### IS IT CURABLE?

THOSE who have suffered from the various and complicated forms of disease assumed by Catarrh, and have tried many physicians and remedies without relief or cure, await the answer to this question with considerable anxiety. And well they may; for no disease that can be mentioned is so universally prevalent and so destructive to health as Catarrh. Bronchitis, Asthma, Coughs, and serious in many instances, a case of simple but nerlected Catarra. Other sympathetic affections such as deafness, impaired eyesight, and loss of sense o serious results of neglected Catarra, bad enough in themselves, but as nothing compared with the dangerous affections of the throat and lungs likely

Lavely Stock Operations.

The current of recent events has given great impetus to business in Wall street, and many successful turns are reported where immense profits are made in short periods. The most successful way that we have heard of yet for operating in stocks is by the Combination Method of Mesars, Lawrence & Co., Bankers, New York. By this system thousands of orders in various sums are pooled into one vast capital and operated under the most experienced and skillful manage meut, thus securing to each sharsholder superior advantages and profits, not possible in any other way. Profits are paid at the end of 30 days. A gentleman in Boston, made \$747.30 on an investment of \$100. Many others are doing as well or better. Capital in any amount from \$10 into night as Florence and I drove to \$100,000 can be used with equal proportionate auccess by this Combination or father laid to rest.
