FOR THE QUEEN'S

Tonowro, July 2 .- The first annual race for the Queen's Cup was sailed yes-R.C.Y.C. here. The entries were Oriole Vreda, White Wings, Verve and Allesn. The wind at the start was light from the southwest and accompanied by rain, which, however, soon cleared off. The course was & triangular one, starting from the Exhibition whart, thence to a buoy off Mimier Point, exhibition buoy twiceround. The Oriole Ailen and White Wings towed to the starting buoy, while the Vreda and Verve (Hamilton trusted to their sails; this proved disastrous to the Hamilton custer, for she started over

12 minutes late. The boats crossed the line in the following order: White Wings, Vreda, Oriole, Ailsen miles, but gradually the Oriole crept ahead and rounded the Mimico buoy first by a few seconds with the White Wings see coud, Vreda third and Verve fourth. The last boat had almost gained the time which she had lost in her unfortunately late start and was miling a remarkable race, the Allesn was apparently out of it from the first, and although she sailed a persistent and plucky race was never able to make herself felt by set her balloon jib and managed to gain with. buoy, closely followed by Vreda. The wind, which had been up to this time very light from the southwest, now veered round to the coutheast and commenced to freshen. The Vreda, which all through the race was sailing nip and tuck with the White Wings, now commenced to pick up and she pulled abead sufficiently to round the exhibition buoy several lengths in front of the Cuthbert sloop, The Oriole, for which the wind proved rather light, was third and the Verve fourth. Spinnakers were now set and the yachts drifted westward. The order was very slightly changed until Mimico Point was ohed, and then the White Wings pulled perself into the lead and showed the flee! the way round the buoy. On the leg out the

Vreds worked to weather of the fleet, but coming about too soon she had to squeeze so close that the Cuthbert sloop pulled the lead from her and went round the lake buove with a lead of 200 yards. The Oriole followed, and as the wind increased she commenced to overhaul the leaders; these three were now so close that a " gallery" fluish was expected. Luck, however, which up to this time had favored the White Wings now suddenly deserted her, for when almost abreast of the Vreda, with startling crack her topmast vas to finish the race. She hung to it, how ever, and succeeded in finishing 2 minutes the cup by the narrow margin of two se conds. The Verve was third and the others unplaced. The following is a summary of

They are a peculiar people, are a blending of both, and their language, partly Teutonic and partly Celtic, is peculiarly adapted for the universal language. As a matter of fact, one of the Gremm brothers, the famous philotog sts urged, upon the German Government to adopt English as the official language, and at the present time a similar

question we ought not to answer." Mr. Cockburn on the resumption of the de bate concerning the proposed P.E.I. tunnel drew attention to an attack which had been made upon him by The Charlottetown Examiner. In its Ottawa correspondence that paper in speaking of the former debate on the same subject referred to Mr. Cockburn as "This session the buffoon of the House," as "having had more than he could carry on this particular occasion." Mr. Cockburn appealed to the Speaker as the guardian and custodian of the liberties of the House to say whether members of the House could be attacked or blackguarded in this way. Some discussion having arisen as to

the politics of the paper Sir Richard Cartwright, amidst roars of laughter, showed from the public accounts that The Examiner last year received \$131.70 for advertising and \$1537.50 for printing, and suggested that the paper could be brought to task by the Government stopping the supplies.

Mr. Foster said that no pledge had ever been given to build the tunnel and main tained that the Dominion had done all it agreed to do when the province entered Confederation to keep up communication with it If further data were required to form a definite estimate of the cost of the tunnel the Government was prepared to assist in obtaining that information. The cost of the tunnel would be large and would have to be borne to a great extent by the Dominion. The value of the Island produce would be greatly increased by the tunnel, and it would only be fair that a toll should be charged on produce going through it. If after balancing the receipts and the probable cost it was found that the cost was still very heavy, he was willing to say that the Dominion out of generosity to a smaller province would be justified in giving the balance required to carry out the work. Mr. Davie's motion for correspondence in connection with the tunnel was then

LONDON, July 1.-The News' Berlin spatch says it is rumored the German Goveroment has promised to influence German financiers to assist Italy in her financial difficulties as an inducement for her to adhere to the Dreibund. The formal adherence of England is out of the question, but her tacit support is recognized as extremely valuable, as in the event of war in Europe the central powers would be dependent on the British colonies and America for corn and ment, the fleets of the Dreibund being too small to cope with the allied fleets of France and Russia. The Post's Berlin correspondent says: "The new alliance is based upon three treaties, the new one being between Austria and Italy. It is probable the Ger. man-Italian treaty will be published, but the Austro-Italian treaty will remain secret. THE CHILIAN ROW.

Fight is Imminent, and Some Stirring Scenes Will Occur. Cogumeso, Chili, June 28.-The new

resident of the government party has been dected. The provinces in South Chili, all under Baimaceda's control, voted on Saturday. As a foregone conclusion, Balmaceda's candidate, Vicuna, was chosen as his succes sor. Balmaceda will besitate at nothing to stamp out the revolution. He is in the fight to the bitter end. There will be no cum promise. Either he must fall or the insurgents will have to make an unconditions surrender. This town is alive to day with warlike scenes. Everything points to a fierce fight at a very early date. News reaches here that all the insurgent fleet, with the one exception of the Femeralda, are in rendezvous at Caldera, 200 miles to the north of the port where the Blanco Encalada was sunk. Their purpose is, without doubt, to attack Coquimbo at once. It seems that the insurgents have been encouraged by the reports emanating from here of disaffec among the supporters of Balmaceda. They hope to be joined by hundreds of deserters as soon as they make a descent upon this place. If this is so it will make a big difference in the coming fight. It looks as if the insurgents and the Balmacedists would be in conflict by July lat or 2nd. There are 7,000 government troops in this town. Much less then one half of these are regulars, the rest are volunteers. They are not to be much depended on. It is from their ranks that most of the deserters to the other side are gathered. There is no telling what the strength of the insurgents at Coldera is. I is reported that they have 8,000 troops in all who are well armed and that only for lack of ammunition they could put a much larger force in the fields. I have just been informed that an attack by both land and sea upon Coquimbo may be looked for. Balmaceda's officers here are making every preparation for a savage resistance. They are trained men and good fighters. The weakness of the

They Are Quarrelling. NEW YORK, July 2.-The four Parnellite delegates to this country, James J. O'Kelly Wm Redmond, John O'Connor and Henry Harrison, had another quarrel last week and hence the sudden departure of Harrison for his pative land. Before he left he and Redmond and O'Connor roundly denounced O'Kelly. He bore away with him to Parnell a sealed packet containing their opinions of the man in whose charge they were sent to enlist sympathy for the "uncrowned king." In his evil days O'Kelly's alliance with the John Devoy party caused the trouble, the

other delegates claiming that this connection was the reason for their failure everywhere they went. The Cheese Markets. Lot No. 27. All of the Township of Lavant, Ground rent, \$12.00 Forks Station.

The above property is most advantageously situated, being in the vicinity of Flower Station, along the line of the Kingston & Pembroke Railway and on the Clyne River, making a very short distance to hear either to railway or river. It is a very desirable property for either lumbering or mining purposes, iron and other minerals being found all over it, while the large quantities of valuable pine and cedar, both standing and lying, and hardwood, principally maple, with its nearness to either railway or river, make it very suitable for a lumbering and sawmill business. Timber can be driven from this place down the Clyde to the Mississippi River in 10 days, or can be shipped direct by rail to Kingston or the Madawaska.

TAMWORTH TIDINGS.

An Accident to a Clergyman - A G TAMWORTH, June 30 .- The president the board of trade has proclaimed lat July a holiday. This little town is not overbur dened with holidays and we will enjoy ou first holiday for many years. What might easily have been a very serious accident Rev. Mr. Serson turned out not so sad as first thought. He was watering his pony and carelessly took off the headstall. The pony got frightened and dashed away at full speed throwing him under the carriage and outting his head open about three inches long. Under the droumstances he made a fortunate escape and is doing well. James Hymers lost his little girl 'ast Sunday from the effects of whooping cough. It is very prevalent around Maribank.

Mrs. John Sherman has arrived from Gananoque, where she was call ed to the bedside of her sick sister. W. K. Carscallen left fer Winnipeg last Wednesday, where he intends joining D. B Dowling of the geological survey. They intend meking a map of Lake Winnipeg. Mrs. C. Douglas, we are pleased, is recovering nicely from her late illness. Just heard from our boys in Bartle City, Montana. They report lots of work, but a mighty bad place to live. C. P. Sherman is repainting the store occupied by J. E Perry. It looks fine. School plosed here to day for the summer holidays. The children are happy. Grain is looking fairly well, but we want more rain. Mr. and Mrs. John Stewart are back with as for

FINANCIAL AND COMMERCIAL

THE KINGSTON MARKETS. KINGSTON, June 30 .- Since the last mar ket report was printed there have been many changes in conection with the price of strawberries. For two days they were purchased at from 7c to 8c per bex. the price went up and on Saturday they sold f at at 120 per box. On Monday they dropped to 10c per box, and on Tuesday there was a pientiful supply and prices fell a cent on the box. The cause of the fluctuation in the price is attributed to the cheapness of sugar. This has induced canning companies to compete for the berries, and vendors receive 6c per box for them delivered at the canning factories. Had it not been for this strawberries would have been plentiful and sold cheap for a couple of weeks. While the extreme hot weather lasts butter and eggs will be sold at the present high prices. Fresh butter could not be purchas ed on Saturday for less than 160 per lb, and eggs were sold at from 13c to 14c per
