MISCELLANEOUS.

ST JACOBS OIL

TRADE MARK

THE GREAT REMEDY FOR PAIN

WHAT IT WILL DO.

Relief.—In any limbs, many cases, one or two applications of St. Jacobs Oil relieve pains and aches; often cure permanently This is the average experience in ten years.

Cures.—The contents of a single bottle have cured extreme chronic cases in thousands of instances. Used according to directions, there is a cure in every bottle.

The Testimony.—Thousands of testimonials substantiate the above statements in the cure of all kinds of painful ailments.

The Cost.—A patient knows instinctively the cost of his misery, knows that whatever may be the origin of his ailment, its expression or development produces aches and pains.

Pains and Aches may be classified briefly as those of the bones, the joints, the muscles and the nerves. They may be classified also as to their cause.

Treatment.—Rub the parts affected thoroughly with St. Jacobs Oil. Apply night and morning if necessary. Protect the body from draft and cold.

THE CHARLES A. VOGELER CO., Baltimore, Md.
Canadian Depot: Toronto, Ont.

MEDICALITIES.

CARTER'S LITTLE LIVER PILLS.

CURE

Sick Headache and relieve all the troubles incident to a bilious state of the system, such as Dizziness, Nausea, Drowsiness, Distress after eating, Pain in the Side, &c. While their most remarkable success has been shown in curing

SICK

Headache, yet Carter's Little Liver Pills are equally valuable in Constipation, curing and preventing this annoying complaint, while they also correct all disorders of the stomach, stimulate the liver and regulate the bowels. Even if they only cured

HEAD

Ache they would be almost priceless to those who suffer from this distressing complaint; but fortunately their goodness does not end here, and those who once try them will find these little pills valuable in so many ways that they will not be willing to do without them. But after all sick head

ACHE

is the bane of so many lives that here is where we make our great boast. Our pills cure it while others do not.

Carter's Little Liver Pills are very small and very easy to take. One or two pills make a dose. They are strictly vegetable and do not gripe or purge, but by their gentle action please all who use them. In vials at 25 cents; five for $1. Sold by druggists everywhere, or sent by mail.

CARTER MEDICINE CO., New York.

Small Pill. Small Dose. Small Price.

SCOTT'S EMULSION

Address Pamphlet Co., 323 Main St., Cincinnati, O. Sold by Druggists.

EXCHANGE.

A BRICK COTTAGE ON BRUNSWICK Avenue, Toronto, will be sold cheap or exchange for property in Kingston. The above property is in the western part of Toronto, and is increasing in value every year. For particulars, apply through this office.

TALK FOR THE FARMER.

CURRENT TOPICS OF INTEREST FROM MANY POINTS OF VIEW.

Dr. Vaughn's Pertinent Rules for the Dairyman who Wishes to Produce Pure, Wholesome Milk—Topics of Value to Every Farmer in the Land.

The production of pure, wholesome milk should be the leading object of the dairyman, whether he is supplying whole milk for city trade or cheese factories, cream for creameries, or making butter on the farm. Milk may not only be poor in quality, but it may become exceedingly poisonous through putrefactive changes brought on by neglect and carelessness. Instances are becoming more plentiful of poisoning through eating cheese which has been made from milk produced by cows kept under unhealthy conditions. Dr. Vaughn is authority for the following rules for the production of healthy, nutritious milk.

1. The cow should be healthy, and the milk of any animal which seems indisposed should not be mixed with that from perfectly healthy cows. 2. Cows must not be fed upon swill, or the refuse of breweries or glucose factories, or upon any fermented food. 3. Cows must not be allowed to drink stagnant water, but must have access to pure fresh water. 4. Cows must not be worried or heated before being milked. 5. The pasture must be free from noxious weeds and the barn and yard must be kept clean. 6. The udder should be washed, and then wiped dry, before each milking. 7. The milk must at once be thoroughly cooled. This is best done in the summer by placing the can in a tank of cold water, or ice water, the water being the same depth as the milk in the can. It would be well if the water in the tank could be kept flowing; indeed, this is necessary unless ice water is used. The tank should be thoroughly cleaned to prevent bad odors. The can should remain uncovered during cooling, and the milk be gently stirred. The temperature should be reduced to 60° Fahr. within an hour. The can should remain in the cold water until ready for delivery. 8. In summer, when ready for delivery, the top should be placed on the can and a cloth wet with cold water should be spread over the can, or refrigerator cans may be used. At no season should the milk be frozen, but no buyer should receive milk which has a temperature higher than 65° Fahr. 9. The only vessels in which milk should be kept are tin, glass, or porcelain. After using the vessel it should first be rinsed with cold water, then scalded, and, if possible, exposed to the air and thoroughly dried.—Canadian Live Stock Journal.

POINTERS FOR FARMERS.

He is a fortunate farmer who has a pond of clear and pure water from which he may cut an annual ice supply for his dairy and family use. In almost every neighborhood good ice is in demand, so that after filling his own ice-house if he has any surplus it is easily disposed of. Land thus covered with water is often much more productive in money than land which is cultivated. In every large city many thousands of dollars are paid for labor every winter in cutting and drawing.

Evergreens should be trimmed early in the spring, or at any time before the buds commence growing. Wait till the coldest of winter is past and then the sooner it is done the better for the growth of the tree. This is a general answer, where pruning is done to promote the vigor of the tree and direct its form. Pruning for a different object, as where we wish to dwarf a tree, should be done later, after growth begins, or early in June. The best season to transplant evergreens is as soon as the frost is out of the ground in the spring.

It takes money to buy bran and linseed meal, but if the manure is properly saved it is all returned with interest. The foolish idea that it costs more to handle stable manure than it is worth originated on farms where no nitrogenous foods are fed and the poor manure is drawn afield after months of washing. Instead of saving money to invest it in commercial fertilizers next spring, buy concentrated stock foods with it now, and by planting time it will be in available form for plant food, and there will be a good deal more of it than can be bought in chemicals and phosphates with the same money.

A good ration for horses, which is used by an extensive breeder of trotting and road stock, is composed of one part by weight of finely ground oil cake meal and four parts of wheat bran. This is the winter ration and 4 qts of it is fed twice a day with not over 8 lbs of good hay daily given at noon. The summer ration is changed by using two parts of ground oats for the one part of corn meal and work horses get from 5 to 6 qts. three times a day with a moderate quantity of hay. As corn has been so high this winter, 5 lbs of finely cut unhusked corn fodder has been used in place of the corn meal and the bran and oil cake meal is sprinkled over it. This is fed morning and night with 5 lbs of good hay at noon.

Salting butter with brine instead of dry salt is easier and more effective. When the butter comes in small grains, stop the churn and draw off the buttermilk. Pour in cold water and revolve the churn a few times and draw off the water. Repeat this until the water runs clear, which will be about the third time. Make brine enough to cover the butter by dissolving in cold water all the salt that the water will take up. Let the water drain all out of the butter, then put in the brine and revolve a few times. This way of salting is simple and thorough, for every granule of butter is evenly salted and no streaks will then be found in the butter after it is worked. A little salt may be added to the water in washing the butter to help wash it cleaner.

Flowers for Farmers' Wives.

How many farmers' wives love flowers and yearn for them, yet go without them year after year, having or believing they have no place in which to keep them and no time for their cultivation. I am reminded that flowers are possible for most hard-worked women, by a remark my wife made recently: "Plants do better in a kitchen or in a bay window connected with a kitchen than anywhere else. More roses and other plants needing high temperature will thrive and bloom with less care, and the steam from cooking and washing only seem to benefit them." The time plants take is largely imaginary, and could not be counted if the favorites were in or next to the kitchen where the tired wife could turn to them and rest while watering or admiring them. Many have shelves or boxes at the kitchen south windows with excellent results. Where lack of room forbids this, an alcove or bay window may be built onto the south side at small expense, removing the house wall so the addition forms part of the room. This will improve the sanitary condition of the kitchen also by making it more sunny. If the work can be done now, home genius may be employed and the carpenter's pay saved.—Farm and Home.

Mortifying the Flesh.

Domestic—"What shall we have for dinner the day, mum?"

The mistress—"Nothing at all, Norah. Just a few brook trout, some poached eggs with cream toast, a few bunches of celery, some kind of light pudding, assorted fruits and coffee. I am surprised at your asking, Norah. You know as well as I do that this is a Lenten fast day."

When Baby was sick, we gave her Castoria.
When she was a Child, she cried for Castoria.
When she became Miss, she clung to Castoria.
When she had Children, she gave them Castoria.

Holloway's Ointment and Pills.

These remedies are unequalled throughout the world for bad legs, wounds, foul sores, bad breasts, and ulcers. Used according to directions given with them there is no wound, bad legs or ulcerous sore, however obstinate or long standing, but will yield to their healing and curative properties. Many poor sufferers who have been patients in the large hospitals under the care of eminent surgeons, and have derived little or no benefit from their treatment, have been thoroughly cured by Holloway's Ointment and Pills. For glandular swellings, tumours, piles, and diseases of the skin there is nothing that can be used with so much benefit. In fact, in the worst forms of disease, dependent upon the condition of the blood, these medicines, used conjointly, are irresistible.

ODDS AND ENDS.

A combination of an organ and a violoncello is being exhibited in Paris.

There are upward of 10,000 artists in the city of New York.

A machine has recently been invented for making shoestrings out of paper.

The colonial slipper, having a large flap and buckle over the instep, is worn with afternoon house toilets.

The Statistical Institute of Rome announces that 53 per cent. of all Italians are unable to read and write.

When washing fine white flannels add a tablespoonful of pulverized borax to a pailful of water. This will keep them soft and white.

Francis Wilson, the comedian, has bought a chair formerly belonging to Sir Walter Scott, and given by him to Sir Edwin Landseer.

Three of the twenty-three surviving widows of the soldiers of the revolution now on the nation's pay roll live in Windsor county, Vt.

"The Autocrat of the Breakfast Table" was published when Holmes was forty-eight, and "Songs in Many Keys" when he was fifty-five.

The young Polish Countess Wanda von Sacawinska has just received the degree of M. D. from the University of Geneva. She will practice medicine in Poland.

George Bancroft published a book of poems in his youth and later in life bought up every copy of the work he could lay his hands on.

It has been calculated that it would be possible to take from a section of the River Negro lakes, occupying about nine square leagues, upward of two millions of tons of salt.

General Booth in his book, "In Darkest England," says, "Out of every five persons in London one dies either in the hospitals, asylums or workhouses."

In softening of the brain, one of the first indications of something wrong is increasing irritability, which, however, is seldom referred to the true cause. If the patient is a mother she finds fault with her children on the slightest provocation and punishes them with unwonted severity.

Honesty in the Home.

To construct a household on the basis of the highest honor one to another seems to me to be the preliminary to a community of the same sort. When our homes are right society will be right, and not sooner. This involves not simply honor under law, but honor under conscience. The family is the nursery of the state. What kind of citizens we make here are made for all time. It does press heavily on me that home life has been immensely encroached on by public life. We find people far more ready to preach and teach in the lump than to practice as individuals.

We wish to engage in converting the world, but our home habits are quite negative as concerns a true life, or else are positive bad. The extent of this modern religious habit it is difficult to measure. The plainest laws of life are broken by those who zealously support churches and schools. But when we get down to the fundamental need, is it not for more absolute honesty in our every day doings? I should like, also, to put in a plea for a higher social honesty. Society is not so corrupt and vicious as it is lying. What is the prime purpose of ordinary social arrangements? Pure selfishness. We do not aim at frankness in our fashions.

There is a dishonesty in love that must be guarded against. Of all things let us beware of love forms. When a husband or wife says "My dear" in addressing each other in company it is possible they leave it off in private. We must learn to feel gentleness, and never to profess what we do not feel. I do not advocate an absence of gentle words and manners, but that we, above all, guard against the use of empty manners and words that are but husks. With children there is a still worse cheat in the form of indulgence.

Honesty is the best policy every time in the culture of the young. What we know is right and for the best should be unflinchingly adhered to. Look ahead at the consequences of yielding to ease, or the least troublesome course. One-half the sickness of any community is owing to false feeding and indulgence in childhood. Our first obligation to a child is to give him a healthy body.—Mary E. Spencer in St. Louis Globe-Democrat.

How Life May be Prolonged

Poets and novelists go into ecstasies over what they romantically call "beautiful spring," and "gentle spring." and while, no doubt, every one is glad to see winter release its icy grasp, "beautiful spring" is, after all, one of the most deadly seasons of the year. Sudden transitions from warmth to extreme cold, with piercing, chilling winds; from dry to sloppy, "muggy" weather, all combine to make the season a most trying one, even to the hardiest constitution, while to those with weak constitutions the season is one of positive danger. Undoubtedly the greatest danger at this season of the year is from cold in the head, which vert few escape, and which if not promptly and thoroughly treated, developes into catarrh, with all its disagreeable and loathsome effects. Catarrh, neglected, almost as certainly developes into consumption, annually destroying thousands of lives. At this trying season no household should be without a bottle of Nasal Balm. In cases of cold in the head it gives almost instant relief and effects a speedy cure, thus preventing the development of catarrh. Where the latter disease has already secured a hold it is equally efficacious, and with persistent use will cure the worst case. From the outset it sweetens the breath, stops the nauseous droppings into the throat and lungs, dispels those dull headaches that afflict the sufferer from catarrh. Nasal Balm is not advertised as a cure-all—it is an honest remedy which never fails to cure cold in the head or catarrh when the directions are faithfully followed, and thousands throughout the country have reason to bless its discovery. Nasal Balm may be had from all dealers or will be sent post paid on receipt of price (50 cents, small, or $1, large size bottle) be addressing Fulford & Co., Brockville, Ont.

Keep a Brave Heart.

Said somebody to a woman in my hearing the other day: "My friend, I am afraid you are getting bitter. I detect it now and then in what you say and write. Not much, only enough to show some bee has stung the sound fiber of your nature and left the rankle of its bite." If you have any spare prayers to offer, my dear, whoever you are who reads this paragraph today, get right down on your knees and implore heaven to keep you from all cynicisms and bitterness. Try hard to preserve your faith in the ultimate victory of good over evil, and in the fair shining of an untroubled sun behind these flying clouds.

When you and I let go our hold on hope we join hands with despair, and despair is a guide that leads the soul downward. No matter how hard life may be, how the storm may beat, or however unceasing the grind may be, hold fast to your faith in the Captain who never lost a battle yet, nor ever signaled the trumpets to call retreat. Everything is coming out right in the end. Nothing can withstand the advance of an earnest soul.

There is not material force enough in the universe to keep it down. Difficulties vanish before a steady front. Was it not Thoreau who said, "As soon as Atlas got his back made up that was all that was required." Brave backs go a-begging for burdens.—Chicago Herald.

$745.00 in Gold For a Wife.

We will give to the first person telling us before June 1st, 1891, where in the bible the word "wife" is first found $100.00 in gold. To the next $50.00. To the third, $25.00. To the fourth, $20.00. To the fifth, $15.09. To the sixth, $10. To the next 25, $5 each. To the next 25, $2 each. To the person sending in the last correct answer, we will give $100 in gold. To the next to the last $50, and so on same as from the first. With your answer send 25 cents in silver, well wrapped, or Post Office money order or script, for a box of Dr. Cole's Blood and Liver Pills, the best Blood, Liver and Stomach Pill ever made. Sure cure for sick headache. Don't gripe. Remember the presents are absolutely free, being given away to advertise Dr. Cole's Perfect Pills and Family Remedies. At the close of the contest the names and addresses of all the prize winners will appear in this paper. We refer you to the Traders' Bank of Orillia. Send at once and be first. Address, Home Specific Co., Orillia, Ont.

For white sweet bread use our flour in cotton sacks. James Crawford.

SOCIETIES.

A STICK OF CHARCOAL.

HOW A DEFT-HANDED PERSON MAY USE IT.

Wonderful Effects Can be Produced—The Mystery of Effect a Delightful Study—The Choice of Paper One of Great Advantage.

A stick of charcoal in the hands of one who knows how to use it is capable of producing wonderful effects—crispness, transparency, atmosphere and all the variety and delicacy of textures which make a drawing attractive. With it a broad tint or a fine line may be drawn with equal ease; it offers a wide range of values, and, above all, its markings may be readily obliterated, thus admitting of endless alterations and corrections. These qualities are equally useful to both student and artist, but in a different way. The artist will dash off a charcoal sketch upon the instant. He is master of form, and need not sacrifice anything of brilliancy or transparency by repeated erasures.

The student, on the contrary, must continue to brush out and rub out unsatisfactory work long after the charcoal shall have been ground into the paper and worn away its "tooth" so that it is actually woolly. But if in the end he attains to something like correct form he may be content, and console himself with the reflection that artists have gone through it all in order to reach their present degree of accomplishment.

As for the mystery of effect is is a delightful study, which may be followed indefinitely after the mastery of form shall have been attained.

WORKING ON BROWN PAPER.

A practice followed in our best art schools (and one strongly recommended to students working without a teacher) is that of drawing on a large scale—life-size. In this work are employed common brown wrapping paper, the softest charcoal and a bit of chamois skin, the latter to be used mainly in making corrections. There is a reason for using the brown paper aside from its cheapness. White paper must be neatly or quite covered to bring it down in harmony with the strong blacks of the charcoal, but the tint of the wrapping paper may be allowed to stand for the high-lights and the middle tints of the subject, and the study thus be confined to the deeper tones, which greatly simplifies and expedites the work.

QUICK, BOLD, THOUGHTFUL WORK.

The more drawings one makes the more one will learn, the eye and hand becoming trained in proportion to the work done. In this broad, quick work the lines are carefully but boldly drawn, the masses of shade are rubbed in, using the entire length of the charcoal, and are afterward modified with the fingers, palm of the hand or a soft cotton cloth.

The quality of the charcoal depends in great measure upon the kind of paper used. For rocks, foliage and other coarse-grained textures, a coarse-grained paper with a good tooth will be required; for flesh, sky and smooth water a smoother surface must be chosen; absolutely smooth paper will not do at all as it will not catch nor hold the particles of charcoal. Artists, however, often wish to combine the two extremes—rough and smooth textures—when they are obliged to resort to different modes of treatment on the same paper to produce the desired effect.

AN ACCEPTED METHOD.

The method most used is to choose a rather fine-grained paper and work over the smoother surfaces with small chamois stumps, the fingers or bits of soft bread, giving the final modeling by careful stippling. The roughest parts are done with charcoal only, using the full length for flat surfaces, and modified only slightly for medium textures. In the most spirited parts the broad point of a soft charcoal stick is used in vigorous cross-hatching, by which means admirably suggestive work can be done.

CONCERNING WHITE AND TINTED PAPERS.

For anything more than a sketch or very simple study white paper should be used, the brilliancy and transparency of charcoal drawing, depending on the specks of white paper showing through the black or gray—and tinted paper, of course, lessens such an effect in degree as the tint deepens. In simple studies and sketches this tint is useful, taking the place as it does of high lights and half tones. The practice of indicating the lights with Chinese white is destructive of harmony and only allowable in special cases.

ONE OF THE TRICKS.

A little trick, especially useful in landscapes, and which even artists of repute do not disdain to make use of, is that of burnishing down certain parts of the paper—the portions reserved for fine surfaces—before beginning to work on them. To do this well requires much practice. Properly done it is a great assistance, giving atmosphere to the distance and relief to the foreground.

THE FIXATIVE.

The fixative, which it is absolutely necessary to use with all charcoal work, is made of gum shellac, dissolved in spirits of wine. The color should not be darker than that of pale sherry. Too much of it should not be applied as in that case the transparency of the work would be lost. A moderate application of the fixative will prevent the charcoal falling off and preserve it until it can be put under glass. In case any part of it should be rubbed it may be retouched vigorously.

WHAT CAN BE DONE WITH CHARCOAL.

To sum up the capabilities of charcoal: Nothing renders flesh like unto it; and for stuffs, glass, porcelaines, landscape, and, indeed, everything one sees about him it is equally responsive to the artist's demands.

A touch modifies its texture; a breath will lighten any part; or the whole drawing at once.

When it is right, fix it with the atomizer; it all wrong the whole drawing may be wiped out at once.

Bear in mind that one must work and work hard, in order to make anything of charcoal, as in any other branch of art.

Above all, he must learn when and where to stop.

This is the great secret in charcoal drawing.

A Remarkable Dog Story.

John Templeton is a blacksmith who owns a fine specimen of the English mastiff. Recently Mr. Templeton was working at his forge, putting a new steel in a pick. The new steel was slightly burned in the heating, and, instead of welding, flew in half a dozen pieces.

One piece struck the blacksmith just above the right eye with such force as to fasten itself firmly. The blacksmith staggered and fell backward.

How long he was unconscious he does not know, but when he revived the dog lay almost in the middle of the shop crying almost like a human being, and rubbing his jaws in the dust of the floor.

The piece of steel that had struck Mr. Templeton lay a short distance from the dog.

The faithful brute had seized the hot steel with his teeth and drawn it from the frontal bone of Mr. Templeton's head. The dog's mouth was found to be badly burned.

A District Manager Wanted.

For the Ontario Mutual Life Company in Kingston and vicinity. This is a good opening for a man who will devote his whole time to it, and will secure new business, as the company is well and favorably known and has already a good business force in the above district. Salary, commission, or both is offered to a pushing man. Apply S. Burrows, general agent, Belleville, or John Sherlock, Kingston.

Ahead of Koch's Lymph

Read what Mrs. Frank Maston, Bloomfield, Ont., says. When I came to Kingston last fall I was not only a physical wreck, but had a frightful cough, my brother recommended me to try Miller's Emulsion of Cod Liver Oil, which I did. I commenced to gain both in flesh and strength at once, the cough leaving me gradually. To day I am as well as ever. Thanks to Miller's Emulsion. For sale at Wade's Drug Store.

Hair

Is the natural covering of the head, hats and bonnets are not. If you want to see the natural covering on and bring it back if gone, use only Prof. La Forest's Parisian Hair Reviver at Wilson's Pharmacy.

Good Evening

Have you used Dyer's Jelly of Cucumber and Rose for your chapped hands? If not try it at once. Druggists keep it. W. A. Dyer & Co., Montreal.

California pitted plums are extra fine, 20c per lb., at James Crawford's.

Beecham's pills act like magic on a weak stomach.

A Story Without Words.

Undeniably.

Servants' gossip is low, of course, but when it is about your neighbors sometimes you will admit that it is undeniably interesting.

Strained Relations.

Archibald—"You are related to her by marriage, are you not?"

Frigiday—"No; I'm her brother by refusal."

Worse Than Slippers.

Be thankful, boys, you didn't live
Of old, in Greece, or anywhere
Where grown-up people sandals wore,
And youngsters didn't trousers wear.

Pretty Much the Same Thing.

A.—I hear that you are going to marry a widow with $10,000.

B.—You have got things mixed. I am going to marry $10,000 with a widow.—Texas Siftings.

A Successful Artist.

Smere.—"The first picture that great artist ever painted brought more than any of his other works."

Dauber—"Who bought it?"

Smere—"He did."—Harper's Bazar.

Certainly a Bigot.

"Mr. Tawker is a brilliant controversialist."

"He is an intolerant bigot."

"You think so?"

"Of course I do. He never agrees with me in anything."

Not a Fool.

Dr. Johnson was once seated in the midst of a large dinner-party. He inadvertently placed in his mouth a hot potato, but, suddenly ejecting it, he turned to the hostess with this remark. "Madam, a fool would have burned himself!"

Progress.

She—"Did you succeed in mastering French while abroad?"

He—"Nearly, I did not succeed in making the Frenchmen comprehend me, nor could I make out what they were driving at, but I got so that I could understand myself when I talked."

Mrs. Mackenzie, mother of Rev. W. A. Mackenzie, Brockville, died on Saturday afternoon, aged 67 years. Her husband was the late Rev. Robert Mackenzie, of Dalhousie. The deceased lady was engaged in missionary work in Ireland and New York in the '50ties.
