tens' Day at the Industrial Exhibition and Torontonians turned out in such numbers that the history of the Exhibition shows] no equal to it in point of attendance. The crush throughout the day was as great as it ever was before the large addition to the grounds was made. The Exhibition was at its best yesterday. All the departments except the Agricultural Building are now complete, and the perfect weather experienced on the first day of The Strangers at the Hotels Do You Know the second week crowned the enjoyment of the visitors and the success of the show. Every attraction on the ground had its share of patronage.

The immense grand stand was crowded stables proved a strong attraction, as did also the splendid display in the Horticultural Building. The green sward, dotted with groups of happy women and children dressed in their prettiest costumes, presented a pleasant picture of brightness and color. All-the-electrical and mechanical departments were in full swing, and altogether the day was a huge success from every point of view.

RECIPROCITY IN WRECKING. Tardiness on the Part of United States Of-

ficials Delays Its Enforcement. OTTAWA, Sept. 12 .- The department of trade and commerce is preparing a circular on the question of reciprocity on wrecking and towing between Canada and the United States. It is delayed, however, by inability to obtain from Washington copies of instructions to collectors of customs at United States ports. It would appear that the treasury department has neglected to prepare these instructions which should have been issued in conformity with the president's proclamation, bringing the act of congress respecting wrecking into force. Canada has done her part but it seems that fate has decreed many obstacles in the way of getting into working order the law for which humane rensons alone should not be rendered nugatory by a lack of attention on the part of
