A Bolt of Lightning that Left its Mark of While 200 people were assembled ower Hightower shurch, Towns county, Georgia, a stroke of lightning fell near the church, and glancing from the ground played havoc with the congregation. Two or three currents entered the church. Benches were upset and the floor was covered with people, variously affected. Some were knocked senseless, while others had clothes and shoes torn from them. Many were burned, and streaks and marks were left on their bodies where the current touched them. Nearly every one has marks where the lightning touched. Ex State Senator Foster was knocked senseless, and on recovering found marks down his legs and on his body. He did not know what had struck him. Many of the congregation found holes burned in their clothes, some of the garments looking as if a load of shot had been through them. Strange to say, no one was killed, though many were rendered temporarily uncon
