays tightly clasped and corded. But this is not to be recommended for beauties now-a-days.

When a society belle of our grandmothers' days happened to be afflicted with a foot too long for beauty she shortened its apparent length by wearing very high heels. Sometimes the heels were so high that grandmamma could scarcely walk upon them.

To remove skin blemishes that were too pronounced to serve as beauty marks the unfortunate old-time beauties used to bind salt pork upon the offensive spots, and sometimes even eel skins and chopped frogs' legs were employed.

Slitting the skin at the outer edge of the eye to give greater size to that orb was not an uncommon thing in the good old days.

If a girl happened to be afflicted with stooping shoulders her devoted mother would bind a flat piece of board upon her back to keep the erring shoulders straight.

But there were some very dainty things which were employed by grandmamma and her friends to keep themselves lovely. For example, grandmamma dipped her lace in lavender water to make them smell sweet. She sprinkled her locks with oil of rosemary. Her finger-tips were touched with rose-paste and so were her lips, while her skin was fragrant with attar of roses, which old nurse poured into her bath.

Her Dog Decked With Diamonds.

Miss Etta Ten Eyck, of Hartford, Conn., really take the palm for extravagant decorations of a dog. Miss Ten Eyck is young, pretty and owns a two-pound black and tan terrier, and this is the way she attires the little mite: 1. Diamond earrings, made in screw fashion and thus lie flat with doggie's ears. As the diamonds are two karat stones and are of the purest water, the New York Journal thinks they are easily worth $200. 2. A collar spans the little animal's neck. It is of embossed Russia leather as a base, so doggie's dear little neck will not be injured. Along the leather runs a big band of solid gold. In this band are set diamonds, rubies, emeralds, cat's-eyes, bits of lapis lazuli, strips of onyx, pearls of value; in fact, the collar is simply a glittering mass of splendid gems. It cost $5,000. 3. This daintily decorated dog has also a harness. This harness consists of a strap, which passes around his forelegs and thence across his back to his hindquarters. The harness, like the collar, is of soft Russia leather, and is just ablaze with precious stones. To add to the unique picture, Miss Ten Eyck has tied blue—baby blue—ribbons along the harness at intervals.

Miss Ten Eyck herself does not wear a gem. She puts them all on her dog, which is probably not only the richest dressed dog in America, but at the same time has an especial servant to wait on him.

Mr. Gladstone at Home

When relieved from the affairs of state, Mr. Gladstone finds no pleasure so great as his home life at Hawarden. There his family are gathered together, and the great man romps and plays with his grandchildren as though he never knew what it was to be blamed for anything that went wrong in all Great Britain and her colonies. Mr. Gladstone is a wonderful scholar, a busy writer and speaker, but the little Gladstone children know him best as a good, kind grandfather who is fond of fun. He, too, would prefer to enjoy their company rather than to be surrounded by England's great men at an all-night session of Parliament. His other recreations are walking, and—this is really very funny—chopping down trees. Our great George Washington, according to tradition, had a like fondness in his youth, but by the time he became President he had probably outgrown such fancies. Mr. Gladstone, however, is an expert woodman, and though he doesn't destroy valuable cherry trees, he goes out with his axe and takes the keenest pleasure in felling trees in Hawarden Park. A visitor to the castle one day noticed an axe behind the door in the great hall, where it had been left by the statesman after one of his chopping expeditions. A curious ornament for such a place, it seems, is may be out of compliment to the boy George Washington and his hatchet that the "Grand Old Man" prefers to use an American axe.—Harper's Young People.

Why Women Paint and Powder.

There is no use in talking, says a writer in the Philadelphia Times, women do use paint and powder, and the only thing to do is to accept the fact and learn, if possible, the cause. To ask one whose cheeks bears rosy evidence against her "why she does it" will bring no satisfaction, as there has never yet been known a woman willing to acknowledge that any portion of her make-up is false. Rouge is used most undoubtedly for the sake of winning the admiration of the opposite sex, as there is hardly a man who really admires the pallor of the lily in preference to the glowing tints of the rose, and many masculines candidly admit when questioned on the subject: "Oh, we don't mind, so long as it is done artistically." Ah, there's the rub, or rather too much of the rub, for so few women, outside of beauty doctors and those having maids, realize how much they get on, causing the very marked difference between their face and their neck, which is certain to call attention to the daubing done by the unskilful hand. Very seldom is anyone deceived by the vivid red of cheeks that have been heightened in color by a rosy liquid or powder, and unless it can be done well it should never be attempted. Powder is as much a part of a woman's toilet as her soap or her tooth brush. It is not used to deceive anybody, but takes the shine off in warm weather, and at all seasons of the year gives that sweet and feminine finishing touch that has no more harm in it than when the mother uses the puff on her baby's soft skin after the bath. Rouge certainly has a flavor of unreality about it, and no matter by whom it is used it gives to that person a look that is certainly not high bred, to put it mildly. Refined, womanly women will not resort to it any more than they will bleach their hair or make up their eyes, but to powder is a little feminine sin that is both pardonable and innocent.

Progressive Joy.

He—Aren't you pleased with the way my moustache is growing?

She—Yes, indeed! I'm more tickled with it every time you call.

On Trial For 90 Days.

The finest, completest and latest line of electrical appliances in the world. They have never failed to cure. Holloway's Ointment And Pills

Are the best, cheapest, and the most popular remedies at all seasons, and under all circumstances they may be used with safety and with the certainty of doing good. Eruptions, rashes, and all descriptions of skin diseases, sores, ulcerations and burns are presently benefited and ultimately cured by these healing, soothing, and purifying medicaments. The ointment rubbed upon the abdomen checks all tendency to irritation in the bowels, and averts diarrhœa and other disorders of the intestines frequently prevailing through the summer and fruit seasons. Heat lumps, blotches, pimples, inflammation of the skin, muscular pains, neuralgia affections, and enlarged glands can be effectively overcome by using Holloway's remedies according to the instructions accompanying every packet.

THE TEA TABLE.

Read This Down And You Will Be Well Entertained and Posted.

Sophiasburg has several octogenarians, and some of them have reached ninety years.

The Cleveland seed company, Picton, will add two additional storeys on their building.

A. C. Shields, Gananoque, is seeking acquittal from his creditors, so as to begin business again.

Wade's mandrake liver pills, sure cure for biliousness and constipation, Wade's drug store, Kingston.

E. Kirk Hart, a pioneer seeker of pleasure among the Thousand Islands, is dead at Albion, N.Y.

Dr. Orson F. Cobb, West Troy, died from blood poisoning on Saturday. He was ill only a day or two.

The patrons of Maberly cheese factory have sold their shares of stock to Henry Rigney, merchant, for $700.

C. B. Calder, a former Clayton boy, has been made engineer and surveyor for the bureau veritas, of France.

W. Banning, Clayton, has accepted a situation with James H. Wylie & Co., Almonte, as assistant book-keeper.

Hanson's Magic Corn Salve cures corns and bunions with three applications. 15c per box at Wade's drug store, Kingston.

Francis Vandewater, Hay Bay, died on Tuesday. Deceased was formerly a resident of Portland, where he was brought up.

Henry Boyle, of Bangor, Hastings county, has purchased through R. Reeves all the machinery for a water power saw mill.

D. Henry, Carleton Place, splitting wood, struck his hand instead of the block and almost severed one of his fingers.

All disorders caused by a bilious state of the system can be cured by using Carter's Little Little Pills. No pain, griping or discomfort attending their use. Try them.

The funeral of a man named Guyea, who lived in Admaston, occurred on Wednesday. Guyea died suddenly on Monday.

A. P. Reed, Foxboro, has engaged with W. I. B. Striker to manufacture cheese in Royal street factory, South Marysburg.

David Losee, Picton, is distributing cheap copies of the scripture, in small pocket size as well as larger sizes, to the careless and unconcerned.

Their gentle action and good effect on the system really make them a perfect little pill. They please those who use them. Carter's Little Liver Pills may well be termed "Perfection."

Samuel Hambly, Gretna, has purchased the Robert Frink farm of 200 acres from Davis H. Miller for $4,200, and his son, James Hambly, will move on it in the spring.

On Tuesday an inmate of Perth jail, named John Fagg, dropped dead while attending to some duties. An inquest was held on the remains by Coroner Grant on Wednesday and decided the cause to have been heart failure.

No one knows better than those who have used Carter's Little Liver Pills what relief they have given when taken for dyspepsia, dizziness, pain in the side, constipation, and disordered stomach.

The Petersburgh (Migh.) "Sun," of Feb. 20th, announces the death of Chas. Gunsolus, Feb. 19th. Deceased was born in Fredericksburgh and moved to the states in 1871. He carried on a drug business in Petersburgh.

Mrs. Livingston, Scotch Bush, one of the pioneers; John Reid, Grattan township, aged twenty-six, from consumption; Mrs. Johanna Pierce, Wilberforce, aged ninety-seven, an early settler, are the deaths in Renfrew county.

Queen's anti-hairine, a new discovery by accident, removes hair from the face, neck and arms, permanently, without pain or injury. So simple any child can use it. A boon to those who dislike shaving. A relief to ladies annoyed by hair on the face. At Wade's drug store, Kingston.

A gold watch, owned by Miss Barr, Renfrew, was lost while going to the station. It was advertised for but not recovered. Last Monday a lad named Portugais offered the watch for sale. It was identified. The gold chain was found at the home of the lad.

Indelibly Impressed.

Mrs. Gazeworth (coming in from the conservatory)—Mamma, I'm—er—engaged to Major Backrank.

Mrs. Gazeworth—My dear, you relieve me of a sudden fear for your reputation.

Miss Gazeworth—I don't understand you.

Mrs. Gazeworth—You forget that the major dyes his mustache.

A LOYAL KENTUCKIAN.

He Wouldn't Admit That There Was Any Better Land to be Found.

Proctor Knott used to know an old headstone cutter up in the Kentucky mountains who made his living by chiseling epitaphs of more or less truthfulness about misguided people who would leave the blue grass regions for a bourne whose climate and products are not so justly celebrated and well known. This fellow had a stock of machine-cut headstones bearing the same regulation inscription:

Sacred to the Memory of
Who Died ——,
Aged ——.

One day a widow called for a stone, but, having a little more style than the average mountaineer, she required something poetic and pathetic.

"Wall, mistress, reckon we're as fine as they is, and we can put on a little extras if ye pay for 'em. How would you like

"'Gone within the gates ajar.'?"

"No, that wouldn't suit. Too common. I think you can make it 'Gone to a better land.'"

The old fellow looked in amazement and indignation.

"Ma'am," he said sternly, "I've be'n cutting 'em for thirty years, and I've told some mighty big ones in that time, but I don't put no such stuff as that on a stone for no one. Gone to a better land? By gosh, they ain't no better land than old Kantuck, and I won't say they is for no price."—Chicago Tribune.

Just a Plain Question.

A certain learned judge, when attempting to be clear, is at times rather perplexing.

"My good woman," he is reported to have said to a witness, "you must give an answer, in the fewest possible words of which you are capable, to the plain and simple question whether, when you were crossing the street with the baby on your arm, and the omnibus was coming down on the right side and the cab on the left side, and the brougham was trying to pass the omnibus, you saw the plaintiff between the brougham and the cab or between the omnibus and the cab, or whether and when you saw him at all, and whether or not near the brougham, cab or omnibus, or either, or any two, and which of them respectively—or how it was?"—The Million.

Heard on a Trolley Car.

"Why, George," she exclaimed, tremulously, as she felt his arm steal about her slender waist, "what are you doing?"

"Trying to operate a belt line, dear."

COTTOLENE
What is it
?
It is the new shortening taking the place of lard or cooking butter, or both. Costs less, goes farther, and is easily digested by anyone.
