

she would have left.

Annette, she describes as a bold, parents had made up their minds to father's wish. She had been spoiled and was a passionate, wilful girl. After a few short months she had married with her husband, a child which started both were wrong and nothing would submit—the Philip was proud and his poverty made him prouder.

Annette left him and returned to her father's house. Her parents welcomed her gladly, for she was a good girl.

Philip was hasty, only to hear the news of separation, and wanted to speak by a letter from Annette's father, offering a cheque for \$5,000, requesting him to keep quiet and to keep silence upon his daughter, he left the city and went to one knew where.

Annette soon forgot her anger, and her love for her husband returned. She had sought him for years, refusing to listen to her parents, who had tried to induce him to procure a divorce.

She at length convinced them that her only hope for happiness lay in returning her to her husband, but that trace of Philip could be found.

Annette informed him as plead; she became ill, and the doctors who were called advised a long sea voyage.

Philip sailed with ready to start for a distant port. The Captain was satisfied with the passage with him on the ill-fated ship.

The ship perished when three days out from New York, and as Annette said, she was the only "widow of the storm."

The husband and wife rewarded the Wests in a way that rendered them independent for life.

Annette remained in Nantucket with her husband for some years, and then returned to the city where her parents still lived—a happy wife who never forgot the lesson of the past.

NOTES AND COMMENTS.

Quebec has a Tory Government. Ontario has a Liberal Government. Quebec has a debt of seven millions. Ontario has a surplus of four millions.

The Irish Canadian says the Dominion Cabinet "may be described as a Cabinet of fossils, without doing discredit to more than one or two of its members."

Citizen. Leaders of political parties in this country are becoming alive, to the importance of encouraging young men to take an active part in the work connected with political expositions.

Telegraph. Quebec Province is Tory and will no doubt remain Tory, the Liberal Opposition being as weak and as few men at its head as the Conservative opposition in the Legislature of Ontario.

If the Mac has any influence in this Province it had better exert some of it. While it is dividing over Quebec Mr. Mowat's Government is every year encroaching itself, and now in Ontario.

Officer. If it was worth while for the Canadian Government to establish a Military College at all, surely it was in the interests of the College and for the credit of the country that the staff of Professors should be men of high attainments. Without such a class of instructors the College could not have attained to its present state of efficiency.

Toronto Spectator. Our Canadian authorities are thoroughly determined to summarily deal with those who invade the country for any such brutal purpose as political lighting, and through such things as the police carriage checked for the Bostonians.

It is almost certain destination of those who travel in this direction on any such errand.

The Indians cannot be civilized, say the men who do not need as they run. There, for instance, is the Chickasaw Nation, in the Indian Territory, U.S. It has its own government, its own legislature, makes its own laws, native teachers teach in its schools, and native preachers preach the Christian faith! The prohibitory liquor law is in force, and the people are sober. Some of the Chickasaw ladies are cultivated and educated.

For Druggists, Weakness and Debility.

From George S. Dixey, of Epson, N.H.

"Hiring coopers great benefit from the use of Dr. Dixey's Salve. I am writing to add my testimony to the thousands of others constantly sounding its praises. During the war I was in the army, and had the misfortune to be taken prisoner, and be confined in Salisbury and other Southern prisons several months.

I became so much reduced in health and strength as to a mere skeleton of myself. On being released, I was a fit subject for a Northern Hospital where I remained two months, and then came home. My physician recommended and prescribed for me several bottles of Dr. Dixey's Salve, which I continued to use for several weeks, and found my health restored and my weight increased from fifty pounds to one hundred and fifty. My taste was gone, however, and I could eat but little, and it in all cases of weakness and debility of the system, whether arising from an excess of the blood, debility, or almost any other cause, believing it will in most cases give entire satisfaction. Sold by all druggists."

THE THIRD PARTY CRY.

The Toronto World is young and vigorous but the attainment of the latter quality is not the limit of its ambition.

It is not overburdened with modesty, that very bad stock in a public journal eager to attain distinction, and therefore it strikes out bravely for a third party, in a sort of Canada First way. We reproduce its platform not only as a matter of common interest, but because it contains unparable remarks in relation to the dangerous state of the Oswego harbor, at which many accidents have occurred this fall. Long before these accidents happened we called attention to the risk which vessels ran in entering that port for a party again sweeps dreamers of the future out of the way and tries the statesman of the present for his sins of commission, kindly veiling his more flagrant sins of omission.

On account of the recent disasters happened to sail vessels in Oswego harbor our local insurance agents have been notified by the companies with whom they represent to take no further risks on grain cargoes in sail vessels bound to Oswego. This action of the insurance companies has alarmed the shippers and vessel owners in Oswego, and a meeting of the Board of Trade of that city has been called when the question as to the safety or dangerous condition of the harbor will be thoroughly discussed.

There room for a party who shall advocate a simplification of our whole political system? Have we too many legislative bodies; too many members in each of such bodies; too many ministers; too many governors; too many hangers-on?

Is there room for a party that, while it favors the development of the Northwest, opposes throwing that great heritage into the hands of land speculators? Can we have a genuine homestead act?

There room for a party that will advocate the abolition of tax exemptions? Will insist on all persons, no matter their calling or profession, paying their just share of municipal or other taxes?

There room for a party that, while not setting up the "no nothing" cry, will insist that in all those public appointments where ability alone should compete with ability, other things being equal, Canadians by birth or adoption shall have the preference over importations? Could we not furnish our own men? Any one can become the next magistrate of Canada, but a Canadian?

There room for a party that will work to find out why European emigration avoids the colors of Canada, and seeks the repose of the United States, and having found the reason apply the remedy?

There room for a party that favors the extension of the franchise? Is it just that the young men of cities and towns should be refused votes while the sons of farmers have them?

How to get Rich.

Expose yourself day and night, eat too much without exercise, work too hard with your mind, and touch the arteries of wealth, and touch the arteries of wealth.

But there is in reality touching language—language derived from the heart, yes, from the depths of the soul, in the many thousands of testimonials and letters unsolicited that come from those who once were sufferers from lung disease, asthma, rheumatism, and who have used N.H. Davis' Vegetable Balance Elixir, and have been restored to their wonted health and activity.

Getting Leaves.

There is something inexplicably touching in the fallen leaves, sighs an esteemed author.

There is, then, in, indeed. It's you who sighs, and the autumn is a wet season, and tends the melancholy atmosphere.

But there is in reality touching language—language derived from the heart, yes, from the depths of the soul, in the many thousands of testimonials and letters unsolicited that come from those who once were sufferers from lung disease, asthma, rheumatism, and who have used N.H. Davis' Vegetable Balance Elixir, and have been restored to their wonted health and activity.

On Their Own's.

We will sing Dr. Dixey's Celestial Elixir—Vulcan Balsam and other Electric Appliances on record for thirty days to young men and older persons who are subject to nervous debility, loss of vitality, etc., guaranteeing speedy relief and complete restoration of vigor and strength, and many other diseases.

Illustrated pamphlet sent free. Address, Vulture Balsam Co., Marshall, Miss.

BIRMINGHAM.

IMPORTANT DELEGATION ARRIVED.

Delegation of the Virgin Mary and the Consecration of the Right Rev. Dr. Cleary, Bishop of Kingston.

Services by Rev. Dr. Malone as St. Paul's Church at 11 a.m. and 3 p.m.

Masses at 12.30 p.m.

Daily British Whig.

Under Our Oregon Desk.

BEST NORTHUMBERLAND.

A constituency has been opened in Ontario after a summer's quietude. The Hon. James Cookson has, without delay, resigned his seat for West Northumberland in consequence of health.

The Reformers of this riding, indulgent with their members in his lengthened illness, will regret its apparently hopeless continuance. The Colgate World, while tenderly expressing this feeling, cannot see any greater necessity for his resignation now than there was a year ago, since the opposite party have made no complaint. In this light, of course, if they could endure it surely his friends might also, with a sufficient majority to enable forty-five of their faithful members to indulge in absenteeism all at once without endangering their grasp of the levers and fishes. Should rumors prove true, and there never was a furious smoke without some fire beneath it, there will be a general election next May, and the present change, involving a hard struggle in a close constituency, will come on near the final stage of a dying parliament. It is surprising that the stalwart Conservative member would run the risk of opening the riding, since he is so devoted to his party that he was carried to the House last session on a couch in order to vote against a syndicate offering to construct the Pacific Railway by many millions cheaper than the Government's reckoned price.
