Paily British Whig.

SOUTH RENFREW ELECTION.

Another election, brought about by the unseating of Dr. Dowling, will take place in Renfrew on the 18th. The no- Scotia miners, however pleasant it may tification is short, and necessarily so in look in a reciprocal sense, it cannot deorder that the constituency may be re- velop the coal production of Canada, presented in the Legislature, which has | which Sir John says is as important as | been summoned to meet a few days the production of wheat, and the suggeslater than the date fixed for the polling. | tion of the News must greatly shock Sir South Renfrew is, we believe, a Liberal Leonard Tilley, who has held, and, we riding, and it will no doubt elect a sup- presume, still holds, that to repeal the porter of the Provincial Government.

Dr. Dowling, as we understand it, has principle of protection. only been unseated, and of course he will be the candidate entitled to support. He would not have to again appeal to the people but for the interferference of outsiders, who sought through protests and bye-elections, to accomplish that in which they failed in February. Their purpose was to worry Mr. Mowat beyond endurance, to oust him by some means. They were hopeful of success when Dr. Dowling was forced out of his seat, but this event occurred prior to the West Middlesex elec The outlook has changed since

The doctor is popular with the Liberals, and he has not only the sympathy but assurance of many Conservatives that they disapproved of the protesting of his election. There was a difficulty in getting a petitioner, and when such a person was found he was given the money which the law required him to deposit with his protest. Where this money came from no one could tell at the trial, nor even the man who used it, but his counsel undertook to say that it did not come from the Dominion Treasury.

The Liberals of the Riding should be up and doing. It is quite evident that the local Conservatives will be urged to make the election as hot as possible. The brigade who invaded Lennox, and Simcoe are ready for service, and may have even now attacked the constituercy. We are glad to see that the new Minister of Education, fresh from one of the liveliest campaigns in Western Ontario, will set the bali arolling in the Liberal candidate's interest on nomination day. He understands the tactics of his opponents, and may be depended upon to checkmate and defeat them.

THE COAL TAX.

Of all the impositions under the national policy none has been more senseless and iniquitous than the coal tax. For four years the people have paid it, but they have all along protested against it and demanded its abolition. In the the Liberals moved that it was not fair. about a year ago. It then credited him ly distributed, that it was a tax on industries, on railways and steamships, an unnecessary tax so far as revenue was concerned, and a tax that had failed in its object, not having given the Ontario markets to the owners of the Nova Scotia mines. For these reasons Mr. Laurier moved for the repeal of the tax of 50c. per ton on the American coal burned by our people, and his resolution, by order of the Government was voted

following June and in the Liberal platform this plank was made conspicuous, "That fuel and breadstuffs shall be made free." The subject was indeed a "burning" one. No one was more warmly debated by the leading speakers on both sides of politics. What the Liberals of the city thought of the question was ably expressed by their friend. Mr. Harty, at the nomination in June, 1882. He asked :

"Why is there a tax of 50c, per ton on hard coal? I have never heard that we expected to participate in the Salvation have in any part of our territory hard services to-morrow. coal mines, and whatever justification these may be (which I do not admit) for Drury, of the Salvation Army here, been able to understand why a tax of results. The work will be continued. 50c. per ton should be placed upon hard coal, of which this Province cannot produce a pound.

The position of the Conservatives generally was, of course, that of the Government, and Sir John's speech at London was widely quoted as containing the condensed opinion of himself and his colleagues upon this question. And he

"It is quite true that those who want tion. to procure coal would like to have it free of taxes, but it happens that coal is cheaper than it was before the duty

ducer does not pay the duty on the coal stop.

used in Ontario; it knows that the fact is not probable but certain. It is cautious not to concede too much at once. Its admission is sufficient to show, however, that it, a super-loyal Ministerial organ, is not in accord with its party. The inference is that it has never believed in the tax, and only endorsed it as the exigencies of party demanded.

Our contemporary no doubt thinks it will escape the charge of inconsistency because it advocates the repeal of the American tax on our iron ore. But then it can not be said that the American tax on iron can favourably affect the Nova coal duty would be to strike at the very

STILL FLOUNDERING.

A more clumsy attempt to defend false statement has rarely been witcontemporary in its criticism of Mr. Harty's letter, published last evening. Such floundering, wriggling, twisting and general throwing of dust in order to cover up a bad cause is not often indulged in even by the News. Having been answered in the plainest and most satisfactory manner it deserts the Gore street falsehood and takes refuge in an omnibus charge that the whole business of the City Council would be endangered if four gentlemen, whom it styles Mr. Harty's "faithful co-adjutators," should happen to be elected. It says "they are so many votes for him should any occasion arise during the year on which he would require to use them." When our contemporary saw tit to open its batteries upon the gentleman referred to why did it not recommend

the electors to also leave at home the Conservatives who voted for exemption to the Locomotive Works last year? Had it done this we might believe in its honesty and consistency of purpose. It singles out those men who were not in the Council at all, however, and calls for their defeat, whilst it has not one third number. In 1855 he succeeded word to say against its political allies Mr. Longfellow as Professor of Belles grey linen, which it is supposed the perthough they proved themselves to be Letters in Harvard University. Groceries

Doing business in this

city over thirty years, during which time a great deal of ups and downs have taken place in the grocery trade. We might say, however, that through the liberal patronage of a generous people we have during all those years been able to hold our own. As we have now entered on another year we beg to say that we will endeavour to give even better value and attention to our customers than ever before. We would respectfully ask families who never dealt with us to give us a trial order, as we are confident it will be to their Barley-quiet; sales 00,000 bush of No. advantage in more ways than one, because the groceries and other goods are always fresh and new, and the stock is the best selected and largest in Ontario and we venture to say that no other house in the
