K. & P. RR. SKETCHES

DALETING AND STOCK RAISING CAPABI-LITTEN - MINERAL RESIDERCES OF THE CLYDE DISTRICTS.

The Ove Wealth-Sinking Trial Shafts Dis curvery of Gold-Events to be Chronicled in the Fall of 1883.

it opened a tolerably good tract of comsiderable attention to this subject. He was fitting up a large stock farm and had imported some valuable breeds when he was cut off in the midst of his days. before any great results were accomplished. In the Townships of Levant. Dalhousie and Lanark the same favourable conditions for stock raising prevail. and we believe that many of the farm ers are devoting more attention to this branch of husbandry. We can see no reason why a large portion of our back country should not be made to produce not only an abundance of excellent dairy products, but also large quantities of first-class beef and mutton for the English and American markets. The min eral resources of the Clyde district will probably become a more important facpabilities. A decided mineral belt tra verses the region from south to north at no great distance from the railway. Prosp-sctors have reported the

at different points within this belt, but there are only two localities where any mining has been done. About three fourths of a mile from Flower Station on a lot belonging to W. C. Caldwell Esq., several openings have been made with results all tending to show that the deposit is of very great extent. The strata has an almost vertical dip, and the bed proper appears to be from 100 to 150 ft. thick and can be traced longdi pudinally for a long distance. It con sists of large loase-shaped masses of iron ore interstratified with layers of rock The surface exposures are very much contaminated with sulphurets. A test shaft was sunk last winter by Messts. Gildersleeve and Caldwell to the depth of 70 feet. The result, we believe, was very satisfactory, showing that the ore improved both in quality and quantity with the depth. A few hundred yards sonal danger, but Mr. Summerville and mortheasterly from these workings we possible effect a landing. This journey occurs under pretty much the same conditions. A large expenditure has been incurred sinking trial shafts, which have proved the existence of large quantities employed in a shaft which has reached shows a section of solid ore from 12 to 14 feet wide and of excellent quality The result of the trial shafts here as at GILDERSLEEVE AND CALDWELL WINE seems to indicate that the interstrati

DESCOVERY OF ORE BED'S

fied layers of rock wedge out and disapbesis of iron come together, forming here. The two properties virtually form one vast bed, and its extent is such that the supply will be practically inexhaustible. Mr. Caldwell has seve ral mining properties in the district, all time. But we beg to inform our read studded with little nuggets of gold that forms or Australian minor. The locality where it was found is not yet divulged perhaps a slight outbreak of gold fever will be among the events to be chronicled for the Fall of 1888. In conclusion

we believe that the mineral will furnish a field for the profitable Stock Companies being formed, and already remarked upon the adaptability of the country to stock, and it is highly probable that both live stock and mirup from almost every hill-side, will supply an abundance of water for the live for the mining stock will be brought from other sources, probably imported bave of our readers for the present .-

bush, wheat. The Cobourg regatta occurs on Sept. 3rd and 4th The competition will be open to all yachts, the prizes offered for first-class yachts being \$130, \$100, \$50, and \$25; and for second-class yachts. \$100, \$60, \$40, and \$25. The start will be at 10:30 a.m. The general regulations will be those of the Royal Canadian Yacht Club. Entries must

be made on or before Sept. 1st. Yesterday afternoon the tug Frank Perew left with six barges carrying 113, 000 bushels of grain. While passing Alexandria Bay the barge Montreal, which was not properly handled, struck a rock and sunk. She has at present with five feet of water in her hold. Her cargo is 18,500 bushels of Milwankee wheat, insured. The M. T. Co. have asked for permission to rescue the craft. They want to take an elevator and a lighter to the scene of the accident and secure the undamaged grain.

> ---CANDIDATES CONFIRMED.

Inspector Kidd has received the list of candidates who parsed the entrance examination, and whose success has been confirmed by the High School In spectors. The list is the same as that published by us a few weeks ago, with one exception - the name of William Hewton is added. No caudidate has been rejected. There have been no reections since Messrs. Kidd and Knight and Rev. P. A. Twohev have composed the local board of examiners. This certainly a compliment which they should not lightly esteem.

ger "My skin, which has been covered with scaly sores, has become clean, smooth and soft as a lady's. My hands were cover ed with little dry scabs. They have disappeared and I'm better than I have been for twenty years, using Dr. Hemson's Shin cure. - A. M. Noble, Selma, N. C., July 3.

Testimonial from Capt. Joshua Barper.

SACRYILLE, N. B., Feb. 13, 1877. H. ROBINSON, Esq., St. John, N. B. Dear Sir. Early in October last I took a severe cold which settled on my lungs. After having a bad cough for about six weeks I had a very severe attack of blood ing from the lungs while on a passage from Queenstown to Dover. I had daily spetis of bleeding for some days until I lost about two gallons of blood, and was so weak as to be scarcely able to stand. I put back to Openstown, where I received such medical assatance as enabled me to get home.

I saw an advertisement of your Phospho riged Cod Liver Oil Emulsion to a paper. I immediately sent and got half a denor bottles after taking which I feel myself a well man again. My weight, which was reduced to 120 pounds, is now up to my standard of 152 pounds. Seeing what it has done for me I can confidently recommend it to others afflicted with hing diseases. Yours very truly.

JOHNYA HARPER. of the barque "Mary Lowerson.
