THE DAILY WHIG.

" Opifer per Orbem Dicor." FOR THE SEASIDE THE LARGEST IN THE WORLD. St. Albans, Vermont, claims to have the largest creamery in the world. There are forty lour "separating stations" tributary to it, which receive milk from some 700 dairies. The milk is weighed, run through the separator and the dairyman returns home with 88 lbs. of sweet milk for every 100 lbs. sup plied. The cream is sent daily from the seperating station to the creamery at St. Albans in cars fitted for this special service,

except where the vicinity of the separator to St. Albans admits of the carriage of the cream by teams. The St. Albans Adventurer thus describes the treatment of the cream at "The cream is emptied into a receptacle

rangement of jointed pipe, carried to any room. These vats, arranged in two rows, midnight there came a step up the walk, five on a side, each hold 600 gallons, and in up the side stoop, even to the office door. them the cream is allowed to remain about | Mrs. Doctor thought she recognized it as twenty four hours to gain as even temperature, and "ripen." At the foot of the middle vat in each row, a large conductor runs to the churn room underneath. To these, the cream is carried by pipes of various lengths from any one the vats, and again transported by adjust able conduits to any particular one of the ten churns below, which are also lined five on either side of the compartment. Under each churn is a drip pan which connects with the butter-milk vat in the basement, and which can be made to connect with the sewer. Each churn yields between 350 and 380 pounds of butter after 30 to 40 minutes of churning. The butter-milk is then drawn off through the drip pans into the vat below, water is introduced into the churns, which are again set in motion, and the butter is washed in two waters, the refuse water being conducted to the sewer. After the but ter has been thoroughly washed, the churns are revolved until the particles have gathered, when the butter is transferred to the

tubs and taken to the butter-working room. Here it is weighed and fifty pounds at a time worked by each of the four large butter workers. It is then salted according to taste of the various customers, put into packages ranging from a half pound "print" to a fifty pound tub, and placed in the cold storage room to await orders for shipment, The building is described as 117 feet long, 45 feet wide, 25 feet in height. The motive power is a 40 horse-power engine, supplied with steam by a 75 horse-power steel boiler. The equipment is capable of anout put of a carload of butter daily.

TRUTH COMING OUT. The revelations in regard to the Bale des Chalcurs railway would be dambfounding were it not that political scandal bas been so rife at Ottawa as to cease to startle any one. Mr. Barwick was bold and direct in his charge that \$100,000 of the railway bonus had been diverted from the purpose for which it was voted, and misapprepriated. The senate eagerly auted upon it, the tory members being ready for any development which would indicate that their party was not the only one beamirched by political rottenness. There was some difficulty in getting at the truth. The chief witness, C N. Armstrong, the contractor, declined to tell all he knew about the bonus until threatened with punishment by the senate before whose bar he was made to appear.

Briefly his story was this : That after the Quebec government had felt called upon to cel the Baie des Chaleurs railway chartes he was interviewed by Ernest Pacaud rela tive to the formation of a new syndicate. Mr. Pacaud was quite candid in his discussion, and stipulated that in securing the transfer of the charter he would have to be paid \$100,000, half of which was to go to the lifting of notes, including those of Mr. Mer cier and Mr. Tarte, and half to himself Mr. Armstrong alleges that after Mr. Mercier sailed for Europe he was summoned to Now York, where he met Messrs. Pacaud Robidoux and Langelier, the last two named the colleagues of the premier, with whom they had travelled some distance on official business. The meeting resulted in the closing of the deal for the transfer of the railway, and at its finish Mr. Pacaud left for Quebec, and Mr. Armstrong for Montreal. The contractor here made out his claim upon the old subsidy. It amounted to \$175,000, but of this sum only \$75,000 reached him. The balance went directly to Mr. Pacaud. The whole sum was raised upon a letter of credit which was issued on May 6th and matured on July 10th. The letter of credit was placed in the Union bank by Mr. Armstrong, and against it five cheques of \$20,000 each were given with the understanding that that they were to be liquidated when the letter matured. In the meantime Pacaud needed money and the managers of the Bank National, Bank du People and Union bank tell how his financing was done. "A certified copy of Pacud's account in the Union bank," says the Mail's cotrespondent at the capital, "shows that some sixty thousand the cheques gave him was placed to his credit on July 10, when the letter of credit matured. From that day until the end of the chapter, Pecaud drew upon his money. On July 11, he drew five cheques as follows: One for \$500, one for \$25,000, one for \$3, C'10, one for \$8,000, and one \$5,000, altogether \$41,500. The day after the letter of credit was matured, on the 14th, of July,

he left for Paris for his health, and with-

A Gallie Find in Denmark. An antiquarian find, which will excite interest all over Europe, has lately been made in Roevemose peat bog, near Hobro in Jutland, Aalborg Amt. The objects are all of silver, the principal piece being a very large basin, on which have been fastened plates of silver hammered out with figures of men, women and animals. The basin is twenty-six Danish inches in diameter, but scarcely eight inches high. One or two pieces are apparently wanting; but it is hoped they will turn up when the moss is minutely examined.

The eyeholes of the figures are now empty, but had evidently been filled with colored glass. One of the plates, which is nearly seventeen inches long, shows warriors, with helmets and other ornaments. One figure is a god with a wheel at his side, and on another are two elephants. A third shows a horned god in a sitting pos ture with his legs crossed oriental wise. All these have apparently nothing to do with northern mythology, as was at first supposed. The whole find has now reached the Danish national museum, and we see that these pieces belong to the god lore of the Gallic peoples. The god with the wheel, for instance, is the Gallic sun god. The whole is the work of a Gallic artist at that early period when the Roman and Gallic peoples first came in contact. Allowing time for these things to wander so far north, the date would seem to be, as regards Denmark, the first century before Christ. Other things belonging to this Gallic group have been found previously in this country. The total weight of precious metal hitherto exhumed is about twenty Danish pounds.-Academy.

The Human Mechanism. Just as every well regulated system of transit possesses telegraphic communications and in places automatic switches and signals, so all parts of the human mechanism are controlled by nerves, the head center being in the brain and numerous subsidiary offices situated in various parts of the body. The organism has advantages over all ordinary systems of transit inasmuch as the arrangements for automatic communication are more complete and numerous than any transit system possesses. And very fortunately is this the case, since all the vital functions, including circulation, respiration and digestion, might otherwise cease to be performed. The mechanism being complete and the food supply sufficient, the growth of the body depends on the multiplication of cells. As to the origin of cells opinions differ, the German school holding that each new cell proceeds from a prior cell, while the French school declares that some cells are produced spontaneously from the plasma. Certain it is that in the lymphatics the white corpuscies of the blood are found in

the vicinity of wounds where repairs have Further, where anything serves to check the flow of this white blood, either by efatics and lacteals or these organs directly, influence we attribute the diminutive stature of the "Liliputians." - New York

'Ye are the children of light. In the night of despondency you will have no chance against your enemies that flock up from beneath, but, trusting in God and standing in the sunshine of the promises, you

shall "renew your youth like the eagle." THERE ARE BLESSINGS A-PLENTY. slake man's thirst, the rock is cleft, and cool waters leap into his brimming cup. To feed his hunger the fields bow down with bending wheat, and the cattle come down with full udders from the clover pastures to give him milk, and the orchards yellow and ripen, casting their juicy fruits into his lap. Alas! that amid such exuberance of blessing man should growl as though he were a soldier on half rations, or a sailor on short allowance; that a man should stand neck deep in harvests lookfeel the strong pulses of health marching | toilet. with regular tread through all the avenues of life and yet tremble at the expected assault of sickness; that a man should sit in his pleasant home, fearful that ruthless want will some day rattle the broken window sash with tempest, and sweep the coals from the hearth, and pour hunger into the bread tray; that a man fed by him who owns all the harvests should expect to starve; that one whom God loves and surrounds with benediction, and at tends with angelic escort, and hovers over with more than motherly fondness, should be looking for a heritage of tears! Has God been hard with thee that thou

shouldst be foreboding? Has he stinted thy board? Has he covered thee with rags? Has he spread traps for thy feet, and gailed thy cup, and rasped thy soul, and wrecked thee with storm, and thundered upon thee with a life full of calamity? If your father or brother come into your bank where gold and silver are lying about you do not watch them, for you know they are honest; but if an entire stranger come by the safe you keep your eye on him, for you do not know his designs. So some men treat God; not as a father, but a stranger, and act suspiciously toward him, as though they were afraid he would steal something.

THANK GOD FOR WHAT YOU HAVE. It is high time you began to thank God for your present blessing. Thank him for your children, happy, buoyant and bounding. Praise him for your home, with its fountain of song and laughter. Adore him for morning light and evening shadow. Praise him for fresh, cool water bubbling from the rock, leaping in the cascade, soaring in the mist, falling in the shower, dash ing against the rock and clapping its hands in the tempest Love him for the grass that cushions the earth, and the clouds that curtain the sky, and the foliage that waves in the forest. Thank him for a Bible to read, and a cross to gaze upon, and a

Saviour to deliver.
