RICHNESS OF THE ROCKS.

WHAT IS THE BEST MODE OF WORK ING THE WEALTH OUT.

Joseph Bawden Tells the Business Men of the Greatness of the Mining Interests of the County-The Government's Portion of Work Required in Developing the Industry.

President Muckleston, of the board of trade, said at the meeting last evening that the mining interests of the county should be considered by the board. He introduced Joseph Bawden to speak on the matter. That gentleman delivered an able and practical address. He stated at the commencement of his remarks that he would give them some information regarding the mineral wealth of the county of Frontenac in which he had spent all his life, excepting one year. The mining territory is some 2,500 miles in extent. They would have to draw upon their imaginations while he endeavoured to trace on a small map he had before him some of the outlines of the mineral formations to be found in the county. He alluded first to the lead formation which first presents itself a few miles from Battersea, near Dog Lake. The formation was traced across to the township of Loughboro, and where there are the richest lead mines in Frontenac. It continues overlaid by other formations until it appears in Bedford and Fermoy. They knew nothing more of the lead veins than was given by Sir William Logan in 1863. They knew, however, that the formation was an extensive one and continued across the St. Lawrence. The lead bearing resources, they had every reason to believe, are considerable. There had been great progress made in the metallurgy of lead and in other minerals during the last fifteen years. It is now melted with a greater percentage of profit than heretofore. The lead bearing formation carries with it half spar such as is found in Oso.

The next mineral in point of geologic time found in the Laurentian range. It is phosphate of lime. The course of this formation it would be imposible to lay down. They know that it was found in different localities. Mr. Venuor stated it was not only in a state of formation in the county, but that it actually continues in the deposits of the Ottawa valley. Phosphate veins came to the surface in Storrington, near Lake Opinicon, passing westward to Loughbore. It is also found in Bedford, Portland and Hinchinbrooke. He referred to the large amount of phosphate discovered in the Foxton mines, near Sydenham. This property was recently sold for a large sum of money. The phosphates when worked to any depth have proved to be as rich as that found in the township of Buckingham. The demand for this mineral is increasing. The phosphate veins in the county are the richest in the world, and the supply is very large. It rested with the board of trade to a great extent as to whether the phosphate mines shall be developed to the extent they are capable of being developed.

Every load of phosphate brought to the city over the Perth road costs 30c. per ton, paid in toll. The road was probably as bad a road as could be found in the world. In his boyhood, some thirty years ago, when he was a reporter, he attended meetings in the city when gentlemen discussed the advisability of macadamizing the Perth road. This road is still a toll road and is is very little better than it was when he was a boy, notwithstanding all the money that had been spent upon it. The present condition of the road is a serious drawback to the mineral interests in the township of Loboro and the northern part of Storrington. If these dispricts were as rich in minerals, as he believed they were, it would pay the city to take action for the removal of the tolls on the Perth road. If the tolls were removed, and the road repaired, the farmers would some to the city and purchase their supplies.

Mica was found in the phosphate veins. The mining of brown mica has been dereloped to a large extent by the firm of Smith & Lacey, of Sydenham. The demand for this mineral is increasing. It is used in electrical appliances. A representative of the firm of Thompson & Houston, manufacturers of electric lighting appliances, has secured for thems several mica properties in the county. There is also white mica | Sons. The recipients of all other prizes as

The wealth of the county in iron ore was discussed. Hematite ore had not been as yet developed to any extent. He described the different formations of iron ore at different points. At Sharbot Lake there were promising deposits of ore that are not yet analyzed. They need not think of developing the mineral resources in the county of Frontenac in the direction of the smelting and manufacturing of iron ores until they get the government to stop granting land free to settlers. Every acre of wooded land represented fuel enough to make twenty tons of ore, and is worth in fuel at the furname \$100. The woods are being destroyed by settlers in order that they may be established in homes. The settlers in many cases proved of little or no use to the country. The amount of timber that has been recklessly destroyed in this county to further the illjudged scheme of colonization is beyond the power of human language to say, and beyoud the conception of members of the board. The destruction goes on day by day.

He then alluded to the fact that not one dollar had been spent by the government in a scientific direction in connection or with regard to the development of the mining industry. He did not know of one mining expert ever having been employed to open up the mines of the country. If they had lost money in opening up mines it has been due to that cause, by which money is often lost, ignorance. Diamond drilling in mines, which should be done by skilled men, has been left to boys and men who knew nothing of mineral productions. The borings from mines, which should have been preserved in order that the extent of the minerals could be spelled out, have been strewn about the country. In the Gogebic range, where minerals abound, and in Sweden, specimens bored from the mines are kept on exhibition. Scientific experts must be employed if the mining industry in the country is to be developed properly. If they wanted to do anything towards furthering the mineral interests of the country, and the greatest interest is iron, they would have to secure proper investigation by men who are competent and who have made it a subject of scientific study.

There is a better outlook for the manu facture of crucible steel now than there ever was, and they could demonstrate that they can make as good iron in Canada as there is in the world. They would also be able to supply a large portion of the United States as well as Canada, with crucible steel of the best quality. He also made reference so the way iron ore was roasted in Sweden.

Ald. Gildersleeve contended that the roasting of the iron was a separate industry, and he thought it would pay to engage in it. It would do more towards the development of the mining interests in this section than any one thing that could be advised.

Ald. Muckleston thought it would be advisable for the board to ask the city and county councils to co-operate in the matter of employing experts to investigate the mineral wealth of the county.

Mr. Bawden thought the government should be asked to withdraw from settlement the timber lands in the county. They should be kept for the manufacture of iron. They should not be sold. If they employed a Swedish mining expert and got him to travel over the mineral ridges in the county, they would have in the course of a few months information regarding the mineral resources that would surprise them and the world. By this they would have the advent of capitalists into the city. The destruction of the forests should certainly be stopped.

H. Crothers-"What would it cost to em ploy a mining expert."

Mr. Bawden-"A man could be got from

Sweden for \$200 per month." Mr. Macdonnell said the subject of developing the mining interests of the county was one of great importance. The citizens should be thankful to the members and president of the board of trade for bringing it before them. He thought a further discussion of the subject than they had would be profitable, and lead to great results. He thought that the wealth of Frontenac was to be found in the rocks. It is certainly not in the agricultural lands. If wealth can be found in the rocks it would be a good scheme to work it out. He would like to hear the views of Prof. Dupuis, of Queen's university, on the subject. He was unable to be present, but could attend another meeting. He knew of farmers bringing in specimens of ores to the city, who knew nothing about them or their value. I there was an expert here to examine the ores, he might prove of great value to the city and country. Ald. Fenwick thought the subject requir-

ed more discussion. He moved "that the board tender a hearty vote of thanks to Mr. Bawden for his able address, and that he be requested to submit the paper he had read to the executive council of the board for action, and that the meeting adjourn for a week."

Ald. Shannon and R. J. Carson were also of the opinion that more discussion should be heard regarding the mining interests of

Ald. Fenwick's motion was carried. FIRE ON KING STREET.

It Was Lucky That it Was Discovered so Soon After Breaking Out.

"Fire! Fire!" were the words Officer Timmerman loudly shouted at four o'clock this morning while on Princess street. At that time smoke was bursting out in large clouds from the premises at the rear of the Collender hotel. The bells were rung vigorously and very soon a large crowd of people congregated.

In the meantime Officer McCullough had alarmed T. Doolan, and the people living in close proximity to the blaze.

The chemical engine, drawn by two spirited bays, and driven by J. Lemmon, pulled up at King street. The compounds were let loose on the flames, but they were not subdued until the steamer Merry weather began working. The firemen worked quickly and kept the flames from crawling over the roofs of buildings at the rear of the stores, occupied by Messrs. Grass, Salter and Horton. The fire soon destroyed the laundry connected with the hotel and by means of a canvass awning reached the top of the billiard room, completely destroying its roof. A room at the back of the billiard parlor was also gutted. The billiard room was badly damaged by water.

The property is vested in the Kingston rectory. The buildings destroyed were insured for the church in the London, Liverpool and Globe insurance company for \$1,250.

The buildings at the back of the hotel were put up by T. Doolan. He did not have them insured. It is the intention of the church authorities to replace the buildings destroyed.

Art Competition.

Charles Wrenshall, principal of the art school, has received an announcement from Raphael luck & Sons, art publishers, of their grant of prizes, amounting to 500 gaineas, open to the competition of art students and amateurs only, at an exhibition to be held in January, 1890, at the galleries of the Royal Institute of painters in watercolors, Piccadilly, London. The paintings receiving the three first prizes of 50 guineas each will become the property of Tuck & well as unsuccessful competitors, may have their pictures sold for them. The rules regulating the competition are too lengthy for publication. They might be obtained on application to Tuck & sons, 298 Broadway, New York.

Kingston General Hospital.

At the monthly meeting of the board of governors on Monday six births were reported for April and one death. There were forty-four patients at the beginning of the month and forty three at the end. Hon. G. A. Kirkpatrick, E. Chown and Dr. Fenwick were appointed a committee of management for ensuing six months. Acknowledgement was thankfully made of donations from St. John's church, Bath, and Mr. J. Laidlaw, of Kingston, the latter giving his fees as a grand juror, a good example. The accounts were passed, and action taken to enforce the closing up or extension of a private drain leading into the hospital grounds. It was resolved to apply for a larger grant from the city corporation or restrict admission until the hospital was self-sustaining.

His Arms of no Use.

On Monday a serious accident occurred at McLaren's Mills, Mississippi. A man engaged in the mill, named Penman, had a horse attached to a car which he was running down to the mill. The car was going too fast, so that when he went to take the animal away the car passed over his left arm, he having been knocked over by the force. The arm was lacerated so much that it had to be amputated. His right arm was also broken, the horse having tramped on it when he fell. He arrived in the city last evening and was taken to the hospital. His right arm will not be amputated.

Boycott at Cape Vincent. The W. C. T. Union, of Cape Vincent, has been circulating a petition, largely signed, asking the excise board net to grant any saloon licenses, and to raise the hotel licenses to the full extent of the law. There is not much probability that the excise men will grant the petitioners' desires. There are threats, on the part of liquor sellers, to boycott business men who signed the petition. This is an error on their part. Men who violate the law are not in the best shape in the world to threaten.

FYLED IN LONDON TOWN.

THIS IS WHAT THE HIGH COM-MISSIONER REQUESTS.

The Board of Trade Think Favorably of the Scheme-Honorary Members, Selected From Many Towns, Placed on the Rol - We Thank Thee Sir Knight For thy Kindness.

A regular meeting of the board of trade was held in the council chamber last evening. The president, John S. Muckleston, presided. There were present: Messrs. Hague, Brownfield, Porteous, Dodds, H. Crothers, W. J. Crothers, A. Hanley, J Hewton, S. J. Harper, J. McKay, Alds. Minnes, Gaskin, Shannon and Gildersleeve, A. Chadwick, P. Carroll, W. McRossie, J. Stewart, Dalton, W. B. Leslie and G. M. Macdonnell.

A letter was read from Sir Charles Tupper, the high commissioner for Canada in London, England, in which he stated that the reports of the board of trade of Kingston should be on file in the Canadian governments offices in London for the use of the public and for other purposes. Up to the present time no reports of the board had been received. Reports for four or five years were asked for. The interest in Canada, arising in England, demands that all information regarding the country should be 'accessible, and the reports of the board would be valuable references.

In a short communication, Mr. Lacey, Sydenham, stated that the general development of the mining interest in the county was a question of prime importance, and of especial interest to Kingston. This question was particularly important owing to the present depressed state of the agricultural interests. An effort should be made to form a market in Canada in which the farmers could sell to advantage the products of mines. A mine employing thirty or forty men would have a monthly expenditure of from \$1,800 to \$2,000. The govern ment would, by granting bonuses to test the minerals, advance the mining interests greatly.

The following report of the council of the board of trade was read :

"As instructed at the annual meeting, we we have drawn up a list of merchants and traders from the surrounding district, to be elected honorary members of our board, which will be submitted to you. Your council feel that as our railway extension is now fairly assured, the mercantile co-operation of the honorary members, to be elected this evening, must result in some good both to the extension of trade of the city and the development of their respective localities. We consider that some action should be taken on the letter from the Canadian commissioner in London, and as a proper report of our city's position, on file in the Canadian government others, London, would be of material benefit to the advancement of our city, it was recommended that a special committee be appointed, and a communication sent to the city council asking their co-operation. The report should point out our position, railway and steamboat services, population, debt, assessment, and especial attention drawn towards the character of the mineral deposits in the county. Should the city wish to borrow money in England capitalists could be directed to the reports (which should be sent yearly) in the com-

missioners' office. "The question of advancing the mining interests of the country to our north, and the general development of our mineral deposits is one that should be taken up by the board. If a scheme com.d be devised and carried into effect by a joint action of the city and county councils, whereby mining experts (on whose report capitalists could depend, and which would to a great extent remove the speculative element from the mining business) would be employed to make a report of one section, say of a township, beneficent results to county and city would follow. The small expenditure such a survey would cost would be nothing compared with the results that might follow and perhaps lead to the establishment of some manufacturing industry connected with minerals in our midst. We hope some action will be taken on this important sub-

The report was adopted. It was moved by James Minnes and seconded by George Fenwick, that the following be elected honorary members of the Kingston board of trade. That the board pledges itself to assist as far as possible the development of their respective localities, and their co-operation in extending the commerce of Kingston is respectfully invited : J. Hayden, Camden East ; E W. Benjamin, Yarker; J. P. Lacey, Sydenham C. H. Finkle, Newburg; W. D. Mace, Tamworth; M. Avery, Sharbot Lake George W. Dawson, Plevna; R. Finkle, Bath; B. Crysdale, Northport; G. Easter brook, Tweed; J. S. Neilson, Amherst Island; E. J. Baker, Wolfe Island; E. W. Rathbun, Deseronto; J. D. W. Darling, Lansdowne; J. R. Dargavel, Elgin; J. R. Leake, Morton; J. B. Tett, Newboro; H. Green, Lyndhurst; G. Hawkins, Seeley's Bay : - Parish, Athens ; W. C. Caldwell, M.P.P., Lanark; D. B. Booth, Odessa; W. T. Crandall, Picton; C. Vanluven Moscow; W. B. Mills, Arden; W. H. Fredenburg, Westport; A. Gallagher, Portland. The motion was carried.

It was moved by Capt Gaskin, seconded by Mr. McRossie, and carrried, that the following be elected members of the board of trade: Messrs. G. Seers, E. Williams, Capt. Moore, R. S. Patterson, J. Bawden, James Stewart, G. Creeggan and J. S. Skinner.

On motion of Mr. McKay, seconded by Mr. Harper, Mr. Minnes was elected second vice president of the board in accordance with Mr. Robertson's motion at the last annual meeting.

Mr. Minnes thanked the members for the honour they had conferred on him. He would just as soon have been a private in the ranks, but as they had chosen him second vice-president he would do all in his power to forward the interests of the board.

Moved by Capt. Gaskin, seconded by James Stewart, and resolved, "That this board is placed under a debt of gratitude to the Right Hon. Sir John A. Macdonald, acting minister of canals, for his great kindness in acting so promptly to our request to have the St. Lawrence canals opened this spring at as early date as possible so as to allow the forwarders to get their barges up from Montreal to meet the fleet of vessels that were known to be loaded with grain at west ern ports and destined for Kingston. As a matter of fact the canals were opened on April 22nd, ten days earlier than usual, and it is well understood that it required great exertion to accomplish even this, yet it was great relief to the forwarders and it also enabled the owners of the cangoes to get their grain forwarded and saved the city of Kingston from being discredited as a transshipping point." It was also recommended that a copy of the resolution be sent to Sir John Macdonald by the secretary and that the board trusts that this will be the commencement of an earlier opening than in

former years. - Carried. Mr. Leslie said he would have been glad if the government had decided to place buoys and lighthouses in the channel in order that steamers might have been saved from breaking their wheels.

POLICE COURT INCIDENTS.

Some of the Scenes That Are Enacted Before Colonel Duff. He was delapidated in appearance. His clothes were shabby and ornamented by extensive rents. A tough looking garment,

meant for a coat, hung loosely over his arm. His face was partly covered with blood, and looked as if it had been beaten with a

"Where did you come from, Shields?" said the colonel.

The poor, dejected man, said: "Your honor, I came from Brockville. I tried to get in the hospital here, but was refused. I am sick in body and I want to go to gaol. I went from Cornwall to Brockville, and from there I was sent to Kingston. I was in an hospital at Montreal, but when I got well I was let go. My ailments are a pain in my left chest, a sore throat, and catarrh." "Poor fellow. I will send you to gaol for

a month," said the magistrate. Little Jimmie Patterson was in the dock again to-day. His mother was in court and said she would take care of him if he would obey her. He was disobelient sometimes. She worked for a living and was unable to watch him properly. He went to school a few days last month. She gave him away once to a blind man in Wilbur, but the boy would not stay away. Jimmy will be eleven years old in June. His mother sent him to Sunday school and church but he played truant.

The magistrate thought the truant officers should have seen that Jimmy went to school. The mayor agrreed with the mag-

Mrs. Patterson is from Gananoque, and has been a resident here for eight years. The boy was allowed to leave the court on promising to go to school. A smile lit up the little fellow's face as he toddled out of the court room.

J. Turbett and J. Broderick, two young lads who live in the vicinity of lot 24, decided to have such a celebration on Sunday evening last as would astonish the residents of Barrie street. In Edward Hopkins store, notwithstanding that it was a holy day, they purchased four bottles of pop, and fireworks in the shape of rosettes. Officer Small heard the crackling of the fireworks, and arrested one of the kids. Hopkins denied that he sold the goods on Sunday, and stated that Broderick and Turbett belonged to a gang of young rascals that continually tormented him and his wife. He said that the magistrate might as well believe Carey, the informer, as the evidence of the boys. Hopkins was fined \$10 and costs and given time to pay it. Sentence was reserved in the case of Broderick and Turbett.

PERSONAL MENTION.

People Whose Movements, Sayings and Doings Attract Attention. T. Twigg, of Ottawa, is visiting friends in

the city. Dr. W. A. Lavell and wife, Smith's Falls,

are in the city Dr. White, Casanovia, N.Y., is visiting

his father on Gordon street. Mrs. E. Offord, sr., left to day for foronto, where she will reside with her son

Miss Rhoda Rees left yesterday for Toronto to wait on her sister, Mrs. Brown lee,

who is very ill. James Marrigan, Deseronto, has returned

to Nova Scotia to resume work on the Chignecto ship railway.

Joseph Kellar and family, of Deseronto, left last week for New York state, where they will reside in future

Messrs. Dunham and Rockwell have purchased two lots on Horse Shoe Island, They will erect summer residences on the property. They went to the island to-day. H. W. Van Every, city passenger agent R. W. & O. RR., has been presented with a handsome gold-headed cane by gentlemen of Toronto who have travelled on his New 1 ork excursions.

Rev. George F. Brown, formerly book keeper at Belleville for the Rathbun company, is pastor of the Melbourne, Que. Congregational church. A new church is being built for him.

Rev. H. C. Dunsmore, who worked in connection with the Savage band some time ago, and held gospel meetings in the Y.MC.A. during the camp of 1887, is settled in Fennville, Mich.

H. Wolliver, conductor on the K. & P. R., arrived to day from Montreal, where he has been spending a few holidays. He will leave to morrow for Denver, Colorado, to attend a conductors' convention to begin on the 14th instant.

The bishop of Kingston and a large num ber of priests attended at the month's mind in remembrance of the late Father Walsh as Trenton. This favorite priest was so dear to all his acquaintances that the eartern pastors of the diocese commemorated the event in Prescott, where he acted for a time

MARINE INTELLIGENCE.

Paragraphs Picked Up About the Wharves -Notes of General Interest.

The schr. B. W. Folger is loading lumber

for Oswego. The barge Manitoba is going on the Cata raqui dry dock for repairs.

The schr. Idlewild arrived from Adol phustown with sand yesterday. Capt John Donnelly will bring his yacht

from Oswego to Kingston to-morrow. The prop. Rhoda Emily has been charter ed in Chicago to bring corn to Kingston. The steamer Persia arrived this morning from St. Catharines on her way to Mon-

treal. The yacht Ella has received extensive repairs and a new dress of black paint, which

becomes her well. The repairs to the yacht Katie Gray are about completed and the famous racer looks speedier than ever.

The tug D. G. Thompson arrived from Montreal yesterday morning. She will be painted before sailing again. Captain Ryan, of Buffalo, the owner of

the burned propeller Lake Ontario, is going to rebuild her at once at Charlotte. The shipment of grain is not as brisk as it was a few weeks ago. The lake boats are two weeks ahead of the ocean steamers at

The steamer Norseman will not make her regular trip until flureday. The trip to Port Dalhousie has taken her considerably

longer than at first anticipated. Two Canadian sailors charged with being drunk and disorderly conduct pleaded guilty in Oswego. One was assessed \$10 and the other, who attacked the officer, paid

The yacht Aileen, of the Toronto yacht club, after being out of commission a season is being fitted out and her owners are trying to arrange a race with the owners of the Oriole.

Special Notice.

The books of the Canada Life Assurance company will finally close on the 13th inst. In order to secure two years' profits next year application must be made by that date. The new business for the year just closing is the largest in the history of 'the company. The profit results of this old and reliable are not attained by any other life company doing business in the dominion. All necessary information can be obtained at the office here, 92 Brock street.
