THE HOP COMBINE BROKEN. Prince Edward Growers Enraged Over A Breach Of Faith.

Some time ago, as reported in the

Montreal Trade Bulletin.

Trade Bulletin," the growers and dealers in Prince Edward county came to an arrangement not to sell hops of 1892 growth under a certain figure, say 22c or 28c per lb., the dealers maintaining that by such combined action they could force prices up to the point growers were asking. Consequently, growers refused to entertain any bids under the stipulacontinued for quite a time, it was found taken advantage of the agreement to hold new hops at a certain high rate, in order to work off their yearlings, which it The growers, finding this out when i was too late, at once offered their best 1892 growth at several cents below the combine price, and sold a good portion of their holdings at 20c for choice quali ties; a few fancy lots, equal in every respect to the finest New York state hops, bring 22c, but to-day the best kinds can be had at 18c, and good at 16c to 17c. Brewers here appear to be well loaded up for the time being, and are not buying except extra inducements are offered by olders to induce them to auticipate their requirements to any extent, and consequently a good quantity of 1892 growth is still in farmers' hands. The Prince Edward county growers are enraged over the breach of faith manifested on the part of dealers, cogrespondence from Picton and vicinity is to be relied on. This is an other of the many instances in which certain members of syndicates or combines take undue advantage of agree ments at the expense of the majority. It is claimed that there is no combine in re gard to yearlings, but the growers claim there was. It is scarcely probable that farmers who come to an understanding with dealers to hold for a certain figure and at the same time allow the latter to supply the market with their underpriced yearlings, to the injury of the
