The Secretary Of The American Navy Sounds The Praise Of The Metal. WASHINGTON, Dec. 12 .- The Secretary of the Navy in his annual report pays particu-

ar attention to the Harveyized nickel-steel compound, the tests of which have, he says, never been equalled or even approached before by any armor plate, American or for-It has demonstrated that the United on paper, is enabled to place upon each and all of its armored vessels a material the like of which the world up to the present time has not seen, and that while vast

sums have been spent in plating the sides of foreign men-of-war with an inferior metal this country will employ for the purpose an armor which is not only far more efficient, but which represents unquestionably, having reference to the dimensions of plates thus far tested, the highest develop-

ment of modern science.

A Test in England, Following the example of the United states the English Government four weeks ago beld a trial of the American armor, and | Squares, it is clear from the highly successful resuits of the trial that the United States instead of being last in the race in the construction of vessels of war or of borrowing its best ideas from abroad, has set an eximple in this respect which other maritime powers will appendily follow.

\$1,000,000 made by Congress for the purhase of nickel matte and shows, what has een done with it. The first purchase was a quantity valued at \$50,000 from the Canadian Copper Comnany, and, after making further experiments, the Department came to a decision, the correctness of which subsequent developments have fully confirmed, to employ this material in the manufacture of armor. A contract was entered into June 15,
