the simple name;

BY THE AUTHOR OF "PHYLLIS." A warm bright day in golden June; a crowded park; a rushing of dainty wind soft and pure, such as one seldom feels in this smoky London of ours; and over all a brilliant sun, grown drowsy now, as it seeks its rest, and sinks languorously into the fond

arms of evening The stream of carriages is growing thinr.er, the princess has disappeared. One young turn riding a handsome chestnut in a somewhat careless fashion, as though his thoughts were elsewhere, quits the Row, and turns toward the ugliest thing in creation. Having eached the Albert Memorial, he passes brough the gate a little further on, and finds imself presently in the midst of a hopeless angle, composed of cabs, hansoms, drags,

Something in the jangle disagrees with the chestnut's temper. She starts, throws up her sleek head into the very midst of her master's day-dreams, makes a false step, and comes heavily to the ground, flinging her rider, with a horrible crash, right under the wheels of a passing carriage.

It is all done in a moment. There is a cry from the bystanders, a vain attempt to make a clear space, and then a senseless form, soiled and disfigured with dust and blood, is raised by half a dozen rough, if kindly, hands and conveyed to the nearest hospital. They pull the bell, and the door being opened, they enter with their ghastly burden, and lay it down within the hall; it is all that remains of the careless gay young man, so full of happy life, who had left the park only a

The house-surgeon, passing through the hall at this moment, easts a sharp glance at the unsightly object on the bench. "What is this?" asks he; and, coming nearer, bends over it. His face changes. "Good heavens! It is Sir Rawdon Dare!" he exclaims, in a horrified tone. "Send the matron here at once. See what has happened," he says presently as a tall handsome woman comes hurriedly up to him. His tone, though low, is agitated,

"An accident?" says she, stooping, in turn, over the prostrate baronet. "And a very serious one. It is Sir Rawdon Dare. Is there a special ward?" "One empty."

There is a touch of curiosity in her glance as she examines the death-like features beneath her. "Let him be taken there. It is impossible he can be conveyed to his own house in his

present state." "It is a chance whether he will ever be conveyed there-alive," says the matron, turning away to give her orders.

"There is another thing," says the surreon, detaining her. "He must have a careful nurse. You can recommend one from the wards?" "Certainly," says the matron, pausing as

if to consider. There is a good deal of kindly interest in her compassionate, if somewhat austere, face, as she gazes at the poor crushed figure; just as kindly, however, would she have looked at him had he been the veriest beggar that crawls our streets. "There is Nurse Eva," she says hastily; "she can undertake the case. She is both careful and

DO NOT JOURNEY IN PRICES. IS YOUR And now the wounded man, mercifully oblivious to his pain, is carried by experienced tender hands to a small private ward, and laid upon a bed. The doctors cluster round him. A young woman in hospital cap and apron comes quietly into the room, and stands beside the bed. She glances earnestly at her patient.

Surely that poor blood-bestained creature can have no life in him? There is a long pause; then one of the doctors, who has been stooping over the senseless figure, lifts his

The window was open, and beyond, in the outside distance, there was a waving of green branches, and from still further on there came to him the subdued roar of unsubdued populace. Inside there was some very curious furnitureor, at least, so he thought it, as his languid glance traveled over it-a huge branch of

erimson roses on a small table, a wicker chair, and a girl. The girl's head was turned from him toward the window. Her body also slightly bent in its direction. It occurred to him that she must be lost in thought. The idle way in which her hands lay upon her lap helped

him, too, to this conclusion. As he watched her, a little sooty sparrow perched upon the window-sill, and looked at her knowingly out of his small eye. She rose, found some bread-crumbs in a funny little cupboard, and turned with them to the window. Of course, when she got there the bird was gone. She seemed in nowise disconcerted by this, but sat down and fell back again into her former thoughtful attitude, and then presently not one but three little parrows came and carried away some of her donation. She had not glanced at the bed when getting her crumbs, believing her panewly-opened eyes, had seen her face.

He lay quite still after he had seen it, dwelling with a drowsy pleasure on the remembrance of it until some minutes had gone by, and then a growing desire to see it again took possession of him. He felt still so weak and tired that he shrank from giving his voice sound, so, to attract her attention, he clutched feebly at the bedclothes, and then made a sorry effort to tap upon the

In a moment she was alert and eager. She came quickly to him, and bent over him. "Why, this is good news," she said, in a low, exquisitely soft voice, and with a smile. You are beginning to be yourself again, are you not? No, do not answer; I know what ! you would say; I understand you quite." She laid her hand with a soothing touch upon his forehead; she settled his pillows, and then, going to the door, pressed her fingers on a knob in the wall outside. This brought the house-surgeon to her in a few

"Come," said he, cheerily, nodding at the patient, "this is well; you are to be congratulated, nurse. Our patient is getting on, eh?

As he did so, it occurred to Sir Rawdon, in quite a feeble inconsequent way not to be accounted for, that he hated the house-surgeon! Nurse, he had called her. With that face-a nurse! Of course she wasn't a lady, poor thing; but with those little white slender hands to be-a nurse! And with that charming figure and that high-bred-"No, no, thanks, old man, nothing more. See you by and by at Lady Stanhope's. Look out, Alys; those bull-terriers are often treacherous-" and so on, again falling into the old delirious state, and babbling ever of this Alys, whose name had been so frequently on his lips all through his

The nurse was at his side again directly. "You must expect these little relapses for awhile," said the surgeon with encouragement, patting her kindly on the shoulder.

Then there came a week when he felt much stronger, and could lie contentedly gazing at his nurse with certain recognition in his eyes, and no fear of its slipping away from him. "When may I go?" he asked her suddenly one morning, when she was giving him his breakfast. His question was somewhat ungraciously put. He was, indeed, a little querulous at times; but she, accustomed to the vagaries of sick people, didn't appear to

"But you want to get back to the other life?" Of course it is only natural." Did a faint, faint sigh escape her here? "Your friends want to get you back there too." "It is hardly that," said he quickly. "It is more—that I want to feel myself—myself again. A man!—I am sick of coddling, and
