THE DREADED CHOLERA.

ENGLISH AUTHORITIES ACCUSED OF BELITTLING SITUATION.

A Suspicious Case Reported in London-

A Sanitary Cordon in France. There Will be Strict Inspection at Many Uni ted States Ports-Cases in Liverpool, LONDON, Aug. 31 .- It is a significant fact that the two deaths from cholers which have occurred at Glasgow as well as the

three deaths as Gravesend all took place in the ranks of bodies of emigrants who were on their way to the United States. While steerage passengers on board ships on which actual outbreaks of cholera have taken place have been detained by the English authorities, many shiploads coming from infected parts, including Hamburg, have been allowed to proceed to their ultimate destination, which in nearly every

case means the United States. That the English medical authorities are making a grave error in belitting the danger of cholera infection by communication is the opinion held by several army surgeons who were interviewed to-day, and whose vast experiences in India render them peculiarly able to speak on the subject of cholera with authority.
"The appearance of the disease at Ham-

burg," said one of these, "means a positive danger, not only to England, but to the United States, whither at this season of the year continental emigrants are awarm-

"Supervision or any modified form of quarantine is a worse than useless precaution to take in these cases, as it lulis to a fancied security and leaves the danger as imminent as ever. "Nothing short of an absolute prohibi-

tion of immigration to England and the United States will serve to save these countries from running a tremendous risk." Already the indirect outcome of the cholera scare is seen in France. London is full of American travelers who have cut short their continental journeys, in many cases at a day's notice, and who have arrive's here in order to take passage home. Unfortunately the principal Atlantic

liners are always on their return trip crowd ed at this season of the year, and they find it impossible to make room for would-be In consequence scores are obliged to wait over here until room can be found for them, while others are taking passage by less

Notwithstanding the quarantine that has been established people from Hamburg are allowed to land and the result of this is shown by the fact that two new cases of cholera have occurred in the City road, London. The victims arrived yesterday on the steamship Peregrine from Hamburg. They showed no symptoms of the disease and were permitted to land. They proceeded to their homes, and to day the disease appeared. The district is filled with small houses and is densely populated.

Hamburgers Treated Like Lopers. LONDON, Aug. 31 .- The Berlin correspondent of The News says: The export case of Asistic cholera in this city did not create a panic. The Sanitary Committee has decided to stop the gratuitous distribation of disinfectants in order to prevent their waste, and to avoid an unwarranted feeling of safety. At the same time the largest powers of inspection will begin. and ample provisions for doctors and nurses will be made in event of a contingency. Prof. Koch has issued a warning against over-much watering of the streets, the humidity, he claims, favoring the spread of bacilli and the rapid consumption of water preventing effective filtration of the water-

works. The most conflicting reports as to the extent of the epidemic in Hamburg have been published. Hamburgers are treated like epers elsewhere in Germany. Hotel doors are shut in their faces, and it is impossible for them to obtain lodging. Many have been known to alight from railroad trains a -few stations before reaching Berlin and to come into the city by local trains to avoid inspection. The authorities are endeavoring to stop this practice, but find it difficult to do so. Suspected cases of cholera are reported at Halle and Leipzic, but the presence of the disease in these places has

not been officially confirmed. Sanitary Cordon in France,

Paris, Aug. 31 .- The Minister of the In terior will to-day sign an order embedying advice from the Board of Health for the establishment of a sanitary cordon along the eastern frontier from Dunkirk to Delle and for the maintenance of cholera sanitary stations in all the ports of France.

A stevedore working at Havre yesterday died anddenly after drinking a glass of water, presumably from cholers. The British and American officials at Havre do not regard the situation as alarming. As a matter of precaution the American consul appointed a commission of physicians to inspect all sut-going Atlantic steamers. The Minister of the Interior has ordered every possible facility to be extended, to the foreign consuls in the matter of the abode and extent of the disease and its progress. The weather appears to have no effect on the epidemic. Sunday the weather at Havre was cold and windy; yesterday both the cases of cholera and the deaths were more numerous than

There Was no Trace of Poison in the Bodies of the Victims.

FALL RIVER, Mass., Aug. 31 .- The court came in at 10.30 precisely, and the first witness called was Prof. Edward S. Wood, the man for whom everybody has been looking for days. He said he had received a package containing two stomachs on Aug. , and two jars containing milk used on Aug. 4 and 5. All were properly labeled. The stomachs were labeled "Mr." and 'Mrs. Borden." The stomachs appeared to be perfectly natural. Mrs. Borden's stomach contained about 11 ounces of solid food. The food was partly digested and showed wheat, starch and meat. The contents were chiefly meat, and there were vegetable pulp cells, which might be bread or apples. The digestion seemed to be advanced about two and a half hours. The stomach was tested for prussic acid, but without any results. The stomach of Mr. Borden contained only six ounces, chiefly water. In Mr. Borden's stomach there was only a small portion of starch. The digestion in his case, the contents being nearly all water, was much further ad vanced than in the case of Mrs. Borden. There were a few threads of vegetable tissue in his stomach which might have been apple.

the hours verging on Sunday morning last. What she did seems to have constituted prima facte evidence of insanity, for the authorities have given her a place is Bellevue Insanity Pavilion, pending the verdict of apecialists as to the exact quality The woman was first brought to the atten-

tion of the public by Officer Tinney of the Twenty-second-street squad. While patrolling his beat on First-avenue late Saturday night he was attracted by a durious looking biped in musculine garb, but decidedly feminine in face and form. It wore baggy seersucker trousers that flapped in the breeze and a jumper of the longshoreman stamp. Outside was a thread bare alpaca wont that threatened to go tobogganing down the delicate sloping On the woman's feet were big cowhide

brogans that went flippity flop and awaken-

ed noisy reverberations along the deserted pavements. Her hat was a dilapidated species of the derby, and rested unwaturally upon the wearer's shoulders. The attire was striking, but not becoming. The woman herself-what was to be seen of her -appeared to be a good-looking blonde, apparently about 30 years old." She bore evidences of belonging to the hard-working class. Her hands were hard and muscular and her figure spare and short.

When asked to account for herself the woman replied that she "was out looking achievements, has been successfully accomfor work." When taken before Justice Tainter, at the Yorkville Police Court, she said that her husband had come home drunk and abused her. When he went out later she had put on his working clothes and left the house in search of employment. The fair masquerader was remanded to Supt. Blake of the Society of Charieties and Correction. According to that officer she was a pitiable object. There was a suspicion of the inebriating cup about her voice and manner. She wore her hair "dressed high," according to Supt. Blake, and appeared willing to divulge more to him than she had previously told. She stated that she was a Baltimorean and had lived out as a domestic. She had been out of work for awo weeks. A week ago, while walking in Central Park, a man had offered her a home with him until she got another position. She went to live with him, and further than that she would not commit herself.

The woman was detained for examination as to her. sanity. At Bellevue Hospital, where she was then taken, she was uncommunicative Apparently she was, rational, quiet and well behaved. It was only to Dr. Stuart Douglas that she would speak of herself at all. When the subject of her conduct Saturday night was broached she suddenly affected a beforged expression and seemed to be all at sea. She did not know where she had lived, nor could she recall the name of the man she lived with. She had forgotten whether or not she kept house for him, and did not whether the meals had been brought in this was affected. The woman was examised at 4 o'clock

yesterday afternoon by Dr. Allen Fitch and Dr. Matthew D. Field. Their decision has not yet been arrived at owing to their doubt of the woman's veracity and her seemingly same conduct. The man involved has not yet put in an appearance in quest of his clothes.

CAST INTO A THRESHER. County, New York. SAVANNAB, N.Y., Aug. 31.-Meagre details of a peculiar tragedy in Cayuga County have just been received here. A boy while cutting bundles for a thresh

ing machine near Cate in that county accidentally out the feeder's hand, which so infuriated the latter that he caught the lad up and threw him into the rapidly revolving cylinder, where he was ground to death be fore any one present could raise a hand to The brother of the unfortunate lad immediately folled the murderer with a blow from a pitchfork and then repeatedly plunged the times of the fork through his

body until he was dead. All the threshing hands stood by and witnessed the terrible affair, apparently paralyzed by horror and unable to interfere. Fatal Magazine Expinsion. ROME, Aug. 31.-An explosion occurred yeaterday at the Mancini magazine at San Severo, a town 17 miles northeast of Foggia. Two men were killed and two others were seriously injured. The noise of the

explosion was terrific. This is the third time that the magazine has blown up. Frost in Dakota. ABERDEEN, S.D., Aug. 30. -The mercury fell to 30 degrees last night and a light frost nipped small vegetables and fruit.

Rerbert H. Booth, Commandant of the Salve tion Army, has issued his promised explanation with reference to the resignation of Mr. Philpott, and answers the latter's charges. Replying dipott's charges of extravagant salaries paithe Headquarters Staff, the Commandant says that this statement is absolutely unfounded, the best proof of this is the fact that there are working at Headquarters 22 persons, 11 of whom are married. The total amount drawn for salary divided among these 22 persons, gives an average fonly \$8.81 per head. Among the most ex ensive men on Headquarters Staff was Mr. hilpott himself, who, when he left, was costing he Army, including his house rent, as much as myself, my house rest not being chargeable to

The testimonial as to his loyalty which Philpott says he received from Commissioner. Ress. th mandant says, was merely a license to mary under the Salvation Army Marriage Act, and ae official legal document giving him this iscense was commenced in the customary way with the words which he quotes. His assertion that he was compelled to resign to absolutely unfounted says the Commandant, and is proved by his own written resignation, is which he admits that was expecting another interview with him.
