Where there were colleges intellectual thought had been most developed, and he detailed the number of colleges in Scotland, England, Germany, France and the United States. They could see how thoroughly their progresgive friends on the south of the line equipped their institutions. There was no country where the people pay more attention to higher education than in the United States. It was well that Queen's help aloof from confederation and determined to build up a university in this part of the province. She has assumed a great responsibility and they must take care she does not take a second place. She must take a leading position and be equal to it. He referred to recent beneactors to the college and he trusted the list would keep on swelling until it will be as long as Principal Grant desires. A great deal depends upon those who class themselves as friends of Queen's. They must work to increase the endowment

An examination would

The wife of the gunner, when interviewed at the family quarters in the old The chairman said that the parties fort, told what she knew about the sad should withdraw the bill for the present affair. Her husband had been working gun was heard. Mrs. March was busy at her household work and did not pay much attention to the matter although majority of the members of the committee. she though at the time it was curious. About ten minutes later a hack drove up to the gate containing a lady and gentleman wishing to be shown through the fort. The boy, Henry, was sent in

He was attracted to the spot where chise and making the city liable for the poor fellow lay by remnants of clothing. Jumping up on the rampart the boy saw his father lying at the bottom of the trench at least fifteen feet below. The alarm was then given. Although Thanks to the support of the Kingston | there are five families living in the cotpress and people the Private Bills com- tages none of them were about at the mittee gave our company a franchise for time. They were in the barracks. Conforty years and the city to repair the sequently March was left lying in the streets for the first fifteen years. King- trench on his face, for at least half an hour before Dr. Neilson with men arrived.

Assistant undertaker Corbett soon had the man comfortably arranged. His clothing had been torn off his body in many places. Mrs. March thinks that after firing the twelve o'clock gun her husband at once proceeded to reload for the 9:30 alarm. She thinks that a lingering spark from the first discharge ignited the powder as he was loading the gun. In using the same rod March's hands would naturally be brought in front of the barrel. He was blown over the rampart, and the fall, no doubt, rendered Mrs. March states that her husband

the charge of the government stores at \$1 a day. The gunner was greatly elated over this and said he was tired of the work he was at. He was very popular CARPETS, with the men and a general favorite with Mrs. March further stated that none of the guns on the advance battery were fit for use: They were all honey-comb-
