The wide-spread opposition to the recently consummated telegraph mono poly is at length taking practical shape in the formation of a new company Capital to the extent of a million dollars is said to be already subscribed and construction is to be immediately begun with the intention of having every sec tion completed by the spring. We hope the patriotic reflection that the Canadian all this is not too good to prove tru and for that matter there we every reason to believe in the authenticity of the information. This being so the coalition monopoly, which so promptly rose its rates, will soon be forced by competition te bring them down again. Nothing is more true than that monopoly is detri mental to the true interests of the pub he whether in the greedy union of tale graph companies or in the still more oppressive opperations of a policy of so called protection or the land and money grab of a Pacific Railway Syndicate. Not only the ability but the wonderle

versatility of the leader of the Liberal Opposition in the Dominion Parliament has been made apparent by the unusally long series of eloquent public addresses he has delivered during the past two months. All these speeches have been reported by the press, and those who have read these reports cannot but be struck by the fact, that while the same subjects have necessarily been re | endures them. peatedly handled there has yet been no lavish repetition of language or illustrawith in a fresh, original and trenchent way, as if the orator had thrown his whole strength of originality, argument and shetoric into that particular effort. The fact which Hon. A despatch from British Columbia states that Sir Charles Tupper has started for Canada. Evidently they have laid to heart Sir John's advice, tendered to them from this city, to secone from as Canadians at all. . After all the tremendous price that has been and is to the entrance and retention in the con federation of this handful of white people on the Pacific coast it is really too had that they should still assert their back Sir Charles from British Columbia to Canada.

POPULAR GOVERNMENT.

The journalistic plan of interviewing representative men from the old land | Lucouse Arrangement of Steme of Local who visit this continent on business or pleasure is certainly a capital way of eliciting British opinion for Canadian readers. An esteemed correspondent, who has spent some time in travelling in the States, writes us his impressions in the following interesting manner

There exists a very generally received idea that strangers are more likely to notice and complain of shortcomings of a social habit or system than any residents, who have grown old under the infliction, but I cannot help thinking that there exists a considerable amount error in this opinion. LITERARY NOTES.

A substantial contribution to the oming centennial celebration at Yorklown is Mr. H. P. Johnston's volume, The Yorktown Campaign, which Harper & Brothers will publish in a few days. The book is copiously illustrated with maps and fine engravings from famous historical paintings by Trum-Sir Joshua Revnolds, Gilbert Stuart, and others. It is no little compliment to Mr. Johnston's accuracy that he has been consulted in locating the camping grounds of the militia from the various States, which it is designed to make identical with the camping rounds of the troops from their respective States a century ago.
