THE U. S. TARIFF AND SUGAR. The Internal Revenue Features of the Bill Still in Abeyance.

WASHINGTON, Nov. 27 .- All day Satur day the majority members of the Committee on Ways and Means labored on their tariff measure preparatory to sub-mitting it to the Republican minority members and to the general public. The internal revenue features of the

bill, it is understood, are still held in abeyance, but the general schedules and the administrative sections were agreed upon at a late hour after a final conference with the Secretary of the Treasury. Prior to this conference it had been practically decided to place an ad valorem duty of 25 per cent, on sugar. The chairman of the committee authorizes the statement that the proposed wriff bill, to be made pubie to-day, will provide for a duty of one-fourth of a cent per pound on refined sugar and retains raw sugar on the free list. The bounty given American sugar producers by the McKinley bill is to be reduced at the rate of one eighth each year years it is to cease entirely.

TRADE REVIEW. the Business of the Week-Slightly Better

New York, Nov. 25.-R. G. Dun & Co. s weekly review of trade to day says Consumption increases slowly and all branches of business are waiting for its growth. The week's returns respecting indus trial progress are conflicting. There has been a heavy sale of cotton goods at very satisfactory prices and the market has decidedly strengthened in concequence. Though the prefuet a in this branch is still somewhat less soan it was a year ago, the market for goods at current prices is strong. In woollens there is a substantial increase in the demand, notwithstanding the fact that several mills, each having orders for a thousand pieces or more, have closed, the orders being not so assorted as to give them profitable employment. But the sales of wool have bren the largest since September, 1892, amounting at three chief mar-

kets to 8,025,800 pounds, against 4,813,500 for the same week last year. In the manfacture of boots and shoes the demand employs an increasing number of factories and the orders are in number about as usual for the season, though smaller in quantity.
