What a revolution there has been in Kingston since the 28th January, when four people stood alone on the Market Square, surrounded by an incredulous company, who viewed their movements half sareastically and with a cerved lip said. "They'll do nothing here.". These. who attended the boliness meeting yesterday morning in Victoria Hall come to no other conclusion than that feeble instrumenta have been used to do a mighty work in the city, that the Salvo tion Army is marching along. One night she went home and getting down on her knees she pleaded for divine assistance. Then taking her hat and the scissors she was about to cut the idol, when the tempter came and again it was neces sary for her to seek assistance by pray er. She had the victory, and as she severed the idel sweet peace came to her seal. Trimming her head gear in the

Several members of a family related the gladness that came to them as they knelt takt morning for the first time around the family altar.

When the procession had mov at through the town it returned to the church, where mass was performed, the communion taken by the pricate, and the branches and flowers offered at the altar. After the Referenation, 1506. Henry VIII. declared the carrying of palms on this day to be one of these rerementes not to be contemned or dropred. The custom was kept up by the elergy till the roign of Edward VI., when it was left to the voluntary observance of the people.
