Car Shops Closed Down.

PERTH, April 12.—The car shops have closed down and there are in consequence a great many men about town anxiously looking for work. The C. P. R. have been spending so much money in construction that they are now hard up, and they have also at present all the freight cars they require. At Montreal things are not much better, the force there being greatly reduced and the men employed only working on half

Gets Its Guns Back.

LONDON, April 12.—The field battery of the Honorable artillery company celebrated the return of its guns from Woolwich last night by a big supper. Capt. Fry, who presided, read a cable from the Honorable artillery company of Boston congratulating them on their victory, and hoping that the cordial relations between the two companies would always be maintained. The hope was expressed that the Prince of Wales would be induced to take the command of the regiment again.

They Should Wear Dr. Walker's Garb. CLEVELAND, April 12. - About fifty girls were discharged from the Chapin nut and bolt works because they were in constant danger of having their dresses caught in the machinery. The girls were not thankful for their deliverance from accidental deaths, and when the boys who were hired to take their places went to work yesterday the discharg. ed maidens, assisted by all their female relations, assaulted the new hands with clubs, bricks and stones. The boys, several of whom were considerably injured, took refuge inside the building, which was then treated to a shower of missiles from the enraged Amazons.

A Fire in Brooklyn.

BROOKLYN, April 12. - Buchanan & Lyall's Fine Diagonals jute factory, Brooklyn, took fire while 300 girls were working overtime. Two girls were badly burned. The building valued at \$400,000 is a total loss.

NEW YORK, April 12.—The loss by the burning of the jute mill, in Brooklyn, this King Street; six rooms and extension kitchen: morning, will amount to \$600,000. All the grate and mantel in parlor, water, etc. Room inmates were resumed but there inmates were rescued but there were many narrow escapes. Within five minutes, after the girls har been rescued, the boiler blew up with a great explosion and shortly after this, the entire building trembled. Opposite the jute factory is the tobacco factory of the same firm, Buchapan & Lyle, and close to that is a flat house, four stories high. The occupants fled in great alarm. When the boiler exploded the roofs of six houses adjoining the jute mill on fire but the flames were extinguished. The property was insured on the co-operation plan.

THE RUSSIAN HEADWAY.

PERSIA HAS CEDED THE CZAR AD-DITIONAL TERRITORY.

And a Visit Has Been Arranged For the Young King Alexander of Servia to the Czar With a View to Impressing Him With the Necessity of Friendship For Russia.

London, April 12 - A dispatch announcing that the young King Alexander, of Servia, is going to Russia in August for the purpose of meeting the czar at Charkoff, has revived statements that Servia has irretrievably drifted away from Austria and is completely under control of Russia. Whether this be true or not, there can be no doubt that the czar will take occasion at the coming meeting to impress upon the mind of the boy king, and the Servian officials who will accompany him, the advisability of cultivating Russia's friendship and deferring to the wishes expressed by her representatives.

In casting about in search of an incentive to the young king's visit to Russia, one need go no further than the vouthful monarch's mother. Queen Natalie having been advised that her presence in Belgrade at this time would place her son in an embarrassing position, has doubtless influenced the step proposed to be taken by the latter, in order to commit him to the pro-Russian leaning she so ardently desires him to exhibit.

The Servian regency, headed by M. Ristics, could scarcely be expected to oppose Alexander's deference to his mother's wishes in this respect, since the domination of Servia by Russia is a thing they have in dividually worked for on every opportunity that has presented itself during the last few years. It may therefore be regarded as settled that the march of Russia toward the conquest of the Balkan states will not be long delayed.

The cession of additional territory by Persia to Russia indicates the renewal of Russian operations, ostensibly against Afghanistan, but really against India at no distant day. Gradually the northern empire is absorbing all of the strategic points surrounding the northern portion of the ameer's dominion, and there will be little delay in organizing an offensive movement after she gets them.

READY TO TAKE EVIDENCE.

Sir Charles Russell Congratulated on His Speech Before the Commission

LONDON, April 12.—Sir Charles Russell to-day concluded his speech before the Parnell commission, in defence of the Parnellites. He undertook to show that the money Parnell gave Byrne, which the prosecution allege was given for the purpose of enabling Byrne to escape was meant by Parnell to be used for the ordinary purposes of the National league, and that Parnell did not know Byrne was in peril of arrest.

"The court," Sir Charles said, "was trying the history of the Irish revolution. He asked that fair and generous consideration unhealthy in that country where the people considered the imprisoned members of the house of commons heroes and martyrs." Sir Charles declared he did not speak merely as the advocate of the accused members of the house of commons but for the land of his birth, and he believed in the best interests of England, the inquiry which was intended to be a curse had been a blessing. In had been designed for the purpose of ruining one man but it had proved the means of his

There was a sensation when Sir Charles concluded his speech. It is the general opinion that he never spoke better. When Rochester has for two days been considering Hannen passed a note to him in which he said: "I congratulate you; your speech was a great one and worthy of a great occasion." The archbishops of Dublin and Church of Scotland colonial committee the Cashel will be among the witnesses who sum of £50 for Queen's college bursary will testify for the defence. The court adjourned until April 30th.

DOUBLE-HEADER DIVORCE.

A Chicage Woman Separated From Two Husbands at Once.

CHICAGO, April 12.—Two men secured divorce from one and the same woman in Judge Jamieson's court. Matilda Freud married Aaron Poretzke in 1885, and after quarrelling for two months Matilda deserted Aaron, and, without going to the trouble of securing a divorce, she married Philip Ru-

Rudolph and she lived together until 1888, when he discovered she had another husband. He caused her arrest for bigamy. but she was discharged. Then both Rudelph and Poretzke sued the fair Matilda for divorce, the former for bigamy and the latter for adultery. Both men had the same lawyer. The evidence in the case of Rudolph did very well for the case of Poretzke.

A HORRIBLE CRIME.

Death-Quarrelled and Killed.

KANSAS CITY, April 12. - Yesterday, at Bramin Hill, Kansas, were found the bodies of Wilhemina Seiderick, a widow owning a farm, and Jacob Schaller, the hired man. Both had evidently been dead several days. The woman had been shot in the mouth, abdomen and breast, while the man had a fatal wound back of the ear. Schaller had been working for the woman for years, and the neighbars say they frequently quarrelled. It is supposed to be a case of murder and suicide. Mrs. Seiderick's first husband hung himself, and her second husband died under mysterious circumstances.

A Danish Vessel Abandoned.

QUEENSTOWN, April 12 - The Inman line steamer City of Chester, from New York, arrived to-day. She reports that on April 8th she passed the Danish steamer Denmark, from Christiana and Copenhagen for New sea, and her bow stood high out of the and suckers. water. She was apparently sinking. The Denmark was a vessel of 2,260 tons, and be longed to the Thing Valla line. She was commanded by Capt. Knudsen.

A Meat Cencern Collapses.

NEW YORK, April 12.—It is reported that the American meat company has collapsed. The company incorporated had in New Mexico 1,859,000 acres of land and 230,000 head of cattle. The authorized capital stock was bear upon the company by Armour & Co., of Chicago.

THE OUTLOOK IN NAPANEE.

The Subjects That Are Agitating the Minds of the Residents.

Allen R. Davis, civil engineer, one of Napance's rising citizens, left on Tuesday for Nova Scotia, having been appointed, by the dominion government, assistant engineer on the Annapolis & Digby railway, through the influence of U. Wilson, M.P., no doubt His headquarters will be Annapolis, the garden of the "Mayflower province."

Navigation is now open on the Napanee river, the first steamer of the season arriving in port from Deseronto on Wednesday. is said that the ice is not yet all gone in Big bay, near Belleville, or in Picton har-

There is some excitement in town about the issue of liquor licenses this year. The number of applicants for both tavern and shop licenses is large. Some leading temperance men, discouraged about the Scott act defeat, favour giving licenses to comers, so as to make the business as abominable as possible. Some strong anti-Scotts are anxious to limit the number to a very few. It seems anomalous that while in Kingston, Belleville, Ioronto and other places the temperance workers are agitating | agreed that the system of paying commisfor large reductions, here there should be an agitation in the contrary direction. Is it not the correct temperance view to have total prohibition, if possible, or else prohibition to the largest possible number?

The probabilities are for a fine new high school building in Napanee this year. The present building is too small and the site unsuitable. A plot of some acres was obtained a year or two ago and the new build-

ing will soon be proceeded with. Building prospects are very dull in Napanee this year. There are already too many shops and dwellings for the number of occupants, the population having fallen off some hundreds in ten years. No "tall chimneys," so long looked for, to loom up yet, though taithful N.P. men have long desired to see their days. It is feared some, at least, will die without the sight of them. There is no evidence that even the present dormant factories will open up. Napanee has splendid water power and good manufacturing facilities but sadly needs manufactures.

The farmers throughout Lennox will probably begin their spring work at once. Snow and frost are about gone and the soil is quite dry. There has not been a rain yet this season. What, is another dry season before us? The idea is appalling, the result ruinous to hundreds now badly straitened by the short crops of the past three years.
