Annoyances of life if you would be happy. A very slight headache will make us miserable and give a sense of discomfort to all with whom we come in contact. Nature's intimations are seldom pleasant, but they should be valued as pointing out a cause and demanding a remedy. Use of the Beaver's Tail. It is a common belief that the beaver uses

its tail as a trowel to plaster the mud on the walls of its house and dam. Capt. Hardy studied the habits of the animal in Nova Scotia some time ago, and came to the conclusion that this opinion was not well

The vulgar opinion that the broad tail of the beaver was used to plaster down the mud in its work has long since been pronounced erroneous. Its real use is evidently to coun' terpoise, by an action against the water in an upward direction, the tendency to sink, headforemost, when propelling itself through the water by its powerful and webbed hind feet, and at the same time supporting the load of mud or stones in its forepaws under the chin.

Our Indians laughed at the idea of the trowel story. That, and the assertion that the tail is likewise used as a vehicle for materials, may be considered as exploded notions, - Youth's Companion.
