Ayer's Cherry Pectoral,

FOR DISEASES OF THE THROAT AND LUNGS, SUCH AS COUGHS, COLDS, WHOOPING COUGH, BRONCHITIS, ASTHMA AND CONSUMPTION.

The few compositions which have won the confidence of mankind and become household words among not only one but many nations, must have extraordinary virtues. Perhaps no one ever secured so wide a reputation, or maintained it so long as AYER'S CHERRY PECTORAL. It has been known to the public about forty years, by a long continued series of marvelous cures, that have won for it confidence in its virtues, never equaled by any other medicine. It still makes the most effectual cures of Coughs, Colds, Consumption, that can be made by medical skill. Indeed, the CHERRY PECTORAL has really robbed these dangerous diseases of their terrors to a great extent and given a feeling of immunity from their painful effects, that is well founded, if the remedy be taken in season. Every family should have it in their closet for the ready and prompt relief of its members. Sickness, suffering, and even life is saved by this timely protection. The prudent should not neglect it, and the wise will not. Keep it by you for the protection it affords by its early use in sudden attacks.

TRICHINOSIS.

How the Pest May be Avoided—Its Prevalence in Europe and the States.

(*N. Y. Times.*)

In the matter of trichinosis there is dense and wide-spread ignorance to be overcome, and the task is one of no small difficulty, for it concerns one of the common affairs of life, in respect to which the mass of people are tenacious of habit and hard to teach. There is hardly a newspaper in this country or in Germany which has not at some time, or a dozen times, established the fact that trichinæ are killed by cooking, and that pork which has been fried, boiled, broiled, or in any way subjected to heat above 176° is perfectly harmless; yet the Germans of the Fatherland, and those who have come over here, persist in eating raw ham, and their folly and ignorance have occasionally fatal consequences. There have been alarming epidemics in Germany owing to this revolting habit, as, for instance, at Hedersleben, a town of 2,000 inhabitants, where there were 327 cases of trichinosis in 1866, of which 82 were fatal. The disease is common in Sweden, too, from the same cause. In France, where, as might be supposed, the food of even the poorest classes is generally well cooked, it is said that not a single instance of trichinosis has ever been known. At Crepy-en-Valois, in 1878, seventeen persons were taken violently ill

AFTER EATING FRESH PORK.

One, a girl, died, and an autopsy revealed the presence of innumerable encysted trichinæ. It is worthy of remark that it was a French and not an American pig which caused this outbreak, the only one which has ever been reported in France. By excluding American pork the French Government inflicts a hardship upon its people but does not prevent trichinosis; the people themselves do that by cooking what they eat. The imperfect statistics we have seem to show, however, that trichinæ are more common in American swine than in those of any other country, except, perhaps, Sweden. Out of 1,400 animals examined at Chicago, 28—1 in 50—were found infected; out of 210 hams sent in one cargo to Sweden, 8—1 in 26—were infected. A German professor publishes the following results of microscopic inspection in various cities:—In Brunswick trichinæ were found in 1 hog in 5,000; in Halle the proportion was 1 in 1,000; Gotha, 1 in 1,800; Schwerin, 1 in 550; Copenhagen, 1 in 465; Stockholm, 1 in 266; in Kiel, Prussia, 1 in 260, and in Lienkaping, Sweden, 1 in 63. In many German cities the

MICROSCOPIC EXAMINATION

of the flesh of every hog slaughtered is obligatory, and experts are appointed for the purpose. In other cities the butchers and marketmen, sensibly recognizing their interest in the matter, have formed societies, of which every member is provided with a good microscope, and knows how to use it. Microscopic examination, however is a stage guard which, in order to be efficient, must be applied to every animal, either slaughtered in a country or imported into it, and it would be a manifest impossibility to thus inspect every carcase which goes out of the great abattoirs of Cincinnati and Chicago. Legislation can do very little with trichinosis, except by aiding to diffuse information. If swine raisers can be taught that feeding their hogs on the flesh of animals of any kind helps to spread and perpetuate trichinosis, one important step will have been taken toward the extermination of the pest. Another fact which everybody should know is that well cooked pork never produces trichinosis in human beings.

Dr. J. Collin Browne's Chlorodyne.

THE ORIGINAL AND ONLY GENUINE.

CHLORODYNE is admitted by the Profession to be the most wonderful and valuable remedy ever discovered.

CHLORODYNE is the best known remedy for Coughs, Consumption, Bronchitis and Asthma.

CHLORODYNE effectually checks and arrests those too often fatal diseases, Diphtheria, Fever and Croup, Ague.

CHLORODYNE acts like a charm in Diarrhœa, and is the only specific in Cholera and Dysentery.

CHLORODYNE effectually cuts short all attacks of Epilepsy, Hysteria, Palpitation, and Spasms.

CHLORODYNE is the only palliative in Neuralgia, Rheumatism, Gout, Cancer, Toothache, Meningitis, &c.

From W. Vesalius Pettigrew, M.D., formerly Lecturer at St. George's Hospital, London:—"I have no hesitation in stating that I have never met with any medicine so efficacious as an Antispasmodic and Sedative. I have used it in Consumption, Asthma, Diarrhœa and other diseases, and am perfectly satisfied with the results."

"Earl Russell communicated to the College of Physicians that he received a despatch from Her Majesty's Consul at Manilla to the effect that cholera has been raging fearfully, and that the only remedy of any service was CHLORODYNE."—See Lancet, 1st December, 1878.

CAUTION.—*Beware of Piracy and Imitations.*—The public are further cautioned a forgery of government stamp having come to the knowledge of the Board of Inland Revenue.

CAUTION.—Vice Chancellor Sir Page Wood stated that Dr. J. COLLIS BROWNE was undoubtedly the inventor of CHLORODYNE; that the story of the defendant, Freeman, was deliberately untrue, which, he regretted to say, had been sworn to.—See Times, July 10, 1874.

Sold in bottles at 1s. 1½d., 2s. 9d., 4s. 6d. and 11s. each. None is genuine without the words "Dr. J. Collis Browne's Chlorodyne" on the Government Stamp. Overwhelming medical testimony accompanies each bottle.
