The "Geneva" Admitted.

The average U.S. citizens will, at every opportunity, invade Canada, tender for public work, undersell merchants and run some business into the ground. That is all right, since it is only the Canadian who suffers. Let the latter, however, invade the Republic and put the people there into competition, and what a wail there is. Here is a regular screech from

the Clayton, N.Y., Independent : "Sharp practice this. At two o'clock in the morning of the last day of the last assaion of Congress a bill was passed to rant as American register to the Canadian propeller 'Geneva.' How a bill of nature could have got through Congrees if our representative had been attending to the interests of his constituency, is a query with many interested in represent.

The Accountant contains a complete elucidation of the science o acounts by the latest and most approved methods, business cerrespondence, mer cantile forms, and other desirable information. The publishers very correctly remark in the preface:

> "No sensible man now disputes the importance of book-keeping. The time has long since gone by when a hap-hazard system of recording business transactions, will answer the requirements of men engaged in trade and commerce. The magnitude and variety of these engagements are such that no dependence upon mere memoranda, or an unsystematic method of keeping accounts, will enable an individual to calculate with accuracy his gains or losses, and so order his affairs that he may know at any time how he stands with his debtors and creditors. There must be a system, and that system must be reduced to a science as invariable in its results as the problems It is possible, and its possibility is not honest convictions. As it was desirable that the public should know Mrs. Van Cott's views a reporter interviewed her this morning. A hearty reception was accorded the journalist by the lady, who was found to be suffering from a very severe hoarseness, brought on by the exertions of last evening.

Reporter-Is there any truth in the report that you hurled thunderbolts at the clergy of the city ?

Mrs. Van Cott-Not that I'm aware of. I did receive one minister who was deputed by his brethren to tell me that they didn't like the way I conducted the meetings, but I did not take any notice of the statement as I have been sen here to do God's work and save souls. So great has been the demand for it since its introduction that the proprietors, who were producing about 25 tons per week in Liverpool have been compelled to purchase extensive works in London, where they can manu facture about 50 tons extra per week They have also had to secure sufficient room to increase the production to 200 tons weekly, making them the largest producers in Europe. White lead possesses only one good property, viz., covering yower; it is poisonous, soon loses its opacity, and turns yellow with sewer and and other gases, and prejudicially affects iron and other metals. Oxide zinc has scarcely half the covering power of lead, but it is whiter, and retains its colour. Griffiths' Patent Zinc White has all the good properties of both the above without any of their drawbacks, viz.; it has far more body than lead, has double that of oxide zinc, has the same whiteness, will never change colour even in sulphuretted hydrogen (which destroys lead) and does not lose its opacity by age. It is calcined almost indestructible, and of course, will stand any variation of climate. Its durability is such that it is admirably adapted for protecting iron, wooden, or coment structures in any exposed situations, from the effects of the weather. Professor Phipson says: It is one of the most ingenious and useful discoveries of modern times.
