The Montreal Witness is informed, that the Syndicate intend to establish a line of Clyde built steel steamers upon the waters of the upper lakes, replacing vessels of the Asia class, which are too, dangerous to be much regretted. 1 Syndicate will have to do a great many things to popularize themselves and make up for the extraordinary favours they have secured from the Government in connection with the Canada Pacific RR. The disallowance question, wil in all probability, again lead to the defeat of Conservatism in the North West. The examination of those desiring to both papers has to be furnished enter Government employment began order, and their order was not given i this morning in the Artillery Bar | time. What a proud boast can be made racks. Quite a number of candidates on an inch of white margin! presented themselves. The examinations are an outcome of the enquiry into the best means of improving and purifying the public service. It is a reform that has been for many years deemed a necessity but unfortunately political exigencies have intervened and checked it, as they must do again despite the action which indicates a purpose of the Government to select men for office on , merit and promote them according to their qualifications. We do not presume to know what motives animate those now under examination here and elsewhere, but they are more hopeful than we could be under the circumstances if they sup. pose for a moment that their success, ensures appointments to vacancies in the institutions under Government control. We are satisfied that political influences must still prevail, that a min may possess a certificate of ability and exceed in literary culture the require. ments of the Board of Examiners, but he must have a friend at Court, he must indeed have won his spurs as a politician before he can expect favours from the Government which now reigns at Ottawa and largely sustains itself in et. power by the manner in which it dis penses patronage. The "reform as, engineered by Hon. Hector Langevin, from the first had a farcical look, and nothing has occurred since the adjournment of Parliament to change its aspect and give it popularity.
