The express running at high speed came upon the excursion train so suddenly the excursion train, demolishing the guard's van and forcing its way through the rear coach. The passengers in the coach were

nearly all killed or injured. The bodies of the dead were carried to the waitingroom of the railway station at Zollikifen and were there lain in rows while awaiting identification. The interior of the station as a result presented a most sickening spectacle for many of the dead were so terribly mutilated as to be practically beyond recognition. The wounded were attended to by the relief corps sent to the scene from the city. Those of the wounded who were in a fit state to be removed have been taken to the hospitals in this city.

The total number of deaths thus far reported is thirteen. Eighteen persons are seriously injured, the majority of them requiring surgical treatment, and some of these are likely to die. Thirty others are less severely hurt.

The recent holiday traffic has thrown un usually heavy burdens upon all the railways centering in this city. The excursion train was partly composed of baggage vans temporarily converted into passenger carriages.

The line was blocked by other excursion line prevented the engineer of the express from seeing the danger ahead, but the passengers of the excursion train heard the express approaching and many jumped out, all the occupants of the open goods wagons escaping in this way almost unhurt. According to the latest advices 11 women and three men were killed and 24 persons were seriously injured. The victims were all Swiss peasants. St. Petersburg, Aug. 18. - In the coming all wholesale legal proceedings against Nihi lists and Anarchists will take place here. Many well educated men and women are charged with having taken part in Nihilistic plots, as students, teachers, merchants, army officers, etc. Few of them will get free, as an indictment is almost as good as conviction. One of the most interesting ases will be that against the niece of State's Counsel Ilinski, indicted for having opened the house of her uncle to conspirators, who met there nights, the young lady presiding.

State's Counsel Ilinski, who is known to be loyal to the government, was entirely un aware of the fact, and, it is said, will not move a finger to save her. The young lady is highly educated, bright, attractive and courageous. They offered her freedom i she would name all the conspirators, but

she sternly refused.

Mr. Parnell's adhesion to certain schemes

of the Salisbury government has displeased many of his old-time followers. They do not see any benefit to be derived from that source. They point to the fact that the estates of Lord Lurgan in Armagh, Down and Ulster counties have been bought by the 806 tenants for an amount equal to about \$1,750,000 under the land purchases act, and if such sales can be made what is the use of following Balfour any further.

Timothy Healy, acting for the McCarthy majority, has informed Mr. Balfour that he will not accept any local government mea. sure which simply grants county councils He says Ireland must have control of her police, of internal taxation and customs, and these the Conservatives have opposed hitherto with unyielding bitterness.

"We are willing now, as ever," continued Mr. Healey in his communication, "to accept Mr. Gladstone's plan, which means real control of Irish affairs by the Irish people and a parliament on St. Stephen's Green. For the moment there is scarcely a possibility of any reasonable measure of relief being granted to Ireland by this parliament, for which Parnell blames the Healvites and for whichon the other hand, the Healyites blame Parnell. There is a positive dead lock. How on earth any party can be benefited by it it is difficult to comprehend. The new organ of the Healyites in Belfast, the Irish News, made its first appearance. EIGHTY-ONE BITS OF SKIN.

Remarkable Operation Performed by the Physicians at the Manhattan Hospital. New York, Aug. 18.—A skin grafting operation performed in Manhattan Hospital aturday morning has caused wide-spread interest among the medical profession because of the large amount of skin which had been procured for this particular operation, and the doctors are giving it their strictest

The patient is Mrs. Mary June Scott, sixty years old, the wife of Joseph A. Scott, a retired horse dealer living at 169th street and Walton avenue. She was badly scalded on July 24 and an immense place on her left hip left bare of skin. For two weeks the physicians in the hospital have been vainty looking for some

The instruments used in the work were a curved pair of dressing scissors and a tenaculum, a steel instrument six inches long with a sharp hook on the end. The skin is hooked up by the tenaculum, and then a piece of skin about three-eighths of an inch ov one-quarter of an inch is cut off with the cisnors. Still fastened to the tenaculum the skin is placed on the wound and the tenaculum withdrawn.

The grafts were placed about three-quarters of an inch apart all over the uncovered

fifteen, then twenty and finally to twenty seven. Dr. Bates had taken ten pieces of flesh from the second reporter's arm as Dr. Ward cut the twenty-seventh piece from his subject's arm. The second reporter then took the seat vacated by the first, and the third bared his arm for Dr. Bates to cut. The third reporter didn't seem to mind the operation at all for his entire attention was centred upon the pretty nurse girl leaning over his shoulder. > The grafted spot was covered with rubber tissue made antiseptic in a solution of boracic acid. A dressing of gauge soaked in the same acid was laid over this and then bound with a bandage of gauze. The wounds on the reporters' arms were dressed with an iodoform gauze bandage, covered with plain gauze. Neither of the three complained of extreme pain for there really was none. It was the anticipation

In three days the graft will have taken root, but the bandage will not be removed from the patient until it is absolutely necessary, which will be about a week. Each graft will grow out until it meets its neighbor and until the spot is covered with skin.

FIGHT WITH WILDCATS. After Mutilating a Physician One Chlor-

Collins, a physician practicing in this vicinity, had a terrible encounter with a wildcat, or lynx, a few days ago in a locality known as the "devil's hopyard." The doctor was driving through the canyon when two wildeats sprang from the boughs of a hemlock tree under which the carriage passed. One of the animals landed on the hannches of the horse, the other dropped into the bottom of the carriage and fastened its teeth in the flesh of

the doctor's leg. The terrified horse ran away and soon freed itself from the carriage. The animal that attacked the doctor strove to set its claws and teeth into his face and throat, This the doctor prevented, but his arms and chest were terribly lacerated, and he soon grew weak from pain. In an inside pocket of his coat he carried a small medicine case. In the struggle this fell out and attracted the attention of the wild cat, who began to claw it and tear it with his teeth. THE MEMBER AND THE ACTRESS. The arrival of an opera company in tow

was hailed with delight by members Parliament last week, who being from home and not members of the Scandal Committee, were dying of ennui. One member from Western Ontario who takes the beef question under his wing and continually urges a high tariff to encourage home pro tection met at his table in one of the hotel a charming but portly actress. On a night when she was not in the cast he bought whole box at the theatre and said he would meet her there after the performance began. But the arrangement leaked out and when he presented himself at the appointed hour he was confronted by a burly actor, who said he could not enter. The member protested that he had hired the box, but was told that it made no difference, he could not enter. One word led to another until the two adjourned to a vacant lot to determine supremacy with fists. After rolling in the mud a few times they were separated by friends. The member retired in disgust and

To-day three mail clerks confessed that they had obtained beforehand copies of the examination papers. It is not known yet how these ad vance copies were obtained, as great care is exercised at the Printing Bureau. The clerk who is alleged to have furnished some of the papers is at present out of town.

Paris, Aug. 18.—The French African Committee has received news of the Crampel massacre in the shape of a telegram to the Colonial Under Secretary. which says that Leago, a child in firm. service of Ben Said, reached M. Tiscarrat W. at El Contil on May 23, and narrated the massicre of Ben Said and Crampel While there, he said, a party of Mussulman travelers arrived and offered their services to Tiscarrat as carriers, but in reality they had come for the purpose of murdering him They had intended to wait till Lebout arrived and to kill both the white men, but being recognized they attacked Tiscarrat

and killed him with their knives. The fate of Labout is uncertain, and news of him has been received. Command ant Brunthe of Dybowski expedition has pushed ahead, and will establish a post 200 cilometers from Guboughi on Crampel's

THE HOUSE OF COMMONS

Growth of Best Root Sugar to be Bonus OTTAWA, Aug. 18 .- The greater part of resterday's session of the House was taken up by the Government, and fairly good progress was made. The principal neasure under discussion was the quesion of the bounty on beet root sugar, the debate eventually resolving itself into one of free trade and protection. The attendance in the House was very slim, many members

being beguiled away from their parliament ary duties by the circus. The question is now frequently being put as to when prorogation will take place. Mr Laurier is credited with having stated that he sees no reason why members should not

be leaving for their homes two weeks from Wednesday or Thursday. A bulletin on sugars, syrups and molasses will shortly be issued by the laboratory branch of the Inland Revenue Department It contains the results of the analysis of 100 samples by Mr. F. W. Babington, assistant to the chief analyst. The white granulated sugars were found to be practically pure. and yellow sugar were also found to be genuine. The only adulteration detected was in syrups, three of them being found to

be mixed with the starch of glucose. The Italian | Harvest. ROME, Aug. 17. - The Italian harvest reports indicate this years' crops will equal those of 1890. Recent rains have greatly improved the Indian corn crop, which promised to be good. of rye at all Russian ports. Eight thousand tone have left St. Petersburg in eight days. Mixed rye and wheat flour was offered for the first time on the produce exchange to. day in large quantities. The mixture is much cheaper than pure rve flour. Bentin, Aug 18 .- Owing to the excessive price of rye the Government has decided to use wheat in making bread for the army. The Reichsanzeiger announces that at a cabinet council to-day it was decided that no necessity exists for a reduction of the duties on corn, but on the contrary it was more necessary than ever to adhere to the policy announced by Chancellor Von Caprivi in the Lower House of the Prussian Diet on June 1 last. The Chancellor then announced that the Government had decided to maintain the corn duties saying that

were arranged. This decision created much dissatisfaction at the time. Carreago, Ang. 18 .- It is said that not one Chicago man has made a cent on the wheat market and there are few who have not lost mere by less during the excitement. Many now have their entire fortunes at stake and are buying and selling at the same time to protect themselves. New York are reported to have made the most money. One prominent broker held that it was "farmers' market." The ad vance to the farmers, he said, had been over 20 cents a bushel. Opinion among dealers and brokers is unanimous that heavy buying by foreigners is at the bottom of the present
