#### ANOTHER DEFEAT.

Again the Quebec Ministry has been sustained by the representatives of the Quebec people. Elated by his esteh satcess of a few days since, Mr. Chaplesu has not since tired of framing non-contidence motions in the Government, All to no purpose, however. He has had his trouble for his pains. Every effort to repeat his little victory has come to grief and this morning he received another set-back by the rejection of his notion reflecting upon the railway policy of the Government, It is high time Mr. Chaplean was relieved of the illusory idea that he controls a majority in the Assembly, although he persists in making this his foolish boast. It will be a sorry day for the sister profince when he does so, but all the probabilities are that hi accession to power will be, if ever, at some very future period. The enchantment which distance may lend to the prospect of it is all the power the Quebec Tories will enjoy for many a day to come. The people of Quebec will not be in a harry to replace in office the men who well-nigh ruined their province.

## THE LETELLIER TESTIMONIAL.

Our local contemporary affects w at the proposad testimonial to the Ilon. Mr. Letellier. Before next indulging it such a pastime let our neighbor remember that the Chieftain by whom it delights to swear was himself a recipient of a magniticent testimonial, and that some of the handsome contributions to that fund were expropriated from the coffers of the Northern Railway and similar institutions which were at the time insolu vently indebtd to the Government, s.e. to the people of Canada. In consideration of the contributions this bankrupt concern to the John A. testimonial and to Tory election funds at sundry times and in divers places, Sir John exerted his good offices to commute the company's indebtedness to the Government. From all which is follows that the people's money was con. tributed in the corruptest manner possible to the testimonial to the Tory chieftain. The recollection of this disgraceful fact should have strangled our contemporary's utterances anent the "big push for Letellier." Whatever monies have been raised for political purposes on the Reform side there has never yet been adduced a single instance where public of Frontenac, containing six acres, more money has by them been prosticuted for such a purpose, nor on the other hand away for private funds for party The latter was done in of Sir Hugh Allan's gold and the Pacific Railway charter, the former in the Northern Railway subscription to the Macdonald testimonial. Our Tory friends may rest assured that if this testimonial is raised for the Hon. Mr. Letellier it will be a spontaneous offering of private money, and consequent ly will be nobody's business but those who give it. No unclean hands will be amount, as in the case above referred to, and the fund, when completed, will be presented as a token of public approbation, in recognition and vindication of the patriotic discharge of a public duty on the part of ex-Lieut. Governor, and in protest against an unqualified and unjustifiable act of Tory tyranny.

## THE UNIVERSITY VACANCY.

It is pretty generally known that the chair of classical literature in Toronto University is at present vacant, and we understand that S. Woods, M. A., is an Emmanuel Orser, and the otherwise in that Prince Louis Napoleco, during his applicant for that important position. We juriously affecting such other land and are quite sure we wish the University well when we express the hope that Mr. Wood's application may prove successful In our opinion no man could well be better adapted to any aphere of public usefulness than the gentleman we have named for the position in question. It is a case of precisely the man for the place, and the place for the man. No position could be more congenial to a gentleman of Mr. Woods' literary and classical tastes, and teaching tast and experience, she pulled vigorously forward right int and it would be difficult indeed, for these and other reasons, to find one who would more efficiently or worthily fill it than he. It is no venture to say that Mr. Woods' unusual endowments and atin this particular specialty would enable him to fill the chair with | hand, an employee of the steamer, who equal credit to himself and the institution, jumped from the bow of the Pierrepont inight have been, historically, had the and with decided advantage to the stu- into the skiff, and pushed the latter off, dents who would enjoy the rare benefit much to the relief of the occupant of the of his tuition. #### THE BATTERY CAMP.

THE REDUCED PAY -A HEALTHY LOCATION -THE ANNUAL GAMES-BREAKING UP

On Monday we visited the camp 'A' Battery, as had been our usual em tom. The location of the tenting batter (Redden's Point) was certainly a pleasant place, and there is nothing but satisfac tion expressed with it. The men not been drilled too much to prevou them from enjoying a reasonable amoun of rest and recreation. Many of the artillerists are experienced in this out door exercise, and take the change of life very complacently, indeed not a few would heartily agree to a prolongation

of the camping season on the present basis and with the same offects. We found that there was great dissatisfaction in regard to the recent regulations anent the pay of the men. There is a reduction, but we are informed that it is really not such when it is remembered that as a man takes his discharge at the end of three years he will receive the amount which will be held back from him during his term of service. The reduction of five cents a day will spread over the three years, so that it will be lightly felt for the time being and yet amount to a considerable sum at the close of the period specified. The Batterymen are not satisfied. They want the full pay; and many think the Government might generously give them a small remittance at the end the three years without running the country into bankruptcy.

is explained, too, that the order anent the three years' service applies only to such men as many here often desire to become connected with the School Gunnery, not as short course men, permanent fixtures. These men; besides being sworn in for three years, will have to have a discharge from any Volunteer Battery with which they may have been

THE LATE NATOLBON III. AND THE PANAM. CANAL SCHEME.

(Regular Correspondence.) M. de Lesseps, it is well known, is resolved to strive his utmost to crown the edifice of his long and splendidly useful life by carrying out that Panama Cana scheme, which, to all practical intents and purposes, he has made his own. candidly told his hearers that, as in the construction of the Suez Canal, he himself would be solely responsible to the public.
