25 PRINCESS STREET, KINGSTON.

## Drains

THE HEALTH of cities and towns is dependent upon the prospect of their future advancement, that sound policy dictates the adoption of any means likely to improve the general healths or remove evils that are known to exist.

Medical men and sanitary engineers are unanimous in regarding the source of epidemics of contagious diseases to the door of imperfect drainage, and the vast amount of money already spent and now being expended in the United States and America in perfecting the sewerage system is proof of the importance attached to this subject by the greatest engineers in the world.

In London, Eng., between 1853 and 1856, \$100,000,000 was spent in dredging—the result of which the death rate was reduced from 55 to 1,000, from 23 to 1,000. This reduction of mortality was affected among the same occupants without any change in their habits.

It is important that our drainage systems should improve with the city's growth. Not only should special attention be given to the proper position and arrangement of sewers, but the quality of material used in their construction is also very important. The vitrified Salt Glazed Drain Pipe made by the Standard Drain Pipe Co. are without doubt, the best made in Canada and if we are to judge from the tests by prominent engineers, they are superior in quality to any other pipe ever imported.

We always keep on hand a full stock of Standard Pipes and Fittings and are prepared to give advice as to the construction of Drains and all Sanitary Fixtures. Get our prices.
